**FIRST SOLAR, INC.**

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)**

**1. Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements of First Solar, Inc. and its subsidiaries in this Quarterly Report have been prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP") for interim financial information and pursuant to the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (the "SEC"). Accordingly, these interim financial statements do not include all of the information and footnotes required by U.S. GAAP for annual financial statements. In the opinion of First Solar management, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair statement have been included. Certain prior period balances have been reclassified to conform to the current period presentation.

The preparation of condensed consolidated financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Despite our intention to establish accurate estimates and reasonable assumptions, actual results could differ materially from such estimates and assumptions. Operating results for the three months ended March 31, 2024 are not necessarily indicative of the results that may be expected for the year ending December 31, 2024 or for any other period. The condensed consolidated balance sheet at December 31, 2023 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by U.S. GAAP for complete financial statements. These interim financial statements and notes should be read in conjunction with the audited financial statements and notes thereto for the year ended December 31, 2023 included in our Annual Report on Form 10-K, which has been filed with the SEC.

Unless expressly stated or the context otherwise requires, the terms "the Company," "we," "us," "our," and "First Solar" refer to First Solar, Inc. and its consolidated subsidiaries, and the term "condensed consolidated financial statements" refers to the accompanying unaudited condensed consolidated financial statements contained in this Quarterly Report.

**2. Cash, Cash Equivalents, and Marketable Securities**

Cash, cash equivalents, and marketable securities consisted of the following at March 31, 2024 and December 31, 2023 (in thousands):

	<b>March 31, 2024</b>	<b>December 31, 2023</b>
Cash and cash equivalents:		
Cash	\$ 980,650	\$ 841,310
Money market funds	701,431	1,105,684
Total cash and cash equivalents	1,682,081	1,946,994
Marketable securities:		
Foreign debt	34,965	34,895
U.S. debt	44,203	44,089
Time deposits	228,848	76,511
Total marketable securities	308,016	155,495
Total cash, cash equivalents, and marketable securities	<u>\$ 1,990,097</u>	<u>\$ 2,102,489</u>

[Table of Contents](#)

The following table provides a reconciliation of cash, cash equivalents, restricted cash, and restricted cash equivalents reported within our condensed consolidated balance sheets as of March 31, 2024 and December 31, 2023 to the total of such amounts as presented in the condensed consolidated statements of cash flows (in thousands):

		<b>March 31, 2024</b>	<b>December 31, 2023</b>
	<b>Balance Sheet Line Item</b>		
Cash and cash equivalents	Cash and cash equivalents	\$ 1,682,081	\$ 1,946,994
Restricted cash – current	Other current assets	8,252	8,262
Restricted cash – noncurrent	Other assets	3,633	3,621
Restricted cash equivalents – noncurrent	Other assets	8,957	6,192
Total cash, cash equivalents, restricted cash, and restricted cash equivalents		<u>\$ 1,702,923</u>	<u>\$ 1,965,069</u>

See Note 8. “Fair Value Measurements” to our condensed consolidated financial statements for information about the fair value of our marketable securities.

The following tables summarize the unrealized gains and losses related to our available-for-sale marketable securities, by major security type, as of March 31, 2024 and December 31, 2023 (in thousands):

<b>As of March 31, 2024</b>					
	<b>Amortized Cost</b>	<b>Unrealized Gains</b>	<b>Unrealized Losses</b>	<b>Allowance for Credit Losses</b>	<b>Fair Value</b>
Foreign debt	\$ 35,000	\$ —	\$ 20	\$ 15	\$ 34,965
U.S. debt	45,689	123	1,601	8	44,203
Time deposits	228,917	—	—	69	228,848
Total	<u>\$ 309,606</u>	<u>\$ 123</u>	<u>\$ 1,621</u>	<u>\$ 92</u>	<u>\$ 308,016</u>

  

<b>As of December 31, 2023</b>					
	<b>Amortized Cost</b>	<b>Unrealized Gains</b>	<b>Unrealized Losses</b>	<b>Allowance for Credit Losses</b>	<b>Fair Value</b>
Foreign debt	\$ 35,000	\$ —	\$ 91	\$ 14	\$ 34,895
U.S. debt	45,625	88	1,614	10	44,089
Time deposits	76,533	—	—	22	76,511
Total	<u>\$ 157,158</u>	<u>\$ 88</u>	<u>\$ 1,705</u>	<u>\$ 46</u>	<u>\$ 155,495</u>

The contractual maturities of our marketable securities as of March 31, 2024 were as follows (in thousands):

	Fair Value
One year or less	\$ 299,587
One year to two years	4,569
Two years to three years	—
Three years to four years	—
Four years to five years	—
More than five years	3,860
Total	<u>\$ 308,016</u>

### 3. Restricted Marketable Securities

Restricted marketable securities consisted of the following as of March 31, 2024 and December 31, 2023 (in thousands):

	<b>March 31, 2024</b>	<b>December 31, 2023</b>
Foreign government obligations	\$ 49,894	\$ 51,229
Supranational debt	15,110	15,339
U.S. debt	110,826	113,326
U.S. government obligations	18,652	18,416
Total restricted marketable securities	<u>\$ 194,482</u>	<u>\$ 198,310</u>

Our restricted marketable securities represent long-term investments to fund the estimated future cost of collecting and recycling modules covered under our solar module collection and recycling program. We have established a trust under which funds are put into custodial accounts with an established and reputable bank, for which First Solar, Inc.; First Solar Malaysia Sdn. Bhd.; and First Solar Manufacturing GmbH are grantors. As of March 31, 2024 and December 31, 2023, such custodial accounts also included noncurrent restricted cash and cash equivalents balances of \$9.0 million and \$6.2 million, respectively, which were reported within "Other assets." Trust funds may be disbursed for qualified module collection and recycling costs (including capital and facility related recycling costs), payments to customers for assuming collection and recycling obligations, and reimbursements of any overfunded amounts. Investments in the trust must meet certain investment quality criteria comparable to highly rated government or agency bonds. As necessary, we fund any incremental amounts for our estimated collection and recycling obligations on an annual basis based on the estimated costs of collecting and recycling covered modules, estimated rates of return on our restricted marketable securities, and an estimated solar module life of 25 years, less amounts already funded in prior years. See Note 8. "Fair Value Measurements" to our condensed consolidated financial statements for information about the fair value of our restricted marketable securities.

The following tables summarize the unrealized gains and losses related to our restricted marketable securities, by major security type, as of March 31, 2024 and December 31, 2023 (in thousands):

**As of March 31, 2024**

	<b>Amortized Cost</b>	<b>Unrealized Gains</b>	<b>Unrealized Losses</b>	<b>Allowance for Credit Losses</b>	<b>Fair Value</b>
Foreign government obligations	\$ 64,127	\$ —	\$ 14,223	\$ 10	\$ 49,894
Supranational debt	17,634	—	2,524	—	15,110
U.S. debt	146,030	—	35,176	28	110,826
U.S. government obligations	24,437	—	5,780	5	18,652
<b>Total</b>	<b>\$ 252,228</b>	<b>\$ —</b>	<b>\$ 57,703</b>	<b>\$ 43</b>	<b>\$ 194,482</b>

**As of December 31, 2023**

	<b>Amortized Cost</b>	<b>Unrealized Gains</b>	<b>Unrealized Losses</b>	<b>Allowance for Credit Losses</b>	<b>Fair Value</b>
Foreign government obligations	\$ 65,202	\$ —	\$ 13,963	\$ 10	\$ 51,229
Supranational debt	17,688	—	2,349	—	15,339
U.S. debt	146,484	—	33,129	29	113,326
U.S. government obligations	24,460	—	6,039	5	18,416
<b>Total</b>	<b>\$ 253,834</b>	<b>\$ —</b>	<b>\$ 55,480</b>	<b>\$ 44</b>	<b>\$ 198,310</b>

As of March 31, 2024, the contractual maturities of these securities were between 7 years and 15 years.

#### 4. Consolidated Balance Sheet Details

##### Accounts receivable trade, net

Accounts receivable trade, net consisted of the following at March 31, 2024 and December 31, 2023 (in thousands):

	<b>March 31, 2024</b>	<b>December 31, 2023</b>

Raw materials	\$ 454,929	\$ 478,138
Work in process	91,051	78,463
Finished goods	<u>689,925</u>	<u>530,197</u>
Inventories	<u>\$ 1,235,905</u>	<u>\$ 1,086,798</u>
Inventories - current	\$ 970,871	\$ 819,899
Inventories - noncurrent	\$ 265,034	\$ 266,899

##### Other current assets

Other current assets consisted of the following at March 31, 2024 and December 31, 2023 (in thousands):

	<b>March 31, 2024</b>	<b>December 31, 2023</b>
Spare maintenance materials and parts	\$ 157,756	\$ 148,218
Indirect tax receivables	85,421	65,301
Prepaid expenses	63,541	62,480
Operating supplies	46,587	43,995
Insurance receivable for accrued litigation (1)	21,800	21,800
Restricted cash	8,252	8,262
Prepaid income taxes	6,267	7,064
Derivative instruments (2)	3,490	1,778
Other	32,805	33,002
Other current assets	<u>\$ 425,919</u>	<u>\$ 391,900</u>

(1) See Note 10. "Commitments and Contingencies" to our condensed consolidated financial statements for discussion of our legal proceedings.

(2) See Note 6. "Derivative Financial Instruments" to our condensed consolidated financial statements for discussion of our derivative instruments.

## Property, plant and equipment, net

Property, plant and equipment, net consisted of the following at March 31, 2024 and December 31, 2023 (in thousands):

	March 31, 2024	December 31, 2023
Land	\$ 38,799	\$ 35,364
Buildings and improvements	1,042,307	1,037,421
Machinery and equipment	3,651,426	3,593,347
Office equipment and furniture	170,156	161,187
Leasehold improvements	40,322	40,084
Construction in progress	1,748,622	1,223,998
Property, plant and equipment, gross	6,691,632	6,091,401
Accumulated depreciation	(1,775,946)	(1,694,116)
Property, plant and equipment, net	<u>\$ 4,915,686</u>	<u>\$ 4,397,285</u>

Depreciation of property, plant and equipment was \$86.7 million and \$65.9 million for the three months ended March 31, 2024 and 2023, respectively.

## Other assets

Other assets consisted of the following at March 31, 2024 and December 31, 2023 (in thousands):

	March 31, 2024	December 31, 2023
Advance payments for raw materials	\$ 259,373	\$ 204,370
Lease assets (1)	99,114	101,468
Income tax receivables	68,591	68,591
Project assets	26,551	28,430
Prepaid expenses	23,917	23,954
Restricted cash equivalents	8,957	6,192
Restricted cash	3,633	3,621
Other (2)	45,615	41,978
Other assets	<u>\$ 535,751</u>	<u>\$ 478,604</u>

---

(1) See Note 7. "Leases" to our condensed consolidated financial statements for discussion of our lease arrangements.

- (2) In November 2023, First Solar entered into a power purchase agreement with Cleantech Solar (“Cleantech”), a leading provider of renewable energy solutions in India and Southeast Asia. Under the agreement, Cleantech plans to construct certain photovoltaic (“PV”) solar and wind generating assets, which are expected to supply electricity to our manufacturing facility in India.

In February 2024, we purchased an ownership interest in a subsidiary of Cleantech for \$3.0 million. This subsidiary owns certain of the generation assets that are expected to supply our facility, and we account for our investment in the subsidiary under the equity method of accounting.

During the three months ended March 31, 2024, we received advance payments of \$21.4 million from this subsidiary for future module sales and recognized \$6.1 million of revenue therefrom on module sales of 24 megawatts.

## Accrued expenses

Accrued expenses consisted of the following at March 31, 2024 and December 31, 2023 (in thousands):

	<b>March 31, 2024</b>	<b>December 31, 2023</b>
Accrued property, plant and equipment	\$ 308,432	\$ 210,233
Accrued freight	64,703	58,494
Accrued inventory	32,243	101,161
Accrued other taxes	31,868	26,781
Accrued compensation and benefits	19,935	55,960
Product warranty liability (1)	5,900	5,920
Accrued interest	4,312	11,011
Other	60,667	55,269
Accrued expenses	<u>\$ 528,060</u>	<u>\$ 524,829</u>

(1) See Note 10. "Commitments and Contingencies" to our condensed consolidated financial statements for discussion of our "Product Warranties."

## Other current liabilities

Other current liabilities consisted of the following at March 31, 2024 and December 31, 2023 (in thousands):

	<b>March 31, 2024</b>	<b>December 31, 2023</b>
Accrued litigation (1)	\$ 21,800	\$ 21,800
Lease liabilities (2)	10,523	10,358
Contingent consideration (3)	7,500	7,500
Derivative instruments (4)	1,600	1,744
Other	4,355	798
Other current liabilities	<u>\$ 45,778</u>	<u>\$ 42,200</u>

(1) See Note 10. "Commitments and Contingencies" to our condensed consolidated financial statements for discussion of our legal proceedings.

(2) See Note 7. "Leases" to our condensed consolidated financial statements for discussion of our lease arrangements.

- (3) See Note 10. "Commitments and Contingencies" to our condensed consolidated financial statements for discussion of our contingent consideration arrangements.
- (4) See Note 6. "Derivative Financial Instruments" to our condensed consolidated financial statements for discussion of our derivative instruments.

## Other liabilities

Other liabilities consisted of the following at March 31, 2024 and December 31, 2023 (in thousands):

	March 31, 2024	December 31, 2023
Lease liabilities (1)	\$ 51,400	\$ 53,725
Deferred tax liabilities, net	41,288	42,771
Other taxes payable	34,775	39,431
Product warranty liability (2)	19,294	19,571
Contingent consideration (3)	11,000	11,000
Other	13,242	14,212
Other liabilities	<u>\$ 170,999</u>	<u>\$ 180,710</u>

(1) See Note 7. "Leases" to our condensed consolidated financial statements for discussion of our lease arrangements.

(2) See Note 10. "Commitments and Contingencies" to our condensed consolidated financial statements for discussion of our "Product Warranties."

(3) See Note 10. "Commitments and Contingencies" to our condensed consolidated financial statements for discussion of our contingent consideration arrangements.

## 5. Government Grants

Government grants represent benefits provided by federal, state, or local governments that are not subject to the scope of Accounting Standards Codification ("ASC") 740. We recognize a grant when we have reasonable assurance that we will comply with the grant's conditions and that the grant will be received. Government grants whose primary condition is the purchase, construction, or acquisition of a long-lived asset are considered asset-based grants and are recognized as a reduction to such asset's cost-basis, which reduces future depreciation. Other government grants not related to long-lived assets are considered income-based grants, which are recognized as a reduction to the related cost of activities that generated the benefit.

The following table presents the benefits recognized from asset-based government grants in our condensed consolidated balance sheets as of March 31, 2024 and December 31, 2023 (in thousands):

Balance Sheet Line Item	March 31,	December
	2024	31, 2023
Property, plant and equipment, net	\$ 148,906	\$ 146,348
Other assets	5,848	5,860

In February 2021, the state government of Tamil Nadu, India granted First Solar certain incentives associated with the construction of our first manufacturing facility in the country. Among other things, such incentives provide a 24% subsidy for eligible capital investments, contingent upon meeting certain minimum investment and employment commitments. The capital subsidy funding application process begins in the fiscal year following the initial period of module production and is expected to be paid in six annual installments thereafter. The timing of cash receipts is subject to the completion of audit certifications, funding applications by First Solar, and review by state government authorities. Module production in India began during the year ended December 31, 2023. We expect to submit initial funding applications in the second half of 2024. Such credit is reflected on our condensed consolidated balance sheets within "Government grants receivable."

## [Table of Contents](#)

The following table presents the benefits recognized from income-based government grants in our condensed consolidated statements of operations for the three months ended March 31, 2024 and 2023 (in thousands):

Income Statement Line Item	Three Months Ended March 31,	
	2024	2023
Cost of sales	\$ 194,427	\$ 70,114
Research and development	4,000	—

In August 2022, the U.S. President signed into law the Inflation Reduction Act of 2022 (“IRA”). Among other things, the IRA offers a tax credit, pursuant to Section 45X of the Internal Revenue Code (“IRC”), for solar modules and solar module components manufactured in the United States and sold to third parties. Such credit may be refundable by the Internal Revenue Service (“IRS”) or transferable to a third party and is available from 2023 to 2032, subject to phase down beginning in 2030. For eligible components, the credit is equal to (i) \$12 per square meter for a PV wafer, (ii) 4 cents multiplied by the capacity of a PV cell, and (iii) 7 cents multiplied by the capacity of a PV module. Based on the current form factor of our modules, we expect to qualify for a credit of approximately 17 cents per watt for each module produced in the United States and sold to a third party. We recognize such credit as a reduction to “Cost of sales” in the period the modules are sold to customers. Such credit is also reflected on our condensed consolidated balance sheets within “Government grants receivable.”

In December 2023, we entered into an agreement with Fiserv, Inc. (“Fiserv”) for the sale of \$687.2 million of Section 45X tax credits we generated during 2023 for aggregate cash proceeds of \$659.7 million. We received initial cash proceeds of \$480.0 million during the three months ended March 31, 2024 and received the remaining cash proceeds of \$179.7 million in April 2024.

## 6. Derivative Financial Instruments

As a global company, we are exposed in the normal course of business to various risks, including foreign currency and commodity price risks, that could affect our financial position, results of operations, and cash flows. We may use derivative instruments to hedge against these risks and only hold such instruments for hedging purposes, not for speculative or trading purposes.

Depending on the terms of the specific derivative instruments and market conditions, some of our derivative instruments may be assets and others liabilities at any particular balance sheet date. We report all of our derivative instruments at fair value and account for changes in the fair value of derivative instruments within “Accumulated other comprehensive loss” if the derivative instruments qualify for hedge accounting. For those derivative instruments that do not qualify for hedge accounting (i.e., “economic hedges”), we record the changes in fair value directly to earnings. See Note 8. “Fair Value Measurements” to our condensed

consolidated financial statements for information about the techniques we use to measure the fair value of our derivative instruments.

[Table of Contents](#)

The following tables present the fair values of derivative instruments included in our condensed consolidated balance sheets as of March 31, 2024 and December 31, 2023 (in thousands):

	<b>March 31, 2024</b>	
	<b>Other Current Assets</b>	<b>Other Current Liabilities</b>
Derivatives designated as hedging instruments:		
Commodity swap contracts	\$ 223	\$ —
Total derivatives designated as hedging instruments	\$ 223	\$ —
Derivatives not designated as hedging instruments:		
Foreign exchange forward contracts	\$ 3,267	\$ 1,600
Total derivatives not designated as hedging instruments	\$ 3,267	\$ 1,600
Total derivative instruments	\$ 3,490	\$ 1,600
	<b>December 31, 2023</b>	
	<b>Other Current Assets</b>	<b>Other Current Liabilities</b>
Derivatives designated as hedging instruments:		
Commodity swap contracts	\$ —	\$ 344
Total derivatives designated as hedging instruments	\$ —	\$ 344
Derivatives not designated as hedging instruments:		
Foreign exchange forward contracts	\$ 1,778	\$ 1,400
Total derivatives not designated as hedging instruments	\$ 1,778	\$ 1,400
Total derivative instruments	\$ 1,778	\$ 1,744

The following table presents the pretax amounts related to derivative instruments designated as cash flow hedges affecting accumulated other comprehensive income (loss) and our condensed consolidated statements of operations for the three months ended March 31, 2024 and 2023 (in thousands):

	<b>Commodity Swap Contracts</b>
Balance as of December 31, 2023	\$ (1,493)
Amounts recognized in other comprehensive income (loss)	221
Amount reclassified to cost of sales	1,149
Balance as of March 31, 2024	<u>\$ (123)</u>
Balance as of December 31, 2022	\$ (7,242)
Amounts recognized in other comprehensive income (loss)	254
Amount reclassified to cost of sales	2,668
Balance as of March 31, 2023	<u>\$ (4,320)</u>

## [Table of Contents](#)

The following table presents the effect of derivative instruments not designated as hedges on our condensed consolidated statements of operations for the three months ended March 31, 2024 and 2023 (in thousands):

		<b>Amount of Loss Recognized in Income</b>	
		<b>Three Months Ended March 31,</b>	
	<b>Income Statement Line Item</b>	<b>2024</b>	<b>2023</b>
Foreign exchange forward contracts	Foreign currency loss, net	\$ (8,949)	\$ (4,683)

### **Foreign Currency Risk**

#### Transaction Exposure and Economic Hedging

Many of our subsidiaries have assets and liabilities (primarily cash, receivables, deferred taxes, payables, accrued expenses, lease liabilities, debt, and solar module collection and recycling liabilities) that are denominated in currencies other than the subsidiaries' functional currencies. Changes in the exchange rates between the functional currencies of our subsidiaries and the other currencies in which these assets and liabilities are denominated will create fluctuations in our reported condensed consolidated statements of operations. We may enter into foreign exchange forward contracts or other financial instruments to economically hedge assets and liabilities against the effects of currency exchange rate fluctuations. The gains and losses on such foreign exchange forward contracts will economically offset all or part of the transaction gains and losses that we recognize in earnings on the related foreign currency denominated assets and liabilities.

We also enter into foreign exchange forward contracts to economically hedge balance sheet and other exposures related to transactions between certain of our subsidiaries and transactions with third parties. Such contracts are considered economic hedges and do not qualify for hedge accounting. Accordingly, we recognize gains or losses from the fluctuations in foreign exchange rates and the fair value of these derivative contracts in "Foreign currency loss, net" on our condensed consolidated statements of operations.

As of March 31, 2024 and December 31, 2023, the notional values of our foreign exchange forward contracts that do not qualify for hedge accounting were as follows (notional amounts and U.S. dollar equivalents in millions):

Transaction	March 31, 2024		
	Currency	Notional Amount	USD Equivalent
Sell	Canadian dollar	CAD 4.2	\$3.1
Purchase	Euro	€162.7	\$175.5
Sell	Euro	€26.8	\$28.9
Sell	Indian rupee	INR 67,848.1	\$814.0
Purchase	Japanese yen	¥1,340.0	\$8.9
Sell	Japanese yen	¥1,272.6	\$8.4
Purchase	Malaysian ringgit	MYR 219.0	\$46.3
Sell	Malaysian ringgit	MYR 62.5	\$13.2
Sell	Mexican peso	MXN 34.6	\$2.1
Purchase	Singapore dollar	SGD 25.8	\$19.1

[Table of Contents](#)

Transaction	December 31, 2023		
	Currency	Notional Amount	USD Equivalent
Sell	Canadian dollar	CAD 4.2	\$3.2
Sell	Chilean peso	CLP 1,372.6	\$1.6
Purchase	Euro	€98.3	\$108.7
Sell	Euro	€14.1	\$15.6
Sell	Indian rupee	INR 62,967.4	\$756.9
Purchase	Japanese yen	¥1,053.6	\$7.5
Sell	Japanese yen	¥705.2	\$5.0
Purchase	Malaysian ringgit	MYR 160.7	\$35.0
Sell	Mexican peso	MXN 34.6	\$2.0
Purchase	Singapore dollar	SGD 6.5	\$4.9

## Commodity Price Risk

From time to time, we use commodity swap contracts to mitigate our exposure to commodity price fluctuations for certain raw materials used in the production of our modules. During the year ended December 31, 2022, we entered into various commodity swap contracts to hedge a portion of our forecasted cash flows for purchases of aluminum frames between July 2022 and December 2023. Such swaps had an aggregate initial notional value based on metric tons of forecasted aluminum purchases, equivalent to \$70.5 million, and entitled us to receive a three-month average London Metals Exchange price for aluminum while requiring us to pay certain fixed prices. The notional amount of the commodity swap contracts proportionately adjusted with forecasted purchases of aluminum frames.

During the three months ended March 31, 2024, we entered into various commodity swap contracts to hedge a portion of our forecasted cash flows for purchases of steel between April 2024 and December 2024. Such swaps had an aggregate initial notional value based on short tons of forecasted steel purchases, equivalent to \$7.6 million, and entitle us to receive the price based on the U.S. Midwest Hot-Rolled Coil Steel Index while requiring us to pay certain fixed prices. The notional amount of the commodity swap contracts proportionately adjusts with forecasted purchases of steel. As of March 31, 2024, the notional value associated with these contracts was \$5.9 million.

These commodity swap contracts qualify for accounting as cash flow hedges in accordance with ASC 815, and we designated them as such. We report unrealized gains or losses on such contracts in “Accumulated other comprehensive loss” and subsequently reclassify applicable amounts into earnings when the hedged transactions occur and impact earnings. We determined that these derivative financial instruments were highly effective as cash flow hedges as of March 31, 2024 and December 31, 2023. In the following 12 months, we expect to reclassify into earnings \$0.1 million of net unrealized losses related to these commodity swap contracts that are included in “Accumulated other comprehensive loss” at March 31, 2024 as we realize the earnings effects of the related forecasted transactions.

## 7. Leases

Our lease arrangements include land associated with our corporate and administrative offices, land for our manufacturing facilities, and certain of our manufacturing equipment. Such leases primarily relate to assets located in the United States, Malaysia, India, and Vietnam.

The following table presents certain quantitative information related to our lease arrangements for the three months ended March 31, 2024 and 2023, and as of March 31, 2024 and December 31, 2023 (in thousands):

	Three Months Ended March 31,			
	2024	2023		
Finance lease cost:				
Amortization of right-of-use assets	\$ 116	\$ —		
Interest on lease liabilities	230	—		
Operating lease cost	3,221	2,937		
Variable lease cost	709	895		
Short-term lease cost	184	70		
Total lease cost	<u>\$ 4,460</u>	<u>\$ 3,902</u>		
Payments of amounts included in the measurement of:				
Operating lease liabilities	\$ 3,001	\$ 2,753		
Finance lease liabilities	46	—		
Lease assets obtained in exchange for operating lease liabilities	506	251		
	<b>March 31, 2024</b>		<b>December 31, 2023</b>	
	<b>Operating Leases</b>	<b>Finance Leases</b>	<b>Operating Leases</b>	<b>Finance Leases</b>
Lease assets	\$ 82,181	\$ 16,933	\$ 84,419	\$ 17,049
Lease liabilities – current	10,287	236	10,307	51
Lease liabilities – noncurrent	34,337	17,063	36,662	17,063
Weighted-average remaining lease term	5 years	40 years	5 years	40 years
Weighted-average discount rate	5.2 %	5.4 %	5.2 %	5.4 %

As of March 31, 2024, the future payments associated with our lease liabilities were as follows (in thousands):

	<b>Operating Leases</b>	<b>Finance Leases</b>
Remainder of 2024	\$ 9,075	\$ 113
2025	11,525	196
2026	9,857	1,014
2027	7,324	1,014
2028	6,957	1,016
2029	5,294	1,064
Thereafter	13	42,201
Total future payments	50,045	46,618
Less: interest	(5,421)	(29,319)
Total lease liabilities	<u>\$ 44,624</u>	<u>\$ 17,299</u>

## **8. Fair Value Measurements**

The following is a description of the valuation techniques that we use to measure the fair value of assets and liabilities that we measure and report at fair value on a recurring basis:

- **Cash Equivalents and Restricted Cash Equivalents.** At March 31, 2024 and December 31, 2023, our cash equivalents and restricted cash equivalents consisted of money market funds. We value our cash equivalents and restricted cash equivalents using observable inputs that reflect quoted prices for securities with identical characteristics and classify the valuation techniques that use these inputs as Level 1.
- **Marketable Securities and Restricted Marketable Securities.** At March 31, 2024 and December 31, 2023, our marketable securities consisted of foreign debt, U.S. debt, and time deposits, and our restricted marketable securities consisted of foreign and U.S. government obligations, supranational debt, and U.S. debt. We value our marketable securities and restricted marketable securities using observable inputs that reflect quoted prices for securities with identical characteristics or quoted prices for securities with similar characteristics and other observable inputs (such as interest rates that are observable at commonly quoted intervals). Accordingly, we classify the valuation techniques that use these inputs as either Level 1 or Level 2 depending on the inputs used. We also consider the effect of our counterparties' credit standing in these fair value measurements.
- **Derivative Assets and Liabilities.** At March 31, 2024 and December 31, 2023, our derivative assets and liabilities consisted of foreign exchange forward contracts involving major currencies and commodity swap contracts involving major commodity prices. Since our derivative assets and liabilities are not traded on an exchange, we value them using standard industry valuation models. As applicable, these models project future cash flows and discount the amounts to a present value using market-based observable inputs, including credit risk, foreign exchange rates, forward and spot prices for currencies, and forward prices for commodities. These inputs are observable in active markets over the contract term of the derivative instruments we hold, and accordingly, we classify the valuation techniques as Level 2. In evaluating credit risk, we consider the effect of our counterparties' and our own credit standing in the fair value measurements of our derivative assets and liabilities, respectively.

[Table of Contents](#)

At March 31, 2024 and December 31, 2023, the fair value measurements of our assets and liabilities measured on a recurring basis were as follows (in thousands):

		Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
March 31, 2024				
Assets:

## Fair Value of Financial Instruments

At March 31, 2024 and December 31, 2023, the carrying values and fair values of our financial instruments not measured at fair value were as follows (in thousands):

	March 31, 2024		December 31, 2023	
	Carrying Value	Fair Value	Carrying Value	Fair Value
<b>Assets:</b>				
Government grants receivable - noncurrent	\$ 347,845	\$ 310,688	\$ 152,208	\$ 107,111
<b>Liabilities:</b>				
Long-term debt (1)	\$ 500,000	\$ 456,132	\$ 500,000	\$ 453,015

(1) Excludes unamortized issuance costs and debt arrangements with an original maturity of less than one year.

The carrying values in our condensed consolidated balance sheets of our current trade accounts receivable, restricted cash, current government grants receivable, accounts payable, accrued expenses, and debt arrangements with an original maturity of less than one year approximated their fair values due to their nature and relatively short maturities; therefore, we excluded them from the foregoing table. The fair value measurements for our noncurrent government grants receivable and long-term debt are considered Level 2 measurements under the fair value hierarchy.

## Credit Risk

We have certain financial and derivative instruments that subject us to credit risk. These consist primarily of cash, cash equivalents, marketable securities, accounts receivable, restricted cash, restricted cash equivalents, restricted marketable securities, foreign exchange forward contracts, and commodity swap contracts. We are exposed to credit losses in the event of nonperformance by the counterparties to our financial and derivative instruments. We place these instruments with various high-quality financial institutions and limit the amount of credit risk from any one counterparty. We monitor the credit standing of our counterparty financial institutions. Our net sales are primarily concentrated among a limited number of customers. We monitor the financial condition of our customers and perform credit evaluations whenever considered necessary. We typically require some form of payment security from our customers, including, but not limited to, advance payments, parent guarantees, letters of credit, bank guarantees, or surety bonds.

## 9. Debt

Our debt arrangements consisted of the following at March 31, 2024 and December 31, 2023 (in thousands):

Loan Agreement	Currency	Balance (USD)	
		March 31, 2024	December 31, 2023
Revolving Credit Facility	USD	\$ —	\$ —
India Credit Facility	USD	500,000	500,000
India JPM Working Capital Facility	INR	60,705	60,827
India HSBC Working Capital Facility	INR	59,385	—
Total debt principal		620,090	560,827
Less: unamortized issuance costs		(488)	(521)
Total debt		619,602	560,306
Less: current portion		(200,907)	(96,238)
Noncurrent portion		\$ 418,695	\$ 464,068

### Revolving Credit Facility

In June 2023, we entered into a credit agreement with several financial institutions as lenders and JPMorgan Chase Bank, N.A. as administrative agent, which provides us with a senior secured credit facility (the “Revolving Credit Facility”) with an aggregate borrowing capacity of \$1.0 billion. Borrowings under the Revolving Credit Facility bear interest at a rate per annum equal to, at our option, (i) the Term Secured Overnight Financing Rate (“Term SOFR”), plus a credit spread of 0.10%, plus a margin that ranges from 1.25% to 2.25% or (ii) an alternate base rate as defined in the credit agreement, plus a margin that ranges from 0.25% to 1.25%. The margins under the Revolving Credit Facility are based on the Company’s net leverage ratio or, if the Company elects to switch to a credit ratings-based system after the investment grade ratings trigger date occurs (as defined in the credit agreement), the Company’s public debt rating.

In addition to paying interest on outstanding principal under the Revolving Credit Facility, we are required to pay an unused commitment fee that ranges from 0.125% to 0.375% per annum based on the same factors discussed above and the daily unused commitments under the facility. We are also required to pay (i) a letter of credit fee based on the applicable margin for Term SOFR loans on the face amount of each letter of credit, (ii) a letter of credit fronting fee as agreed by the Company and such issuing lender, and (iii) other customary letter of credit fees. Our Revolving Credit Facility matures in June 2028.

As of March 31, 2024 and December 31, 2023, we had no borrowings or letters of credit under our Revolving Credit Facility. Loans and letters of credit issued under the Revolving

Credit Facility are secured by liens on substantially all of the Company's tangible and intangible assets.

### **India Credit Facility**

In July 2022, FS India Solar Ventures Private Limited ("FSISV"), our indirect wholly-owned subsidiary, entered into a finance agreement (the "India Credit Facility") with the U.S. International Development Finance Corporation for aggregate borrowings of up to \$500.0 million for the development and construction of a solar module manufacturing facility in India. Principal on the India Credit Facility is payable in scheduled semi-annual installments beginning in the second half of 2024 through the facility's expected maturity in August 2029. The India Credit Facility is guaranteed by First Solar, Inc.

### India JPM Working Capital Facility

In December 2022, FSISV entered into a working capital facility agreement (the “India JPM Working Capital Facility”) with JPMorgan Chase Bank, N.A. for the issuance of bank guarantees, bonds, and other similar forms of security. During 2023, the India JPM Working Capital Facility was amended to include certain working capital loans of up to INR 6.2 billion (\$74.8 million). The outstanding balance matures during the second and third quarters of 2024. The India JPM Working Capital Facility is guaranteed by First Solar, Inc.

### India HSBC Working Capital Facility

In February 2024, FSISV entered into a working capital facility agreement (the “India HSBC Working Capital Facility”) with the Hongkong and Shanghai Banking Corporation Limited, which provides certain working capital loans of up to INR 8.2 billion (\$98.4 million). The outstanding balance matures in the third quarter of 2024. The India HSBC Working Capital Facility is guaranteed by First Solar, Inc.

### Interest Rates

As of March 31, 2024, the borrowing rates for our debt arrangements were as follows:

Loan Agreement	Interest Rate Description	Interest Rate
India Credit Facility	U.S. Treasury Constant Maturity Yield plus 1.75%	5.57%
India JPM Working Capital Facility (1)	India Treasury bill rate plus 2%	9.08%
India HSBC Working Capital Facility (1)	India Treasury bill rate plus 1.5% to 1.6%	8.44%

-----  
(1) The weighted-average interest rate for our outstanding short-term debt arrangements was 8.76% as of March 31, 2024.

### Future Principal Payments

At March 31, 2024, the future principal payments on our debt arrangements were due as follows (in thousands):

	<b>Total Debt</b>
Remainder of 2024	\$ 155,540
2025	90,900
2026	90,900
2027	90,950
2028	91,000
2029	100,800
Thereafter	—
Total debt future principal payments	<u>\$ 620,090</u>

## 10. Commitments and Contingencies

### Commercial Commitments

During the normal course of business, we enter into commercial commitments in the form of letters of credit and surety bonds to provide financial and performance assurance to third parties. As of March 31, 2024, the issued and outstanding amounts and available capacities under these commitments were as follows (in millions):

	<b>Issued and Outstanding</b>	<b>Available Capacity</b>
Revolving Credit Facility (1)	\$ —	\$ 250.0
Bilateral facilities (2)	188.3	116.7
Surety bonds	28.6	225.0

(1) Our Revolving Credit Facility provides us with a sub-limit of \$250.0 million to issue letters of credit, at a fee based on the applicable margin for Term SOFR loans, a fronting fee, and other customary letter of credit fees.

(2) Of the total letters of credit issued under the bilateral facilities, \$9.2 million was secured with cash.

### Product Warranties

When we recognize revenue for sales of modules, we accrue liabilities for the estimated future costs of meeting our limited warranty obligations. We estimate our limited product warranty liability for power output and defects in materials and workmanship under normal use and service conditions based on return rates for each series of module technology. We make and revise these estimates based primarily on the number of solar modules under warranty installed at customer locations, our historical experience with and projections of warranty claims, and our estimated per-module replacement costs. We also monitor our expected future module performance through certain quality and reliability testing and actual performance in certain field installation sites. From time to time, we have taken remediation actions with respect to affected modules beyond our limited warranties and may elect to do so in the future, in which case we would incur additional expenses. Such potential voluntary future remediation actions beyond our limited warranty obligations may be material to our condensed consolidated statements of operations if we commit to any such remediation actions.

Product warranty activities during the three months ended March 31, 2024 and 2023 were as follows (in thousands):

	Three Months Ended March 31,	
	2024	2023
Product warranty liability, beginning of period	\$ 25,491	\$ 33,787
Accruals for new warranties issued	1,397	994
Settlements	(2,192)	(1,326)
Changes in estimate of product warranty liability	498	(140)
Product warranty liability, end of period	<u>\$ 25,194</u>	<u>\$ 33,315</u>
Current portion of warranty liability	\$ 5,900	\$ 10,236
Noncurrent portion of warranty liability	\$ 19,294	\$ 23,079

## Indemnifications

In certain limited circumstances, we have provided indemnifications to customers or other parties under which we are contractually obligated to compensate such parties for losses they suffer resulting from a breach of a representation, warranty, or covenant; the resolution of specific matters associated with a project's development or construction; guarantees of a third party's payment or performance obligations; or any disallowance or lack of the right to claim all or any portion of certain tax credits. For contracts that have such indemnification provisions, we

## [Table of Contents](#)

initially recognize a liability under ASC 460 for the estimated premium that would be required by a guarantor to issue the same indemnity in a standalone arm's-length transaction with an unrelated party. We may base these estimates on the cost of insurance or other instruments that cover the underlying risks being indemnified and may purchase such instruments to mitigate our exposure to potential indemnification payments. We subsequently measure such liabilities at the greater of the initially estimated premium or the contingent liability required to be recognized under ASC 450. We recognize any indemnification liabilities as a reduction of earnings associated with the related transaction.

After an indemnification liability is recorded, we derecognize such amount pursuant to ASC 460 depending on the nature of the indemnity, which derecognition typically occurs upon expiration or settlement of the arrangement, and any contingent aspects of the indemnity are accounted for in accordance with ASC 450. As of March 31, 2024 and December 31, 2023, we accrued \$2.5 million and \$3.3 million of current indemnification liabilities, respectively. As of March 31, 2024, the maximum potential amount of future payments under our indemnifications was \$510.1 million.

### **Contingent Consideration**

As part of our acquisition of Evolar AB ("Evolar") in May 2023, we agreed to pay additional consideration of up to \$42.5 million to the selling shareholders contingent upon the successful achievement of certain technical milestones. As of March 31, 2024 and December 31, 2023, we recorded \$7.5 million of current liabilities and \$11.0 million of long-term liabilities for such contingent obligations based on their estimated fair values.

### **Solar Module Collection and Recycling Liability**

We previously established a module collection and recycling program, which has since been discontinued, to collect and recycle modules sold and covered under such program once the modules reach the end of their service lives. For legacy customer sales contracts that are covered under this program, we agreed to pay the costs for the collection and recycling of qualifying solar modules, and the end-users agreed to notify us, disassemble their solar power systems, package the solar modules for shipment, and revert ownership rights over the modules back to us at the end of the modules' service lives. Accordingly, we recorded any collection and recycling obligations within "Cost of sales" at the time of sale based on the estimated cost to collect and recycle the covered solar modules.

We estimate the cost of our collection and recycling obligations based on the present value of the expected future cost of collecting and recycling the solar modules, which includes estimates for the cost of packaging materials; the cost of freight from the solar module installation sites to a recycling center; material, labor, and capital costs; and by-product credits for certain materials recovered during the recycling process. We base these estimates on our experience collecting and recycling solar modules and certain assumptions regarding costs at the time the solar modules will be collected and recycled. In the periods between the time of sale and the related settlement of the collection and recycling obligation, we accrete the carrying amount of the associated liability and classify the corresponding expense within

“Selling, general and administrative” expense on our condensed consolidated statements of operations.

Our module collection and recycling liability was \$134.3 million and \$135.1 million as of March 31, 2024 and December 31, 2023, respectively. See Note 3. “Restricted Marketable Securities” to our condensed consolidated financial statements for more information about our arrangements for funding this liability.

### **Legal Proceedings**

In July 2021, Southern Power Company and certain of its affiliates (“Southern”) filed an arbitration demand with the American Arbitration Association against two subsidiaries of the Company, alleging breach of the engineering, procurement, and construction (“EPC”) agreements for five projects in the United States, for which the Company’s subsidiaries served as the EPC contractor. The arbitration demand asserts breach of obligations to design and

## [Table of Contents](#)

engineer the projects in accordance with the EPC agreements, particularly as such obligations relate to the procurement of tracker systems and inverters. The Company and its subsidiaries denied the claims, and defended the claims in arbitration hearings, which concluded in February 2023. In May 2023, the parties submitted their final proposals of individual award claims to the arbitration panel. In July 2023, the arbitration panel entered an interim award to Southern for \$35.6 million, which was paid during the year ended December 31, 2023. As a result, we recognized a loss for such interim award in our results of operations for the year ended December 31, 2023. The final arbitration award, which did not change the results of the interim award, was signed on November 6, 2023. On February 2, 2024, First Solar commenced an action in the New York County Supreme Court seeking to vacate certain aspects of the final award. As of April 29, 2024, the petition has been fully briefed, and we are awaiting a decision from the court.

During the year ended December 31, 2022, we received several indemnification demands from certain customers, for whom we provided EPC services, regarding claims that such customers' PV tracker systems infringe, in part, on patents owned by Rovshan Sade ("Sade"), the owner of a company called Trabant Solar, Inc. In January 2023, we were notified by two of our customers that Sade served them with patent infringement complaints, and we have assumed the defense of these claims. We have conducted due diligence on the patents and claims and believe that we will prevail in the actions. In April 2023, we commenced an Inter Partes Review ("IPR") before the United States Patent and Trademark Office seeking to invalidate such claims. On November 16, 2023, the United States Patent Trial and Appeal Board declined to hear the First Solar IPR. As a result, the stays in the court actions have been lifted and the litigation will proceed. On March 25, 2024, a new case management order was entered, aligning the schedules for all of the Sade cases. Substantive discovery has not yet commenced. Because we remain in early stages of the litigation, at this time we are not in a position to assess the likelihood of any potential loss or adverse effect on our financial condition or to estimate the amount or range of possible loss, if any, from these actions.

In April 2019, a subcontractor of First Solar sustained certain injuries while performing work at a former project site and, in May 2019, commenced legal action against a subsidiary of the Company. In June 2023, a jury awarded damages of approximately \$51.3 million to the plaintiff. On September 21, 2023, the Superior Court of California for Monterey County ruled, in response to a motion for remittitur filed by the Company, that the damages awarded to the plaintiff were excessive and reduced the award from \$51.3 million to \$21.8 million. The plaintiff and defendant have appealed and cross appealed varying aspects of the verdict and the remittitur. Accordingly, due to the uncertainty surrounding the multiple decisions and appeals, as of March 31, 2024, we recorded a \$21.8 million accrued litigation payable included in "Other current liabilities" in our condensed consolidated balance sheet. We believe the full amount of awarded damages will be covered by our various insurance policies. Accordingly, we also recorded a \$21.8 million receivable included in "Other current assets" in our condensed consolidated balance sheet as of March 31, 2024. The plaintiff did not accept the reduced award by the court ordered deadline of October 10, 2023, and, as a result, the \$21.8 million award has been vacated and a new trial will be scheduled. We, in conjunction with our insurance carriers, are challenging the initial verdict in an appellate court, and the plaintiff is cross appealing from the decision to reduce the award, among other

issues, stemming from the trial. The parties are awaiting a briefing schedule from the Appellate Court.

On September 29, 2023, the Company received a subpoena from the Division of Enforcement of the SEC seeking documents and information since 2019 relating to the Company's operations in India, the Company's entry into a PV module supply agreement with an India-based customer, and certain aspects of the Company's technology roadmap, among other things. The Company is cooperating with the SEC and cannot predict the ultimate timing, scope, or outcome of this matter.

We are party to other legal matters and claims in the normal course of our operations. While we believe the ultimate outcome of these matters and claims will not have a material adverse effect on our financial position, results of operations, or cash flows, the outcome of such matters and claims is not determinable with certainty, and negative outcomes may adversely affect us.

## 11. Revenue from Contracts with Customers

We recognize revenue for module sales at a point in time following the transfer of control of the modules to the customer, which typically occurs upon shipment or delivery depending on the terms of the underlying contracts. Such contracts may contain provisions that require us to make liquidated damage payments to the customer if we fail to ship or deliver modules by scheduled dates. For certain contracts, we may also be required to make liquidated damage payments if we fail to deliver modules that meet certain U.S. domestic content requirements. We recognize these liquidated damages as a reduction of revenue in the period we transfer control of the modules to the customer.

The following table reflects the changes in our contract liabilities, which we classify as “Deferred revenue,” for the three months ended March 31, 2024 (in thousands):

	<b>March 31, 2024</b>	<b>December 31, 2023</b>	<b>Three Month Change</b>	
Deferred revenue	\$ 2,068,082	\$ 2,005,183	\$ 62,899	3 %

During the three months ended March 31, 2024, our contract liabilities increased by \$62.9 million primarily due to advance payments received in the current year for future sales of solar modules, partially offset by the recognition of revenue for sales of solar modules for which payment was received in prior years. During the three months ended March 31, 2024 and 2023, we recognized revenue of \$126.3 million and \$90.4 million, respectively, that was included in the corresponding contract liability balance at the beginning of the periods.

As of March 31, 2024, we had entered into contracts with customers for the future sale of 78.3 GW of solar modules for an aggregate transaction price of \$23.4 billion, which we expect to recognize as revenue through 2030 as we transfer control of the modules to the customers. Such aggregate transaction price excludes estimates of variable consideration associated with (i) future module technology improvements, including enhancements to certain energy related attributes, (ii) sales freight in excess of defined thresholds, (iii) changes to certain commodity prices, and (iv) the module wattage committed for delivery, among other things. As a result, the revenue recognized from such contracts may increase or decrease in future periods relative to the original transaction price. These contracts may also be subject to amendments as agreed to by the parties to the contract. These amendments may increase or decrease the volume of modules to be sold under the contract, change delivery schedules, or otherwise adjust the expected revenue under these contracts.

See Note 16. “Segment Reporting” for the disaggregation of revenue by reportable segment.

## 12. Share-Based Compensation

The following table presents share-based compensation expense recognized in our condensed consolidated statements of operations for the three months ended March 31, 2024 and 2023 (in thousands):

	Three Months Ended March 31,	
	2024	2023
Cost of sales	\$ 1,027	\$ 926
Selling, general and administrative	4,869	4,782
Research and development	920	877
Production start-up	(25)	15
Total share-based compensation expense	<u>\$ 6,791</u>	<u>\$ 6,600</u>

As of March 31, 2024, we had \$52.0 million of unrecognized share-based compensation expense related to unvested restricted stock and performance units, which we expect to recognize over a weighted-average period of approximately 1.7 years.

In March 2020, the compensation committee of our board of directors approved grants of performance units (“PU” or “PUs”) for key executive officers to be earned over a multi-year performance period, which ended in December 2022. Vesting of the 2020 grants of PUs was contingent upon the relative attainment of target contracted revenue, module wattage, and return on capital metrics. In March 2023, the compensation committee certified the achievement of the vesting conditions applicable to the grants, which approximated the target level of performance. Accordingly, each participant received one share of common stock for each vested PU granted, net of any tax withholdings.

In May 2021, the compensation committee approved grants of PUs for key executive officers to be earned over a multi-year performance period, which ended in December 2023. Vesting of the 2021 grants of PUs was contingent upon the relative attainment of target contracted revenue, cost per watt, incremental average selling price, and operating income metrics. In February 2024, the compensation committee certified the achievement of the vesting conditions applicable to the grants, which approximated the maximum level of performance. Accordingly, each participant received one share of common stock for each vested PU granted, net of any tax withholdings.

In March 2022, the compensation committee approved additional grants of PUs for key executive officers. Such grants are expected to be earned over a multi-year performance period ending in December 2024. Vesting of the 2022 grants of PUs is contingent upon the relative attainment of target contracted revenue, cost per watt, and return on capital metrics.

In March 2023, the compensation committee approved additional grants of PUs for key executive officers. Such grants are expected to be earned over a multi-year performance

period ending in December 2025. Vesting of the 2023 grants of PUs is contingent upon the relative attainment of target contracted revenue, production, and operating margin metrics.

In March 2024, the compensation committee approved additional grants of PUs for key executive officers. Such grants are expected to be earned over a multi-year performance period ending in December 2026. Vesting of the 2024 grants of PUs is contingent upon the relative attainment of target contracted revenue, production, incremental average selling price, and operating margin metrics.

Vesting of PUs is also contingent upon the employment of program participants through the applicable vesting dates, with limited exceptions in case of death, disability, a qualifying retirement, or a change-in-control of First Solar. Outstanding PUs are included in the computation of diluted net income per share based on the number of shares that would be issuable if the end of the reporting period were the end of the contingency period.

### **13. Income Taxes**

The Inflation Reduction Act. In August 2022, the U.S. President signed into law the IRA, which revised U.S. tax law by, among other things, including a new corporate alternative minimum tax of 15% on certain large corporations, imposing a 1% excise tax on stock buybacks, and providing various incentives to address climate change, including the introduction of the advanced manufacturing production credit under Section 45X of the IRC. The provisions of the IRA are generally effective for tax years beginning after 2022. Certain developments to technical guidance and regulations include the following:

- In May 2023, the U.S. Treasury Department and the IRS issued initial guidance on the domestic content bonus credit under various sections of the IRC, including Section 45X.
- In December 2023, the U.S. Treasury Department and the IRS issued a notice of proposed rulemaking and public hearing providing initial guidance that confirms certain key aspects of the Section 45X credit.
- In March 2024, the U.S. Treasury Department and the IRS issued final regulations on the direct payment election under Section 6417 of the IRC. The final regulations apply to tax years ending on or after March 11, 2024 and mostly adopt and confirm the proposed regulations previously issued in June 2023.
- In April 2024, the U.S. Treasury Department and the IRS issued final regulations on the elective transfer provisions under Section 6418 of the IRC. The final regulations will apply 60 days after publication in the Federal Register and mostly adopt and confirm the proposed regulations previously issued in June 2023.

Given the complexities of the IRA, which is pending additional technical guidance and additional final regulations from the IRS and U.S. Treasury Department, we expect to continue to monitor these developments and evaluate the potential future impact to our results of operations.

Foreign tax credit regulations. In November 2022, the U.S. Treasury Department released proposed foreign tax credit (“FTC”) regulations addressing various aspects of the U.S. FTC regime. Among other items, these proposed regulations provide certain exceptions for determining creditable foreign withholding taxes. Taxpayers may rely on these proposed regulations, which apply to tax years beginning on or after December 28, 2021. As a result of these proposed regulations, foreign withholding taxes will continue to be creditable. In July 2023, the U.S. Treasury Department issued Notice 2023-55, which provides temporary relief for taxpayers in determining whether a foreign tax is eligible for a foreign tax credit for taxable years beginning on or after December 28, 2021, and ending before December 31, 2023. In December 2023, the U.S. Treasury Department issued Notice 2023-80, which extends this relief period until future guidance is issued.

Pillar Two. In December 2021, the Organization for Economic Co-operation and Development released model rules for a new global minimum tax framework (“Pillar Two”). Certain

governments in countries in which we operate have enacted local Pillar Two legislation, with an effective date from January 1, 2024. We currently do not expect Pillar Two to have a material impact on our 2024 financial statements. As these legislative changes develop and expand, we expect to continue to monitor these changes and evaluate the potential impact to our financial results.

Our effective tax rate was 7.4% and (19.3)% for the three months ended March 31, 2024 and 2023, respectively. The increase in our effective tax rate was primarily driven by the relative size of our pretax income in the prior period and higher prior period excess tax benefits associated with share-based compensation, partially offset by higher prior period losses in certain jurisdictions for which no tax benefit could be recorded. Our provision for income taxes differed from the amount computed by applying the U.S. statutory federal income tax rate of 21% primarily due to the effect of tax law changes associated with the IRA described above and excess tax benefits associated with share-based compensation.

## [Table of Contents](#)

Our Malaysian subsidiary has been granted a long-term tax holiday that expires in 2027. The tax holiday, which generally provides for a full exemption from Malaysian income tax, is conditional upon our continued compliance with certain employment and investment thresholds, which we are currently in compliance with and expect to continue to comply with through the expiration of the tax holiday in 2027.

Our Vietnamese subsidiary has been granted a long-term tax incentive that generally provides a full exemption from Vietnamese income tax through 2023, followed by reduced annual tax rates of 5% through 2032 and 10% through 2036. Such long-term tax incentive is conditional upon our continued compliance with certain revenue and research and development (“R&D”) spending thresholds, which we are currently in compliance with and expect to continue to comply with through the expiration of the tax holiday.

We are subject to audit by federal, state, local, and foreign tax authorities. We are currently under examination in India, Chile, Singapore, and Malaysia. We believe that adequate provisions have been made for any adjustments that may result from tax examinations. However, the outcome of tax examinations cannot be predicted with certainty. If any issues addressed by our tax examinations are not resolved in a manner consistent with our expectations, we could be required to adjust our provision for income taxes in the period such resolution occurs.

### **14. Net Income per Share**

The calculation of basic and diluted net income per share for the three months ended March 31, 2024 and 2023 was as follows (in thousands, except per share amounts):

		<b>Three Months Ended March 31,</b>	
		<b>2024</b>	<b>2023</b>
Basic net income per share			
Numerator:			
Net income		\$ 236,616	\$ 42,561
Denominator:			
Weighted-average common shares outstanding		106,910	106,675
Diluted net income per share			
Denominator:			
Weighted-average common shares outstanding		106,910	106,675
Effect of restricted stock and performance units		497	479
Weighted-average shares used in computing diluted net income per share		<u>107,407</u>	<u>107,154</u>
Net income per share:			
Basic		\$ 2.21	\$ 0.40
Diluted		\$ 2.20	\$ 0.40

The following table summarizes the potential shares of common stock that were excluded from the computation of diluted net income per share for the three months ended March 31, 2024 and 2023 as such shares would have had an anti-dilutive effect (in thousands):

		<b>Three Months Ended March 31,</b>	
		<b>2024</b>	<b>2023</b>
Anti-dilutive shares		17	11

## 15. Accumulated Other Comprehensive Loss

The following table presents the changes in accumulated other comprehensive loss, net of tax, for the three months ended March 31, 2024 (in thousands):

	Foreign Currency Translation Adjustment	Unrealized (Loss) Gain on Marketable Securities and Restricted Marketable Securities	Unrealized (Loss) Gain on Derivative Instruments	Total
Balance as of December 31, 2023	\$ (118,366)	\$ (54,610)	\$ (1,155)	\$ (174,131)
Other comprehensive (loss) income before reclassifications	(8,533)	(2,105)	221	(10,417)
Amounts reclassified from accumulated other comprehensive loss	—	—	1,149	1,149
Net tax effect	—	102	(308)	(206)
Net other comprehensive (loss) income	(8,533)	(2,003)	1,062	(9,474)
Balance as of March 31, 2024	<u>\$ (126,899)</u>	<u>\$ (56,613)</u>	<u>\$ (93)</u>	<u>\$ (183,605)</u>

The following table presents the pretax amounts reclassified from accumulated other comprehensive loss into our condensed consolidated statements of operations for the three months ended March 31, 2024 and 2023 (in thousands):

Comprehensive Income Components	Income Statement Line Item	Three Months Ended March 31,	
		2024	2023
Foreign currency translation adjustment:			
Foreign currency translation adjustment	Cost of sales	\$ —	\$ 146
Foreign currency translation adjustment	Other expense, net	—	(10)
Total foreign currency translation adjustment		—	136
Unrealized loss on derivative contracts:			
Commodity swap contracts	Cost of sales	(1,149)	(2,668)
Total loss reclassified		<u>\$ (1,149)</u>	<u>\$ (2,532)</u>

## 16. Segment Reporting

Our primary segment is our modules business, which involves the design, manufacture, and sale of cadmium telluride (“CdTe”) solar modules, which convert sunlight into electricity. Third-party customers of our modules segment include system developers, independent power producers, utilities, commercial and industrial companies, and other system owners and operators. Our residual business operations include certain project development activities, O&M services, the results of operations from PV solar power systems we owned and operated in certain international regions, and the sale of such systems to third-party customers.

See Note 21. “Segment and Geographical Information” in our Annual Report on Form 10-K for the year ended December 31, 2023 for additional discussion of our segment reporting.

The following tables provide a reconciliation of certain financial information for our reportable segment to information presented in our condensed consolidated financial statements for the three months ended March 31, 2024 and 2023 and as of March 31, 2024 and December 31, 2023 (in thousands):

	Three Months Ended March 31, 2024			Three Months Ended March 31, 2023		
	Modules	Other	Total	Modules	Other	Total

## **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

### **Cautionary Statement Regarding Forward-Looking Statements**

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the Securities Act of 1933, as amended (the "Securities Act"), which are subject to risks, uncertainties, and assumptions that are difficult to predict. All statements in this Quarterly Report on Form 10-Q, other than statements of historical fact, are forward-looking statements. These forward-looking statements are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The forward-looking statements include statements, among other things, concerning: effects resulting from certain module manufacturing changes; our business strategy, including anticipated trends and developments in and management plans for our business and the markets in which we operate; future financial results, operating results, module volumes produced, module volumes sold, revenues, gross margin, operating expenses, products, projected costs (including estimated future module collection and recycling costs), warranties, solar module technology and cost reduction roadmaps, restructuring, product reliability, investments, and capital expenditures; our ability to successfully integrate an acquired business; our ability to continue to reduce the cost per watt of our solar modules; the impact of public policies; the potential impact of legislation intended to encourage renewable energy investments through tax credits; our ability to expand manufacturing capacity worldwide, including our plans to construct new manufacturing facilities in the United States and related increases in manufacturing capacity; the impact of supply chain disruptions, which may affect the procurement of raw materials used in our manufacturing process and the distribution of our modules; R&D programs and our ability to improve the wattage of our solar modules; sales and marketing initiatives; and competition. In some cases, you can identify these statements by forward-looking words, such as "estimate," "expect," "anticipate," "project," "plan," "intend," "seek," "believe," "forecast," "foresee," "likely," "may," "should," "goal," "target," "might," "will," "could," "predict," "continue," "contingent," and the negative or plural of these words, and other comparable terminology.

Forward-looking statements are only predictions based on our current expectations and our projections about future events. All forward-looking statements included in this Quarterly Report on Form 10-Q are based upon information available to us as of the filing date of this Quarterly Report on Form 10-Q and therefore speak only as of the filing date. You should not place undue reliance on these forward-looking statements. We undertake no obligation to update any of these forward-looking statements for any reason, whether as a result of new information, future developments, or otherwise. These forward-looking statements involve known and unknown risks, uncertainties, and other factors that may cause our actual results, levels of activity, performance, or achievements to differ materially from those expressed or implied by these statements. These factors include, but are not limited to:

- structural imbalances in global supply and demand for PV solar modules;
- our competitive position and other key competitive factors;

- the reduction, elimination, or expiration of government subsidies, policies, and support programs for solar energy projects and other renewable energy projects;
- the impact of public policies, such as tariffs or other trade remedies imposed on solar cells and modules;
- the passage of legislation intended to encourage renewable energy investments through tax credits, such as the IRA;
- our ability to execute on our long-term strategic plans, including our ability to secure financing and realize the potential benefits of strategic acquisitions and investments;
- our ability to execute on our solar module technology and cost reduction roadmaps;

## [Table of Contents](#)

- our ability to incorporate technology improvements into our manufacturing process, including the implementation of our copper replacement program;
- our ability to avoid manufacturing interruptions, including during the ramp of our Series 7 modules manufacturing facilities;
- our ability to improve the wattage of our solar modules;
- interest rate fluctuations and our customers' ability to secure financing;
- the loss of any of our large customers, or the ability of our customers and counterparties to perform under their contracts with us;
- the severity and duration of public health threats, including the potential impact on the Company's business, financial condition, and results of operations;
- our ability to attract new customers and to develop and maintain existing customer and supplier relationships;
- our ability to construct new production facilities to support new product lines;
- general economic and business conditions, including those influenced by U.S., international, and geopolitical events;
- environmental responsibility, including with respect to CdTe and other semiconductor materials;
- evolving corporate governance and public disclosure regulations and expectations, including with respect to environmental, social, and governance matters;
- claims under our limited warranty obligations;
- changes in, or the failure to comply with, government regulations and environmental, health, and safety requirements;
- effects arising from and results of pending litigation;
- future collection and recycling costs for solar modules covered by our module collection and recycling program;
- supply chain disruptions, including demurrage and detention charges;
- our ability to protect our intellectual property;
- our ability to prevent and/or minimize the impact of cybersecurity incidents or information security breaches;

- our continued investment in R&D;
- the supply and price of components and raw materials, including CdTe;
- our ability to attract, train, retain and successfully integrate key talent into our team;  
and

## [Table of Contents](#)

- all other matters discussed in Item 1A. “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2023, elsewhere in this Quarterly Report on Form 10-Q, and our other reports filed with the SEC.

You should carefully consider the risks and uncertainties described in this section. The following discussion and analysis of our business, financial condition, and results of operations should be read in conjunction with our condensed consolidated financial statements and the related notes thereto included in this Quarterly Report on Form 10-Q.

### **Executive Overview**

We are a leading American solar technology company and global provider of PV solar energy solutions. Developed at our R&D labs in California and Ohio, we manufacture and sell PV solar modules with an advanced thin film semiconductor technology that provide a high-performance, lower-carbon alternative to conventional crystalline silicon PV solar modules. From raw material sourcing through end-of-life module recycling, we are committed to reducing the environmental impacts and enhancing the social and economic benefits of our products across their life cycle. We are the world’s largest thin film PV solar module manufacturer and the largest PV solar module manufacturer in the Western Hemisphere.

Certain of our financial results and other key operational developments for the three months ended March 31, 2024 include the following:

- Net sales for the three months ended March 31, 2024 increased by 45% to \$794.1 million compared to \$548.3 million for the same period in 2023. The increase was primarily driven by an increase in the volume of modules sold to third parties and an increase in the average selling price per watt of our modules.
- Gross profit as a percentage of net sales for the three months ended March 31, 2024 increased 23.2 percentage points to 43.6% from 20.4% for the same period in 2023. The increase in gross profit was primarily due to the recognition of the advanced manufacturing production credit under Section 45X of the IRC, reductions in sales freight costs, and a higher average selling price per watt for modules sold in the current period.
- As of March 31, 2024, our total installed nameplate production capacity across all our facilities was approximately 17.6 GW. During the three months ended March 31, 2024, we produced 3.6 GW and sold 2.7 GW of solar modules. During 2024, we expect to produce between 15.6 GW and 16.0 GW and sell between 15.6 GW and 16.3 GW of solar modules.
- In December 2023, we entered into an agreement with Fiserv for the sale of \$687.2 million of Section 45X tax credits we generated during 2023 for aggregate cash proceeds of \$659.7 million. We received initial cash proceeds of \$480.0 million during the three months ended March 31, 2024 and received the remaining cash proceeds of \$179.7 million in April 2024.

## **Market Overview**

Solar energy is one of the fastest growing forms of renewable energy with numerous economic and environmental benefits that make it an attractive complement to and/or substitute for traditional forms of energy generation. Over the past decade, the cost of producing electricity from PV solar power systems has decreased to levels that are competitive with or below the wholesale price of electricity in many markets. This price decline has opened new possibilities to develop systems in many locations with limited or no financial incentives, thereby promoting the widespread adoption of solar energy. Other technological developments in the industry, such as the advancement of energy storage capabilities, have further enhanced the prospects of solar energy as an alternative to traditional forms of energy generation. In addition to these economic benefits, solar energy has substantial environmental benefits. For example, PV solar power systems generate no greenhouse gas or other emissions and use minimal amounts of water compared to traditional energy generation assets. As a result of these and other factors, worldwide solar markets continue to develop and expand.

Recently enacted government support programs, such as the IRA, have contributed and are expected to continue to contribute to this momentum by providing solar module manufacturers, project developers, and project owners with certain subsidies and tax incentives to accelerate the ongoing transition to clean energy. Among other things, the IRA (i) reinstates the 30% investment tax credit for qualifying solar projects that meet certain wage and apprenticeship requirements, (ii) extends the production tax credit to include energy generated from solar projects, (iii) provides incremental investment and production tax credits for solar projects that meet certain domestic content and location requirements, and (iv) offers tax credits for solar modules and solar module components manufactured in the United States and sold to third parties.

Supply and demand. As a result of the market opportunities and increased demand described above, we are in the process of expanding our manufacturing capacity by approximately 7.6 GW, including the construction of our fourth and fifth manufacturing facilities in the United States, which are expected to commence operations in the second half of 2024 and late 2025, respectively; and the expansion of our manufacturing footprint at our existing facilities in Ohio, which is expected to be completed in the first half of 2024. We continue to evaluate opportunities for future expansion worldwide. In the aggregate, we believe manufacturers of solar cells and modules, particularly those in China, have significant installed production capacity, relative to global demand, and the ability for additional capacity expansion. Accordingly, we believe the solar industry may experience periods of structural imbalance between supply and demand, which could lead to periods of pricing volatility. In light of such market realities, we continue to focus on our strategies and points of differentiation, which include our advanced module technology, our manufacturing process and distributed manufacturing presence, our R&D capabilities, the sustainability advantage of our modules, and our financial stability.

Pricing competition. The solar industry has been characterized by intense pricing competition, both at the module and system levels. This competition may result in an environment in which pricing falls rapidly, which could potentially increase demand for solar

energy solutions but constrain the ability for project developers and module manufacturers to sustain meaningful and consistent profitability. Our results of operations could be adversely affected if competitors reduce pricing below their costs, bid aggressively low prices for module sale agreements, or are able to operate at minimal or negative operating margins for sustained periods of time. For certain of our competitors, including many in China, these practices may be enabled by their direct or indirect access to sovereign capital or other forms of state support. Although module average selling prices in many global markets have declined, near-term module pricing in the United States, our primary market, remains relatively stable due, in part, to the rising demand for domestically manufactured modules as a result of the IRA.

## [Table of Contents](#)

Diverse offerings. We face intense competition from manufacturers of crystalline silicon solar modules and other emerging technologies. Solar module manufacturers compete with one another on sales price per watt, which may be influenced by several module value attributes, including energy yield, wattage (through a larger form factor or an improved conversion efficiency), degradation, sustainability, and reliability. Sales price per watt may also be influenced by warranty terms, customer payment terms, and/or module content attributes. We believe that utility-scale solar will continue to be a compelling offering and will continue to represent an increasing portion of the overall electricity generation mix. However, this focus on utility-scale module offerings exists within a current market environment that includes rooftop and distributed generation solar, which may influence our future offerings.

We continue to devote significant resources to support the implementation of our technology roadmap and improve the energy output of our modules. In the course of our R&D activities, we explore various technologies in our efforts to sustain competitive differentiation of our modules. Such technologies include the development of bifacial modules, the implementation of our CuRe program, and ongoing research and development of multi-junction solar modules.

- **Bifacial.** While conventional solar modules are monofacial, meaning their ability to produce energy is a function of direct and diffuse irradiance on their front side, most module manufacturers offer bifacial modules that also capture diffuse irradiance on the back side of a module. Bifaciality compromises nameplate efficiency, but by converting both front and rear side irradiance, such technology may improve the overall energy production of a module relative to nameplate efficiency when applied in certain applications, which could potentially lower the overall levelized cost of electricity (“LCOE”) of a system when compared to systems using monofacial solar modules. We recently began commercial production of bifacial solar modules at certain of our manufacturing facilities in Ohio. Our bifacial module features an innovative transparent back contact which, in addition to converting both front and rear side irradiance, allows infrared light to pass through rather than be absorbed as heat. This design lowers the operational temperature of the module, resulting in a higher energy yield.
- **CuRe.** Our CuRe program is intended to improve our current semiconductor structure by replacing copper with certain other elements that are expected to enhance module performance by improving its bifaciality characteristics, improving its temperature coefficient, and improving its warranted degradation. As a result of these performance improvements, our PV solar modules are expected to produce more energy in real world operating conditions over their estimated useful lives than crystalline silicon modules with the same nameplate capacity. In September 2023 and January 2024, we established new world record CdTe research cell conversion efficiencies of 22.4% and 22.6%, respectively, which were based on our CuRe program and certified by the U.S. Department of Energy’s National Renewable Energy Laboratory. We currently expect to complete our lead line implementation of CuRe in the fourth quarter of 2024.
- **Multi-junction.** We continue to evaluate opportunities to develop and leverage other solar cell technologies in multi-junction applications that combine our thin film PV

technology with another high efficiency PV semiconductor, with each layer optimized for a different range of the solar spectrum. We believe such applications, which are expected to utilize at least one thin-film semiconductor, have the potential to significantly increase the efficiency of PV modules beyond the limits of traditional single-junction devices. Our acquisition of Evolar accelerates the development of high efficiency multi-junction devices by integrating Evolar's know-how with First Solar's existing R&D capabilities.

## [Table of Contents](#)

Product efficiencies. The efficiencies gained from the vertical integration of our manufacturing model and our continued ability to reduce costs allow us to compete favorably in markets where pricing for modules and systems is highly competitive. Our cost competitiveness is based in large part on our advanced thin film semiconductor technology, module wattage (or conversion efficiency), proprietary manufacturing process (which enables us to produce a CdTe module in a matter of hours using a continuous and highly automated industrial manufacturing process, as opposed to a batch process), and our focus on operational excellence. In addition, our CdTe modules use approximately 2% to 3% of the amount of semiconductor material that is used to manufacture conventional crystalline silicon solar modules. The cost of polysilicon is a significant driver of the manufacturing cost of crystalline silicon solar modules, and the timing and rate of change in the cost of silicon feedstock and polysilicon could lead to changes in solar module pricing levels. In recent years, polysilicon consumption per cell has been reduced through various initiatives, which have contributed to declines in our relative manufacturing cost competitiveness over conventional crystalline silicon module manufacturers.

Energy performance. In many climates our solar modules provide certain energy production advantages relative to competing crystalline silicon solar modules. For example, our CdTe solar technology provides:

- a superior temperature coefficient, which results in stronger system performance in typical high insolation climates as the majority of a system's generation, on average, occurs when module temperatures are well above 25°C (standard test conditions);
- a superior spectral response in humid environments where atmospheric moisture alters the solar spectrum relative to standard test conditions;
- a better partial shading response than competing crystalline silicon technologies, which may experience significantly lower energy generation than CdTe solar technologies when partial shading occurs; and
- an immunity to cell cracking and its resulting power output loss, a common failure often observed in crystalline silicon modules caused by poor manufacturing, handling, weather, or other conditions.

In addition to these technological advantages, we warrant that our solar modules will produce at least 98% of their labeled power output rating during the first year, with the warranty coverage reducing by a degradation factor between 0.3% and 0.5%, depending on the module series, every year thereafter throughout the limited power output warranty period of up to 30 years. As a result of these and other factors, our solar modules can produce more annual energy in real world operating conditions than conventional crystalline silicon modules with the same nameplate capacity.

While our modules are generally competitive in cost, reliability, and performance attributes, there can be no guarantee such competitiveness will continue to exist in the future to the same extent or at all. Any declines in the competitiveness of our products could result in further declines in the average selling prices of our modules and additional margin

compression. We continue to focus on enhancing the competitiveness of our solar modules through our module technology and cost reduction roadmaps.

## **Certain Trends and Uncertainties**

We believe that our business, financial condition, and results of operations may be favorably or unfavorably impacted by the following trends and uncertainties. See Item 1A. “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2023 for discussions of other risks (the “Risk Factors”) that may affect us.

Our business is evolving worldwide and is shaped by the varying ways in which our offerings can be compelling and economically viable solutions to energy needs in various markets. In addressing electricity demands, we are focused on providing utility-scale module offerings in key geographic markets that we believe have a significant need for mass-scale PV solar electricity, including markets throughout the United States, India, and Europe. We closely evaluate and monitor the appropriate level of resources required to support such markets and their associated sales opportunities. When deployed in utility-scale applications, our modules provide energy at a lower LCOE compared to traditional forms of energy generation, making them an attractive alternative to or replacement for aging fossil fuel-based generation resources. Accordingly, future retirements of aging energy generation resources represent a significant increase in the potential market for solar energy.

Demand for our PV solar module offerings depends, in part, on market factors outside our control. For example, many governments have proposed or enacted policies or support programs intended to encourage renewable energy investments to achieve decarbonization objectives and/or establish greater energy independence. While we compete in markets that do not require solar-specific government subsidies or support programs, our net sales and profits remain subject to variability based on the availability and size of government subsidies and economic incentives. Adverse changes in these factors could increase the cost of utility-scale systems, which could reduce demand for our solar modules. Recent developments to government support programs include the following:

- **United States.** In August 2022, the U.S. President signed the IRA into law, which is intended to accelerate the country’s ongoing transition to clean energy. Among other things, the financial incentives provided by the IRA have significantly increased demand for modules manufactured in the United States. Accordingly, the demand for these solar modules is expected to increase domestic manufacturing in the near term, which may result in localized supply chain constraints and periods of inflationary pricing for certain of our key raw materials. The financial incentives provided by the IRA have also increased demand for solar modules in general due to the incremental tax credit available for the qualified production of clean hydrogen that is powered by renewable resources. There are currently several critical and complex aspects of the IRA pending further technical guidance and final regulations from the IRS and the U.S. Treasury Department, which in 2023 released a notice of intent to issue proposed regulations for the domestic content bonus tax credit and notices of proposed rulemaking and temporary regulations for the direct payment election and the tax credit transfer election. This initial guidance is subject to revision prior to the publishing of final regulations by the IRS and U.S. Treasury Department. Given the complexities of the IRA, we continue to evaluate the extent of benefits available to us, which we expect will favorably impact our results of operations in future periods. For

example, we currently expect to qualify for the advanced manufacturing production credit under Section 45X of the IRC, which provides certain specified benefits for solar modules and solar module components manufactured in the United States and sold to third parties. See Note 5. “Government Grants” to our condensed consolidated financial statements for discussion of our expectation of the financial benefits available to us under the IRA.

## [Table of Contents](#)

- India. In March 2023, the government of India allocated financial incentives under the Production Linked Incentive (“PLI”) scheme to certain PV module manufacturers, including First Solar. The PLI scheme is expected to provide aggregate funding of INR 185 billion (\$2.3 billion), of which INR 11.8 billion (\$143 million) was allocated to First Solar, to promote the manufacturing of high efficiency solar modules in India and to reduce India’s dependency on foreign imports of solar modules. Under the PLI scheme, manufacturers were selected through a competitive bid process and may be entitled to receive certain cash incentives over a five-year period following the commissioning of their manufacturing facilities. Among other things, such incentives are subject to attaining certain minimum thresholds for module efficiency and temperature coefficient and require that a certain proportion of raw materials be sourced from the domestic market. Such conditions will be evaluated on a quarterly basis from 2026 through 2031. At this time, it is uncertain to what extent we may qualify for such incentives.

Demand for our solar energy solutions also depends on domestic or international trade policies and government regulations, which may be proposed, revised, and/or enacted across short- and long-term time horizons with varying degrees of impact to our net sales, profit, and manufacturing operations. Changes in these policies and regulations could adversely impact the competitive landscape of solar markets, which could reduce demand for our solar modules. Recent revisions or proposed changes to trade policy and government regulations include the following:

- United States. The United States currently imposes antidumping and countervailing duties (“AD/CVD”) on certain imported crystalline silicon PV cells and modules from China and Taiwan. Such AD/CVD can change over time pursuant to annual reviews conducted by the U.S. Department of Commerce (“USDOC”), and a decline in duty rates or the USDOC’s failure to fully enforce U.S. AD/CVD laws could have an adverse impact on our operating results. In August 2023, the USDOC issued final affirmative circumvention rulings, finding that solar panels completed in Cambodia, Malaysia, Thailand, and Vietnam using parts and components produced in China circumvent the pre-existing AD/CVD orders on China. Such duties are set to apply to circumventing imports on or after June 6, 2024, as well as any circumventing imports prior to that date in violation of certain requirements, including that they are imported, used, and installed by certain dates in 2024. Our operating results could be adversely impacted if the USDOC and other U.S. government agencies do not enforce the affirmative circumvention rulings as expected or if pending litigation challenges result in a modification of the rulings. Conversely, effective enforcement could positively impact our operating results.
- United States. In October 2023, a coalition of U.S. aluminum extruders and a labor union filed AD/CVD petitions with the USDOC related to aluminum extrusions from 15 countries. The USDOC has initiated investigations based on the petitions. First Solar imports certain items that appear to be within the scope of the investigations. Our operating results could be adversely impacted if the USDOC imposes duties on such imports. A preliminary determination related to the petitions is expected to be announced by the USDOC in early May 2024.

- United States. In April 2024, the American Alliance for Solar Manufacturing Trade Committee, which includes First Solar, filed a set of AD/CVD petitions with the U.S. International Trade Commission and the USDOC to impose duties on unfairly traded solar products from four countries in Southeast Asia. The investigations could potentially lead to the imposition of AD/CVD orders on such solar products.

## [Table of Contents](#)

- India. The Approved List of Module Manufacturers (“ALMM”) was introduced in 2021 as a non-tariff barrier to incentivize domestic manufacturing of PV modules by approving the list of models and manufacturers who can participate in certain solar development projects. The ALMM is approved by the Ministry of New and Renewable Energy, and any modifications to the ALMM and its application may affect future investments in solar module manufacturing in India. In April 2024, the government of India reimposed the ALMM, thereby requiring solar project developers to procure modules from companies included in the ALMM; as of April 2024, First Solar has been included in the ALMM with respect to our modules manufactured in India. Our operating results could be adversely impacted if the ALMM requirements are significantly relaxed to allow modules to be imported from countries that are part of the Association of Southeast Asian Nations. Also in April 2024, the ALMM was amended to include specific minimum module efficiency thresholds for CdTe solar technologies starting at 18% for solar lighting, 18.5% for rooftop applications, and 19% for utility-scale applications.

Our ability to provide solar modules on economically attractive terms is also affected by the availability and cost of logistics services associated with the procurement of raw materials or equipment used in our manufacturing process and the shipping, handling, storage, and distribution of our modules. To mitigate certain logistics costs, we employ module contract structures that provide additional consideration to us if the cost of logistics services, excluding demurrage and detention, exceeds defined thresholds. We may also adjust our shipping plans to include additional lead times for module deliveries and/or utilize our network of U.S. distribution centers. Additionally, our manufacturing capacity expansions in the U.S. and India are expected to bring manufacturing activities closer to customer demand, further mitigating our exposure to the cost of ocean freight.

We generally price and sell our solar modules on a per watt basis. As of March 31, 2024, we had entered into contracts with customers for the future sale of 78.3 GW of solar modules for an aggregate transaction price of \$23.4 billion, which we expect to recognize as revenue through 2030 as we transfer control of the modules to the customers. Such volume includes contracts for the sale of 40.2 GW of solar modules that include transaction price adjustments associated with future module technology improvements, including enhancements to certain energy related attributes. Based on these potential technology improvements, the contracted module volumes as of March 31, 2024, the expected timing such technology improvements are incorporated into our manufacturing process, and the expected timing of module deliveries, such adjustments, if realized, could result in additional revenue of up to \$0.5 billion, the majority of which would be recognized in 2025, 2026, and 2027. In addition to these price adjustments, certain of our contracts with customers may include favorable price adjustments associated with sales freight in excess of defined thresholds. Certain of our contracts with customers may also include favorable or unfavorable price adjustments associated with changes to certain commodity prices and/or the module wattage committed for delivery. As a result, the revenue recognized from such contracts may increase or decrease in future periods relative to the original transaction price.

We continue to increase the nameplate production capacity of our existing manufacturing facilities by improving our production throughput, increasing module wattage (or conversion

efficiency), and reducing manufacturing yield losses. Additionally, we are in the process of expanding our manufacturing capacity by approximately 7.6 GW, including the construction of our fourth and fifth manufacturing facilities in the United States, which are expected to commence operations in the second half of 2024 and late 2025, respectively; and the expansion of our manufacturing footprint at our existing facilities in Ohio, which is expected to be completed in the first half of 2024. This additional capacity, and any other potential investments to add to or otherwise modify our existing manufacturing capacity in response to market demand and competition, may require significant internal and possibly external sources of capital, and may be subject to certain risks and uncertainties described in Item 1A. “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2023.

[Table of Contents](#)

## Results of Operations

The following table sets forth our condensed consolidated statements of operations as a percentage of net sales for the three months ended March 31, 2024 and 2023:

	Three Months Ended March 31,	
	2024	2023
Net sales	100.0 %	100.0 %
Cost of sales	56.4 %	79.6 %
Gross profit	43.6 %	20.4 %
Selling, general and administrative	5.8 %	8.0 %
Research and development	5.4 %	5.6 %
Production start-up	1.9 %	3.6 %
Gain on sales of businesses, net	0.1 %	— %
Operating income	30.6 %	3.3 %
Foreign currency loss, net	(0.4)%	(1.1)%
Interest income	3.4 %	4.7 %
Interest expense, net	(1.2)%	(0.1)%
Other expense, net	(0.4)%	(0.3)%
Income tax (expense) benefit	(2.4)%	1.3 %
Net income	29.8 %	7.8 %

## Segment Overview

Our primary segment is our modules business, which involves the design, manufacture, and sale of CdTe solar modules, which convert sunlight into electricity. Third-party customers of our modules segment include system developers, independent power producers, utilities, commercial and industrial companies, and other system owners and operators. Our residual business operations include certain project development activities, O&M services, the results of operations from PV solar power systems we owned and operated in certain international regions, and the sale of such systems to third-party customers.

### Net sales

We generally price and sell our solar modules on a per watt basis. During the three months ended March 31, 2024, we sold the majority of our solar modules to developers and operators of systems in the United States, and substantially all of our modules business net sales were denominated in U.S. dollars. We recognize revenue for module sales at a point in time following the transfer of control of the modules to the customer, which typically occurs upon shipment or delivery depending on the terms of the underlying contracts. Net sales from our residual business operations primarily consists of revenue recognized for sales of

development projects or completed systems, including any modules installed in such systems and any revenue from energy generated by such systems.

The following table shows net sales by reportable segment for the three months ended March 31, 2024 and 2023:

(Dollars in thousands)	Three Months Ended March 31,		Three Month Change	
	2024	2023		
Modules	\$ 793,434	\$ 536,590	\$ 256,844	48 %
Other	674	11,696	(11,022)	(94)%
Net sales	<u>\$ 794,108</u>	<u>\$ 548,286</u>	<u>\$ 245,822</u>	<u>45 %</u>

## [Table of Contents](#)

Net sales from our modules segment increased \$256.8 million for the three months ended March 31, 2024 compared to the three months ended March 31, 2023 primarily due to a 39% increase in the volume of modules sold to third parties and an 6% increase in the average selling price per watt. Net sales from our residual business operations during the three months ended March 31, 2024 decreased \$11.0 million compared to the three months ended March 31, 2023 as operations from our residual business operations continue to wind down.

### Cost of sales

Our modules business cost of sales includes the cost of raw materials and components for manufacturing solar modules, such as glass, transparent conductive coatings, CdTe and other thin film semiconductors, laminate materials, connector assemblies, edge seal materials, and frames. In addition, our cost of sales includes direct labor for the manufacturing of solar modules and manufacturing overhead, such as engineering, equipment maintenance, quality and production control, and information technology. Our cost of sales also includes depreciation of manufacturing plant and equipment, facility-related expenses, environmental health and safety costs, and costs associated with shipping, warranties, and solar module collection and recycling (excluding accretion). Cost of sales for our residual business operations includes project-related costs, such as development costs (legal, consulting, transmission upgrade, interconnection, permitting, and other similar costs), EPC costs (consisting primarily of solar modules, inverters, electrical and mounting hardware, project management and engineering, and construction labor), and site-specific costs.

The following table shows cost of sales by reportable segment for the three months ended March 31, 2024 and 2023:

(Dollars in thousands)	Three Months Ended			
	March 31,			
	2024	2023	Three Month Change	
Modules	\$ 447,266	\$ 429,696	\$ 17,570	4 %
Other	839	6,539	(5,700)	(87)%
Cost of sales	<u>\$ 448,105</u>	<u>\$ 436,235</u>	<u>\$ 11,870</u>	<u>3 %</u>
% of net sales	56.4 %	79.6 %		

Cost of sales increased \$11.9 million, or 3%, and decreased 23.2 percentage points as a percent of net sales for the three months ended March 31, 2024 compared to the three months ended March 31, 2023. The increase in cost of sales was driven by a \$17.6 million increase in our modules segment cost of sales primarily due to (i) higher costs of \$147.9 million due to an increase in the volume of modules sold, partially offset by (ii) the recognition of the advanced manufacturing production credit under Section 45X of the IRC, which decreased cost of sales by \$124.3 million, and (iii) lower sales freight of \$28.4 million. The increase in cost of sales was partially offset by a \$5.7 million decrease in our residual business operations cost of sales as operations from our residual business operations continue to wind down.

## Gross profit

Gross profit may be affected by numerous factors, including the selling prices of our modules and the selling prices of projects and services included in our residual business operations, our manufacturing costs, the capacity utilization of our manufacturing facilities, and foreign exchange rates. Gross profit may also be affected by the mix of net sales from our modules business and residual business operations.

The following table shows gross profit for the three months ended March 31, 2024 and 2023:

(Dollars in thousands)	Three Months Ended			
	March 31,			
	2024	2023	Three Month Change	
Gross profit	\$ 346,003	\$ 112,051	\$ 233,952	209 %
% of net sales	43.6 %	20.4 %		

## [Table of Contents](#)

Gross profit as a percentage of net sales increased 23.2 percentage points to 43.6% during the three months ended March 31, 2024 from 20.4% during the three months ended March 31, 2023 primarily due to (i) the advanced manufacturing production credit described above, (ii) reductions in sales freight costs, and (iii) a higher average selling price per watt for modules sold in the current period.

### **Selling, general and administrative**

Selling, general and administrative expense consists primarily of salaries and other personnel-related costs, professional fees, insurance costs, and other business development and selling expenses.

The following table shows selling, general and administrative expense for the three months ended March 31, 2024 and 2023:

(Dollars in thousands)	Three Months Ended			
	March 31,			
	2024	2023	Three Month Change	
Selling, general and administrative	\$ 45,827	\$ 44,028	\$ 1,799	4 %
% of net sales	5.8 %	8.0 %		

Selling, general and administrative expense for the three months ended March 31, 2024 increased compared to the three months ended March 31, 2023, primarily due to higher costs associated with our implementation of a new global enterprise resource planning system.

### **Research and development**

Research and development expense consists primarily of salaries and other personnel-related costs; the cost of products, materials, and outside services used in our R&D activities; and depreciation and amortization expense associated with R&D specific facilities and equipment. We maintain a number of programs and activities to improve our technology and processes in order to enhance the performance and reduce the costs of our solar modules.

The following table shows research and development expense for the three months ended March 31, 2024 and 2023:

(Dollars in thousands)	Three Months Ended			
	March 31,			
	2024	2023	Three Month Change	
Research and development	\$ 42,742	\$ 30,510	\$ 12,232	40 %
% of net sales	5.4 %	5.6 %		

Research and development expense for the three months ended March 31, 2024 increased compared to the three months ended March 31, 2023 primarily due to higher material,

module, and other testing costs and higher employee compensation expense resulting from an increase in headcount.

### **Production start-up**

Production start-up expense consists of costs associated with operating a production line before it is qualified for commercial production, including the cost of raw materials for solar modules run through the production line during the qualification phase, employee compensation for individuals supporting production start-up activities, and applicable facility related costs. Production start-up expense also includes costs related to the selection of a new site and implementation costs for manufacturing process improvements to the extent we cannot capitalize these expenditures.

[Table of Contents](#)

The following table shows production start-up expense for the three months ended March 31, 2024 and 2023:

	Three Months Ended			
	March 31,			
(Dollars in thousands)	2024	2023	Three Month Change	
Production start-up	\$ 15,408	\$ 19,494	\$ (4,086)	(21)%
% of net sales	1.9 %	3.6 %		

During the three months ended March 31, 2024, we incurred production start-up expense primarily for our fourth manufacturing facility in the U.S., which is expected to commence operations in the second half of 2024. During the three months ended March 31, 2023, we incurred production start-up expense primarily for our first manufacturing facility in India and our third manufacturing facility in the U.S., both of which commenced operations during 2023.

### Foreign currency loss, net

Foreign currency loss, net consists of the net effect of gains and losses resulting from holding assets and liabilities and conducting transactions denominated in currencies other than our subsidiaries' functional currencies.

The following table shows foreign currency loss, net for the three months ended March 31, 2024 and 2023:

	Three Months Ended			
	March 31,			
(Dollars in thousands)	2024	2023	Three Month Change	
Foreign currency loss, net	\$ (2,858)	\$ (5,947)	\$ 3,089	(52)%

Foreign currency loss, net for the three months ended March 31, 2024 decreased compared to the three months ended March 31, 2023 primarily due to a benefit from differences between our economic hedge positions and the underlying currency exposures, partially offset by higher costs associated with hedging activities related to our subsidiaries in India.

### Interest income

Interest income is earned on our cash, cash equivalents, marketable securities, restricted cash, restricted cash equivalents, and restricted marketable securities. Interest income also includes interest earned from late customer payments.

The following table shows interest income for the three months ended March 31, 2024 and 2023:

(Dollars in thousands)	Three Months Ended March 31,		Three Month Change	
	2024	2023		
Interest income	\$ 27,245	\$ 25,822	\$ 1,423	6 %

Interest income for the three months ended March 31, 2024 increased compared to the three months ended March 31, 2023 primarily due to higher yields and balances of marketable securities, partially offset by lower holdings of cash and time deposits.

### **Interest expense, net**

Interest expense, net is primarily comprised of interest incurred on debt. We may capitalize interest expense to our property, plant and equipment when such costs qualify for interest capitalization, which reduces the amount of net interest expense reported in any given period.

## [Table of Contents](#)

The following table shows interest expense, net for the three months ended March 31, 2024 and 2023:

(Dollars in thousands)	Three Months Ended			
	March 31,			
	2024	2023	Three Month Change	
Interest expense, net	\$ (9,210)	\$ (748)	\$ (8,462)	>500 %

Interest expense, net for the three months ended March 31, 2024 increased compared to the three months ended March 31, 2023 primarily due to additional borrowing under various arrangements in India.

### **Other expense, net**

Other expense, net is primarily comprised of miscellaneous items and realized gains and losses on the sale of marketable securities and restricted marketable securities.

The following table shows other expense, net for the three months ended March 31, 2024 and 2023:

(Dollars in thousands)	Three Months Ended			
	March 31,			
	2024	2023	Three Month Change	
Other expense, net	\$ (2,799)	\$ (1,456)	\$ (1,343)	92 %

Other expense, net for the three months ended March 31, 2024 increased compared to the three months ended March 31, 2023 primarily due to commitment fees on the Company's Revolving Credit Facility.

### **Income tax (expense) benefit**

Income tax expense or benefit, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect our best estimate of current and future taxes to be paid. We are subject to income taxes in both the United States and numerous foreign jurisdictions in which we operate, principally Singapore, Malaysia, Vietnam, and India. Significant judgments and estimates are required to determine our consolidated income tax expense. The statutory federal corporate income tax rate in the United States is 21%, and the tax rates in Singapore, Malaysia, Vietnam, and India are 17%, 24%, 20%, and 17%, respectively. In Malaysia, we have been granted a long-term tax holiday, scheduled to expire in 2027, pursuant to which substantially all of our income earned in Malaysia is exempt from income tax, conditional upon our continued compliance with certain employment and investment thresholds. In Vietnam, we have been granted a long-term tax incentive, scheduled to expire at the end of 2036, pursuant to which income earned in Vietnam is subject to reduced annual tax rates, conditional upon our continued compliance with certain revenue and R&D spending thresholds.

The following table shows income tax (expense) benefit for the three months ended March 31, 2024 and 2023:

(Dollars in thousands)	Three Months Ended March 31,		Three Month Change	
	2024	2023		
Income tax (expense) benefit	\$ (18,903)	\$ 6,888	\$ (25,791)	374 %
Effective tax rate	7.4 %	(19.3)%		

Our tax rate is affected by the advanced manufacturing production credit under Section 45X and recurring items such as tax rates in foreign jurisdictions and the relative amounts of income we earn in those jurisdictions. The rate is also affected by discrete items that may occur in any given period but are not consistent from period to period.

Income tax expense increased \$25.8 million during the three months ended March 31, 2024 compared to the three months ended March 31, 2023 primarily due to higher pretax income in the current period and higher prior period excess tax benefits associated with share-based compensation.

## **Critical Accounting Policies and Estimates**

In preparing our condensed consolidated financial statements in conformity with U.S. GAAP, we make estimates and assumptions that affect the amounts of reported assets, liabilities, revenues, and expenses, as well as the disclosure of contingent liabilities. Some of our accounting policies require the application of significant judgment in the selection of the appropriate assumptions for making these estimates. By their nature, these judgments are subject to an inherent degree of uncertainty. We base our judgments and estimates on our historical experience, our forecasts, and other available information as appropriate. We believe the judgments and estimates involved in accrued solar module collection and recycling, product warranties, and government grants have the greatest potential impact on our condensed consolidated financial statements. The actual results experienced by us may differ materially and adversely from our estimates. To the extent there are material differences between our estimates and the actual results, our future results of operations will be affected. For a description of the accounting policies that require the most significant judgment and estimates in the preparation of our condensed consolidated financial statements, refer to our Annual Report on Form 10-K for the year ended December 31, 2023. There have been no material changes to our accounting policies during the three months ended March 31, 2024.

## **Recent Accounting Pronouncements**

In December 2023, the Financial Accounting Standards Board issued Accounting Standards Update (“ASU”) 2023-09, Income Taxes (Topic 740) — Improvements to Income Tax Disclosures, which requires greater disaggregation of an entity’s income tax disclosures. Among other things, ASU 2023-09 requires entities to disclose (i) specific categories in the effective tax rate reconciliation, (ii) pretax income or loss from continuing operations, separated between domestic and foreign jurisdictions, (iii) income tax expense or benefit from continuing operations, separated by federal, state, and foreign jurisdictions, and (iv) income taxes paid to federal, state, and foreign jurisdictions. ASU 2023-09 is effective for public companies for annual periods beginning after December 15, 2024; although early adoption is permitted, we do not expect to do so. We are currently evaluating the impact ASU 2023-09 will have on our consolidated financial statements and associated disclosures.

## **Liquidity and Capital Resources**

As of March 31, 2024, we believe that our cash, cash equivalents, marketable securities, cash flows from operating activities, and contracts with customers for the future sale of solar modules will be sufficient to meet our working capital and capital expenditure needs for at least the next 12 months. In addition, we have availability under our Revolving Credit Facility, under which we have made no borrowings as of March 31, 2024. As necessary, we also believe we will have adequate access to the capital markets. We monitor our working capital to ensure we have adequate liquidity, both domestically and internationally. We intend to maintain appropriate debt levels based upon cash flow expectations, our overall cost of capital, and expected cash requirements for operations, including near-term construction activities and purchases of manufacturing equipment for our newest manufacturing and R&D facilities in the United States. However, our ability to raise capital on terms commercially

acceptable to us could be constrained if there is insufficient lender or investor interest due to company-specific, industry-wide, or broader market concerns. Any incremental debt financings could result in increased debt service expenses and/or restrictive covenants, which could limit our ability to pursue our strategic plans.

## [Table of Contents](#)

As of March 31, 2024, we had \$2.0 billion in cash, cash equivalents, and marketable securities compared to \$2.1 billion as of December 31, 2023. This decrease was primarily driven by purchases of property, plant and equipment for our U.S. and Indian facilities, various operating expenditures, and certain advance payments of raw materials, partially offset by proceeds from borrowings under debt agreements and proceeds from the sale of Section 45X tax credits. As of March 31, 2024 and December 31, 2023, \$1.3 billion and \$1.2 billion of our cash, cash equivalents, and marketable securities, respectively, was held by our foreign subsidiaries and was primarily based in U.S. dollar denominated holdings. Our investment policy seeks to preserve our investment principal and maintain adequate liquidity to meet our cash flow requirements, while at the same time optimizing the return on our investments. Such policy applies to all invested funds, whether managed internally or externally. Pursuant to such policy, we place our investments with a diversified group of high-quality financial institutions and limit the concentration of such investments with any one counterparty. We place significant emphasis on the creditworthiness of financial institutions and assess the credit ratings and financial health of our counterparty financial institutions when making investment decisions.

We utilize a variety of tax planning and financing strategies in an effort to ensure that our worldwide cash is available in the locations in which it is needed. If certain international funds were needed for our operations in the United States, we may be required to accrue and pay certain U.S. and foreign taxes to repatriate such funds. We maintain the intent and ability to permanently reinvest our accumulated earnings outside the United States, with the exception of certain subsidiaries for which applicable income taxes have been recorded as of March 31, 2024, but we may choose to reevaluate this intent in one or more jurisdictions in the future. In addition, changes to foreign government banking regulations may restrict our ability to move funds among various jurisdictions under certain circumstances, which could negatively impact our access to capital, resulting in an adverse effect on our liquidity and capital resources.

Although we compete in markets that do not require solar-specific government subsidies or support programs, such incentives continue to influence the demand for PV solar energy around the world. For example, the financial incentives provided by the IRA are expected to increase both the demand for, and the domestic manufacturing of, solar modules in the United States. We continue to evaluate the extent of benefits available to us by the IRA, which are expected to favorably impact our liquidity and capital resources in future periods. For example, we currently expect to qualify for the advanced manufacturing production credit under Section 45X of the IRC, which provides certain specified benefits for solar modules and solar module components manufactured in the United States and sold to third parties. Such credit may be refundable by the IRS or transferable to a third party and is available from 2023 to 2032, subject to phase down beginning in 2030. Based on the current form factor of our modules, we expect to qualify for a credit of approximately 17 cents per watt for each module produced in the United States and sold to a third party. Accordingly, we expect the advanced manufacturing production credit will provide us with a significant source of funding throughout its 10-year period. In December 2023, we entered into an agreement with Fiserv for the sale of \$687.2 million of Section 45X tax credits we generated during 2023, for aggregate cash proceeds of \$659.7 million. We received cash proceeds of \$480.0 million during the three months ended March 31, 2024 and received the remaining

cash proceeds of \$179.7 million in April 2024. For more information about certain risks associated with the benefits available to us under the IRA, see Item 1A. “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2023. See Note 5. “Government Grants” to our condensed consolidated financial statements for further information about government grants.

## [Table of Contents](#)

As a result of various market opportunities and increased demand for our products, we commenced production of Series 7 modules at our third manufacturing facility in Ohio and our first manufacturing facility in India during 2023. We are in the process of expanding our manufacturing capacity by approximately 7.6 GW, including the construction of our fourth and fifth manufacturing facilities in the United States, which are expected to commence operations in the second half of 2024 and late 2025, respectively; and the expansion of our manufacturing footprint at our existing facilities in Ohio, which is expected to be completed in the first half of 2024. In aggregate, we currently expect our remaining investment in these U.S. facilities and upgrades to be approximately \$1.6 billion, which we expect to incur throughout 2024 and 2025. The capital expenditures necessary to expand our capacity may be financed, in part, by cash on hand, advance payments from customers for module sales in future periods, the advanced manufacturing production credit described above, and/or near-term bridge financing instruments.

In addition to the expansion plans described above, we continue to increase the nameplate production capacity of our existing manufacturing facilities by improving our production throughput, increasing module wattage (or conversion efficiency), and reducing manufacturing yield losses. We have a demonstrated history of innovation, continuous improvement, and manufacturing success driven by our significant investments in various R&D initiatives. We continue to invest significant financial resources in such initiatives, including the completion of a dedicated R&D facility in the United States to support the implementation of our technology roadmap. We expect such R&D facility to feature a high-tech pilot manufacturing line, allowing for the production of full-sized prototypes of thin film and multi-junction PV modules. Such R&D facility is expected to be completed in the first half of 2024. During 2024, we expect to spend between \$1.8 billion and \$2.0 billion for capital expenditures, including the new facilities mentioned above, and upgrades to machinery and equipment that we believe will further increase our module wattage and expand capacity and throughput at our manufacturing facilities. These capital investments, and any other potential investments to implement our technology roadmap, may require significant internal and possibly external sources of capital, and may be subject to certain risks and uncertainties described in Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2023.

We have also committed and expect to continue committing significant working capital to purchase various raw materials used in our module manufacturing process. Our failure to obtain raw materials and components that meet our quality, quantity, and cost requirements in a timely manner could interrupt or impair our ability to manufacture our solar modules or increase our manufacturing costs. Accordingly, we may enter into long-term supply agreements to mitigate potential risks related to the procurement of key raw materials and components, and such agreements may be noncancelable or cancelable with a significant penalty. For example, we have entered into long-term supply agreements for the purchase of certain specified minimum volumes of substrate glass and cover glass for our PV solar modules. We have the right to terminate certain of these agreements upon payment of specified termination penalties (which, in aggregate, are up to \$535 million as of March 31, 2024 and decline over the remaining supply periods). Additionally, for certain strategic suppliers, we have made, and may in the future be required to make, certain advance payments to secure the raw materials necessary for our module manufacturing.

We have also committed certain financial resources to fulfill our solar module collection and recycling obligations, and have established a trust under which these funds are put into custodial accounts with an established and reputable bank. As of March 31, 2024, such funds were comprised of restricted marketable securities of \$194.5 million and associated restricted cash and cash equivalents balances of \$9.0 million. As of March 31, 2024, our module collection and recycling liability was \$134.3 million. Trust funds may be disbursed for qualified module collection and recycling costs (including capital and facility related recycling costs), payments to customers for assuming collection and recycling obligations, and reimbursements of any overfunded amounts. Investments in the trust must meet certain investment quality criteria comparable to highly rated government or agency bonds. As necessary, we adjust the funded amounts for our estimated collection and recycling obligations based on the estimated costs of collecting and recycling covered modules, estimated rates of return on our restricted marketable securities, and an estimated solar module life of 25 years, less amounts already funded in prior years.

## [Table of Contents](#)

As of March 31, 2024, we had no off-balance sheet debt or similar obligations, other than financial assurance related instruments, which are not classified as debt. We do not guarantee any third-party debt. See Note 10. “Commitments and Contingencies” to our condensed consolidated financial statements for further information about our financial assurance related instruments.

### Cash Flows

The following table summarizes key cash flow activity for the three months ended March 31, 2024 and 2023 (in thousands):

	Three Months Ended March 31,	
	2024	2023
Net cash provided by (used in) operating activities	\$ 267,723	\$ (34,598)
Net cash used in investing activities	(568,628)	(645,227)
Net cash provided by financing activities	40,697	107,686
Effect of exchange rate changes on cash, cash equivalents, restricted cash, and restricted cash equivalents	(1,938)	1,495
Net decrease in cash, cash equivalents, restricted cash, and restricted cash equivalents	<u>\$ (262,146)</u>	<u>\$ (570,644)</u>

#### Operating Activities

The increase in net cash provided by operating activities was primarily driven by proceeds from sale of Section 45X credits and higher cash receipts from module sales in current period, partially offset by lower advance payments received for future module sales and increased payments made to suppliers in the current period.

#### Investing Activities

The decrease in net cash used in investing activities was primarily due to lower purchases of marketable securities in the current period, partially offset by higher purchases of property, plant and equipment in the current period for our U.S. and Indian facilities.

#### Financing Activities

The decrease in net cash provided by financing activities was primarily due to lower net borrowings under various debt agreements in the current period.

### Item 3. Quantitative and Qualitative Disclosures about Market Risk

There have been no material changes to the information previously provided under Item 7A. of our Annual Report on Form 10-K for the year ended December 31, 2023.

## **Item 4. Controls and Procedures**

### **Evaluation of Disclosure Controls and Procedures**

We carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our “disclosure controls and procedures” as defined in Exchange Act Rule 13a-15(e) and 15d-15(e). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of March 31, 2024 our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

### **Changes in Internal Control over Financial Reporting**

We also carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of our “internal control over financial reporting” as defined in Exchange Act Rule 13a-15(f) and 15d-15(f) to determine whether any changes in our internal control over financial reporting occurred during the three months ended March 31, 2024 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there were no such changes in our internal control over financial reporting that occurred during the three months ended March 31, 2024.

### **CEO and CFO Certifications**

We have attached as exhibits to this Quarterly Report on Form 10-Q the certifications of our Chief Executive Officer and Chief Financial Officer, which are required in accordance with the Exchange Act. We recommend that this Item 4. be read in conjunction with those certifications for a more complete understanding of the subject matter presented.

### **Limitations on the Effectiveness of Controls**

Control systems, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control systems’ objectives are being met. Further, the design of any system of controls must reflect the fact that there are resource constraints, and the benefits of all controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of error or mistake. Control systems can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals

under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

## PART II. OTHER INFORMATION

### Item 1. Legal Proceedings

See Note 10. “Commitments and Contingencies” under the heading “Legal Proceedings” of our condensed consolidated financial statements for legal proceedings and related matters.

### Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Item 1A. “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2023, which could materially affect our business, financial condition, results of operations, or cash flows. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently consider immaterial may also materially adversely affect our business, financial condition, results of operations, or cash flows. There have been no material changes in the risk factors contained in our Annual Report on Form 10-K.

### Item 5. Other Information

From time to time, our directors and officers may adopt plans for the purchase or sale of our securities. Such plans may be designed to satisfy the affirmative defense conditions of Rule 10b5-1 under the Exchange Act or may constitute non-Rule 10b5-1 trading arrangements (as defined in Item 408(c) of Regulation S-K). During the three months ended March 31, 2024, none of our officers or directors adopted or terminated non-Rule 10b5-1 trading arrangements. However, certain of our officers adopted Rule 10b5-1 trading plans for the sale of our securities. The following table provides certain terms of such plans:

Name	Position	Action	Adoption Date	Expiration Date	Aggregate Number of Securities to be Sold (1)
Alexander R. Bradley	Chief Financial Officer	Adoption	March 1, 2024	October 31, 2024	16,051
Michael Koralewski	Chief Supply Chain Officer	Adoption	March 1, 2024	February 28, 2025	6,022
Mark R. Widmar	Chief Executive Officer	Adoption	March 4, 2024	March 4, 2025	65,576
Jason Dymbort	General Counsel & Secretary	Adoption	March 5, 2024	March 5, 2025	2,308
Kuntal Kumar Verma	Chief Manufacturing Officer	Adoption	March 6, 2024	July 31, 2024	1,621
Patrick Buehler	Chief Product Officer	Adoption	March 6, 2024	January 31, 2025	9,587

- 
- (1) Represents the gross number of shares subject to the Rule 10b5-1(c) plan, excluding the potential effect of shares withheld for taxes. Amounts related to PUs are presented at their target amounts. The actual number of PUs that vest following the end of the applicable performance period, if any, will depend on the relative attainment of the performance metrics.
