**UNITED STATES SECURITIES AND EXCHANGE COMMISSION**  
**Washington, D.C. 20549**  
**FORM 10-Q**

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended **March 31, 2024**

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number	Exact name of registrants as specified in their charters, address of principal executive offices and registrants' telephone number	IRS Employer Identification Number
1-8841	<b>NEXTERA ENERGY, INC.</b>	59-2449419
	<b>FLORIDA POWER &amp; LIGHT</b>	
2-27612	<b>COMPANY</b>	59-0247775

700 Universe Boulevard  
Juno Beach, Florida 33408  
(561) 694-4000

State or other jurisdiction of incorporation or organization: Florida

Securities registered pursuant to Section 12(b) of the Act:

Registrants	Title of each class	Trading Symbol(s)	Name of each exchange on which registered
NextEra Energy, Inc.	Common Stock, \$0.01 Par Value	NEE	New York Stock Exchange
	6.926% Corporate Units	NEE.PRR	New York Stock Exchange
Florida Power & Light Company	None		

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) have been subject to such filing requirements for the past 90 days.

NextEra Energy, Inc. Yes ☒ No ☐

Florida Power & Light Company Yes ☒ No ☐

Indicate by check mark whether the registrants have submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months.

NextEra Energy, Inc. Yes ☒ No ☐

Florida Power & Light Company Yes ☒ No ☐

Indicate by check mark whether the registrants are a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company.

NextEra Energy, Inc. Large Accelerated Filer ☒ Accelerated Filer ☐ Non-Accelerated Filer ☐ Smaller Reporting Company ☐ Emerging Growth Company ☐

Florida Power & Light Company Large Accelerated Filer ☐ Accelerated Filer ☐ Non-Accelerated Filer ☒ Smaller Reporting Company ☐ Emerging Growth Company ☐

If an emerging growth company, indicate by check mark if the registrants have elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Securities Exchange Act of 1934. ☐

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes ☐ No ☒

Number of shares of NextEra Energy, Inc. common stock, \$0.01 par value, outstanding at March 31, 2024: 2,054,532,552

Number of shares of Florida Power & Light Company common stock, without par value, outstanding at March 31, 2024, all of which were held, beneficially and of record, by NextEra Energy, Inc.: 1,000

This combined Form 10-Q represents separate filings by NextEra Energy, Inc. and Florida Power & Light Company. Information contained herein relating to an individual registrant is filed by that registrant on its own behalf. Florida Power & Light Company makes no representations as to the information relating to NextEra Energy, Inc.'s other operations.

Florida Power & Light Company meets the conditions set forth in General Instruction H.(1)(a) and (b) of Form 10-Q and is therefore filing this Form with the reduced disclosure format.

---

## **DEFINITIONS**

Acronyms and defined terms used in the text include the following:

<b>Term</b>	<b>Meaning</b>
2021 rate agreement	December 2021 FPSC final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding
AFUDC	allowance for funds used during construction
AFUDC – equity	equity component of AFUDC
AOCI	accumulated other comprehensive income (loss)
CSCS agreement	amended and restated cash sweep and credit support agreement
Duane Arnold	Duane Arnold Energy Center
FERC	U.S. Federal Energy Regulatory Commission
Florida Southeast Connection	Florida Southeast Connection, LLC, a wholly owned NextEra Energy Resources subsidiary
FPL	Florida Power & Light Company
FPSC	Florida Public Service Commission
fuel clause	fuel and purchased power cost recovery clause, as established by the FPSC
GAAP	generally accepted accounting principles in the U.S.
ITC	investment tax credit
kWh	kilowatt-hour(s)
Management's Discussion	Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
MMBtu	One million British thermal units
MW	megawatt(s)
MWh	megawatt-hour(s)
NEE	NextEra Energy, Inc.
NEECH	NextEra Energy Capital Holdings, Inc.
NEER	an operating segment comprised of NextEra Energy Resources and NEET
NEET	NextEra Energy Transmission, LLC
NEP	NextEra Energy Partners, LP
NEP OpCo	NextEra Energy Operating Partners, LP, a subsidiary of NEP
net generation	net ownership interest in plant(s) generation
NextEra Energy Resources	NextEra Energy Resources, LLC
Note __	Note __ to condensed consolidated financial statements
NRC	U.S. Nuclear Regulatory Commission
O&M expenses	other operations and maintenance expenses in the condensed consolidated statements of income
OCI	other comprehensive income
OTC	over-the-counter
OTTI	other than temporary impairment or other than temporarily impaired
PTC	production tax credit
regulatory ROE	return on common equity as determined for regulatory purposes
renewable energy tax credits	production tax credits and investment tax credits collectively
RNG	renewable natural gas
Sabal Trail	Sabal Trail Transmission, LLC, an entity in which a NextEra Energy Resources' subsidiary has a 42.5% ownership interest
Seabrook	Seabrook Station
SEC	U.S. Securities and Exchange Commission
U.S.	United States of America

NEE, FPL, NEECH, NextEra Energy Resources and NEET each has subsidiaries and affiliates with names that may include NextEra Energy, FPL, NextEra Energy Resources, NextEra Energy Transmission, NextEra, FPL Group, FPL Energy, FPLE, NEP and similar references. For convenience and simplicity, in this report the terms NEE, FPL, NEECH, NextEra Energy Resources, NEET and NEER are sometimes used as abbreviated references to specific subsidiaries, affiliates or groups of subsidiaries or affiliates. The precise meaning depends on the context.

## **FORWARD-LOOKING STATEMENTS**

This report includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions, strategies, future events or performance (often, but not always, through the use of words or phrases such as may result, are expected to, will continue, is anticipated, believe, will, could, should, would, estimated, may, plan, potential, future, projection, goals, target, outlook, predict and intend or words of similar meaning) are not statements of historical facts and may be forward looking. Forward-looking statements involve estimates, assumptions and uncertainties. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors (in addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements) that could have a significant impact on NEE's and/or FPL's operations and financial results, and could cause NEE's and/or FPL's actual results to differ materially from those contained or implied in forward-looking statements made by or on behalf of NEE and/or FPL in this combined Form 10-Q, in presentations, on their respective websites, in response to questions or otherwise.

### **Regulatory, Legislative and Legal Risks**

- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected by the extensive regulation of their business.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if they are unable to recover in a timely manner any significant amount of costs, a return on certain assets or a reasonable return on invested capital through base rates, cost recovery clauses, other regulatory mechanisms or otherwise.
- Regulatory decisions that are important to NEE and FPL may be materially adversely affected by political, regulatory, operational and economic factors.
- Any reductions or modifications to, or the elimination of, governmental incentives or policies that support utility scale renewable energy, including, but not limited to, tax laws, policies and incentives, renewable portfolio standards and feed-in-tariffs, or the imposition of additional taxes, tariffs, duties or other assessments on renewable energy or the equipment necessary to generate or deliver it, could result in, among other items, the lack of a satisfactory market for the development and/or financing of new renewable energy projects, NEE and FPL abandoning the development of renewable energy projects, a loss of investments in renewable energy projects and reduced project returns, any of which could have a material adverse effect on NEE and FPL's business, financial condition, results of operations and prospects.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected as a result of new or revised laws or regulations or interpretations of these laws and regulations.
- NEE and FPL are subject to numerous environmental laws, regulations and other standards that may result in capital expenditures, increased operating costs and various liabilities, and may require NEE and FPL to limit or eliminate certain operations.
- NEE's and FPL's business could be negatively affected by federal or state laws or regulations mandating new or additional limits on the production of greenhouse gas emissions.
- Extensive federal regulation of the operations and businesses of NEE and FPL exposes NEE and FPL to significant and increasing compliance costs and may also expose them to substantial monetary penalties and other sanctions for compliance failures.

- Changes in tax laws, guidance or policies, including but not limited to changes in corporate income tax rates, as well as judgments and estimates used in the determination of tax-related asset and liability amounts, could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.
- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected due to adverse results of litigation.
- Allegations of violations of law by FPL or NEE have the potential to result in fines, penalties, or other sanctions or effects, as well as cause reputational damage for FPL and NEE, and could hamper FPL's and NEE's effectiveness in interacting with governmental authorities.

### **Development and Operational Risks**

- NEE's and FPL's business, financial condition, results of operations and prospects could suffer if NEE and FPL do not proceed with projects under development or are unable to complete the construction of, or capital improvements to, electric generation, transmission and distribution facilities, gas infrastructure facilities or other facilities on schedule or within budget.
- NEE and FPL face risks related to project siting, financing, construction, permitting, governmental approvals and the negotiation of project development agreements that may impede their development and operating activities.
- The operation and maintenance of NEE's and FPL's electric generation, transmission and distribution facilities, gas infrastructure facilities and other facilities are subject to many operational risks, the consequences of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

- NEE's and FPL's business, financial condition, results of operations and prospects may be negatively affected by a lack of growth, slower growth or a decline in the number of customers or in customer usage.
- NEE's and FPL's business, financial condition, results of operations and prospects can be materially adversely affected by weather conditions and related impacts, including, but not limited to, the impact of severe weather.
- Threats of terrorism and catastrophic events that could result from geopolitical factors, terrorism, cyberattacks, or individuals and/or groups attempting to disrupt NEE's and FPL's business, or the businesses of third parties, may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.
- The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. NEE's and FPL's insurance coverage does not provide protection against all significant losses.
- NEE invests in gas and oil producing and transmission assets through NEER's gas infrastructure business. The gas infrastructure business is exposed to fluctuating market prices of natural gas, natural gas liquids, oil and other energy commodities. A prolonged period of low gas and oil prices could impact NEER's gas infrastructure business and cause NEER to delay or cancel certain gas infrastructure projects and could result in certain projects becoming impaired, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.
- If supply costs necessary to provide NEER's full energy and capacity requirement services are not favorable, operating costs could increase and materially adversely affect NEE's business, financial condition, results of operations and prospects.
- Due to the potential for significant volatility in market prices for fuel, electricity and renewable and other energy commodities, NEER's inability or failure to manage properly or hedge effectively the commodity risks within its portfolios could materially adversely affect NEE's business, financial condition, results of operations and prospects.
- Reductions in the liquidity of energy markets may restrict the ability of NEE to manage its operational risks, which, in turn, could negatively affect NEE's business, financial condition, results of operations and prospects.
- NEE's and FPL's hedging and trading procedures and associated risk management tools may not protect against significant losses.
- If price movements significantly or persistently deviate from historical behavior, NEE's and FPL's risk management tools associated with their hedging and trading procedures may not protect against significant losses.
- If power transmission or natural gas, nuclear fuel or other commodity transportation facilities are unavailable or disrupted, the ability for subsidiaries of NEE, including FPL, to sell and deliver power or natural gas may be limited.
- NEE and FPL are subject to credit and performance risk from customers, hedging counterparties and vendors.
- NEE and FPL could recognize financial losses or a reduction in operating cash flows if a counterparty fails to perform or make payments in accordance with the terms of derivative contracts or if NEE or FPL is required to post margin cash collateral under derivative contracts.

- NEE and FPL are highly dependent on sensitive and complex information technology systems, and any failure or breach of those systems could have a material adverse effect on their business, financial condition, results of operations and prospects.
- NEE's and FPL's retail businesses are subject to the risk that sensitive customer data may be compromised, which could result in a material adverse impact to their reputation and/or have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL.
- NEE and FPL could recognize financial losses as a result of volatility in the market values of derivative instruments and limited liquidity in OTC markets.
- NEE and FPL may be materially adversely affected by negative publicity.
- NEE's and FPL's business, financial condition, results of operations and prospects may be adversely affected if FPL is unable to maintain, negotiate or renegotiate franchise agreements on acceptable terms with municipalities and counties in Florida.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected by work strikes or stoppages and increasing personnel costs.
- NEE's ability to successfully identify, complete and integrate acquisitions is subject to significant risks, including, but not limited to, the effect of increased competition for acquisitions resulting from the consolidation of the energy industry.

### **Nuclear Generation Risks**

- The operation and maintenance of NEE's and FPL's nuclear generation facilities involve environmental, health and financial risks that could result in fines or the closure of the facilities and in increased costs and capital expenditures.
- In the event of an incident at any nuclear generation facility in the U.S. or at certain nuclear generation facilities in Europe, NEE and FPL could be assessed significant retrospective assessments and/or retrospective insurance premiums as a result of their participation in a secondary financial protection system and nuclear insurance mutual companies.

- NRC orders or new regulations related to increased security measures and any future safety requirements promulgated by the NRC could require NEE and FPL to incur substantial operating and capital expenditures at their nuclear generation facilities and/or result in reduced revenues.
- The inability to operate any of NEE's or FPL's nuclear generation units through the end of their respective operating licenses or planned license extensions could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.
- NEE's and FPL's nuclear units are periodically removed from service to accommodate planned refueling and maintenance outages, and for other purposes. If planned outages last longer than anticipated or if there are unplanned outages, NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected.

### **Liquidity, Capital Requirements and Common Stock Risks**

- Disruptions, uncertainty or volatility in the credit and capital markets, among other factors, may negatively affect NEE's and FPL's ability to fund their liquidity and capital needs and to meet their growth objectives, and can also materially adversely affect the business, financial condition, liquidity, results of operations and prospects of NEE and FPL.
- NEE's, NEECH's and FPL's inability to maintain their current credit ratings may materially adversely affect NEE's and FPL's liquidity and results of operations, limit the ability of NEE and FPL to grow their business, and increase interest costs.
- NEE's and FPL's liquidity may be impaired if their credit providers are unable to fund their credit commitments to the companies or to maintain their current credit ratings.
- Poor market performance and other economic factors could affect NEE's defined benefit pension plan's funded status, which may materially adversely affect NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.
- Poor market performance and other economic factors could adversely affect the asset values of NEE's and FPL's nuclear decommissioning funds, which may materially adversely affect NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.
- Certain of NEE's investments are subject to changes in market value and other risks, which may materially adversely affect NEE's liquidity, financial condition and results of operations.
- NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds to NEE.
- NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if NEE is required to perform under guarantees of obligations of its subsidiaries.
- NEP may not be able to access sources of capital on commercially reasonable terms, which would have a material adverse effect on its ability to consummate future acquisitions and on the value of NEE's limited partner interest in NEP OpCo.
- Disruptions, uncertainty or volatility in the credit and capital markets may exert downward pressure on the market price of NEE's common stock.
- Widespread public health crises and epidemics or pandemics may have material adverse impacts on NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

These factors should be read together with the risk factors included in Part I, Item 1A. Risk Factors in NEE's and FPL's Annual Report on Form 10-K for the year ended December 31, 2023 (2023 Form 10-K), and investors should refer to that section of the 2023 Form 10-K. Any forward-looking statement speaks only as of the date on which such statement is made, and NEE and FPL undertake no obligation to

update any forward-looking statement to reflect events or circumstances, including, but not limited to, unanticipated events, after the date on which such statement is made, unless otherwise required by law. New factors emerge from time to time and it is not possible for management to predict all of such factors, nor can it assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained or implied in any forward-looking statement.

**Website Access to SEC Filings.** NEE and FPL make their SEC filings, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, available free of charge on NEE's internet website, [www.nexteraenergy.com](http://www.nexteraenergy.com), as soon as reasonably practicable after those documents are electronically filed with or furnished to the SEC. The information and materials available on NEE's website (or any of its subsidiaries' or affiliates' websites) are not incorporated by reference into this combined Form 10-Q.

## PART I - FINANCIAL INFORMATION

### Item 1. Financial Statements

#### NEXTERA ENERGY, INC. CONDENSED CONSOLIDATED STATEMENTS OF INCOME (millions, except per share amounts) (unaudited)

	Three Months Ended March 31,	
	<b>2024</b>	2023
OPERATING REVENUES	<b>\$ 5,731</b>	\$ 6,716
OPERATING EXPENSES		
Fuel, purchased power and interchange	<b>1,206</b>	1,367
Other operations and maintenance	<b>1,123</b>	1,067

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**  
**(unaudited)**

The accompanying condensed consolidated financial statements should be read in conjunction with the 2023 Form 10-K. In the opinion of NEE and FPL management, all adjustments considered necessary for fair financial statement presentation have been made. All adjustments are normal and recurring unless otherwise noted. The results of operations for an interim period generally will not give a true indication of results for the year.

**1. Revenue from Contracts with Customers**

FPL and NEER generate substantially all of NEE's operating revenues, which primarily include revenues from contracts with customers, as well as derivative (see Note 2) and lease transactions at NEER. For the vast majority of contracts with customers, NEE believes that the obligation to deliver energy, capacity or transmission is satisfied over time as the customer simultaneously receives and consumes benefits as NEE performs. NEE's revenue from contracts with customers was approximately \$5.4 billion (\$3.8 billion at FPL) and \$5.7 billion (\$3.9 billion at FPL) for the three months ended March 31, 2024 and 2023, respectively. NEE's and FPL's receivables are primarily associated with revenues earned from contracts with customers, as well as derivative and lease transactions at NEER, and consist of both billed and unbilled amounts, which are recorded in customer receivables and other receivables on NEE's and FPL's condensed consolidated balance sheets. Receivables represent unconditional rights to consideration and reflect the differences in timing of revenue recognition and cash collections. For substantially all of NEE's and FPL's receivables, regardless of the type of revenue transaction from which the receivable originated, customer and counterparty credit risk is managed in the same manner and the terms and conditions of payment are similar.

FPL – FPL's revenues are derived primarily from tariff-based sales that result from providing electricity to retail customers in Florida with no defined contractual term. Electricity sales to retail customers account for approximately 90% of FPL's operating revenues, the majority of which are to residential customers. FPL's retail customers receive a bill monthly based on the amount of monthly kWh usage with payment due monthly. For these types of sales, FPL recognizes revenue as electricity is delivered and billed to customers, as well as an estimate for electricity delivered and not yet billed. The billed and unbilled amounts represent the value of electricity delivered to the customer. At March 31, 2024 and December 31, 2023, FPL's unbilled revenues amounted to approximately \$621 million and \$633 million, respectively, and are included in customer receivables on NEE's and FPL's condensed consolidated balance sheets. Certain contracts with customers contain a fixed price which primarily relate to certain power purchase agreements with maturity dates through 2041. As of March 31, 2024, FPL expects to record approximately \$375 million of revenues related to the fixed capacity price components of such contracts over the remaining terms of the related contracts as the capacity is provided. These contracts also contain a variable price component for energy usage which FPL recognizes as revenue as the energy is delivered based on rates stipulated in the respective contracts.

NEER – NEER's revenue from contracts with customers is derived primarily from the sale of energy commodities, electric capacity and electric transmission. For these types of sales, NEER recognizes revenue as energy commodities are delivered and as electric capacity and electric transmission are made available, consistent with the amounts billed to customers based on rates stipulated in the

respective contracts as well as an accrual for amounts earned but not yet billed. The amounts billed and accrued represent the value of energy or transmission delivered and/or the capacity of energy or transmission available to the customer. Revenues yet to be earned under these contracts, which have maturity dates ranging from 2024 to 2053, will vary based on the volume of energy or transmission delivered and/or available. NEER's customers typically receive bills monthly with payment due within 30 days. Certain contracts with customers contain a fixed price which primarily relate to electric capacity sales through 2038, certain power purchase agreements with maturity dates through 2034, and capacity sales associated with natural gas transportation through 2062. At March 31, 2024, NEER expects to record approximately \$1.2 billion of revenues related to the fixed price components of such contracts over the remaining terms of the related contracts as the capacity is provided. The power purchase agreements also contain a variable price component for energy usage which NEER recognizes as revenue as the energy is delivered based on rates stipulated in the respective contracts.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

**2. Derivative Instruments**

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the physical and financial risks inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and expected future debt issuances and borrowings, and to optimize the value of NEER's power generation and gas infrastructure assets. NEE and FPL do not utilize hedge accounting for their cash flow and fair value hedges.

With respect to commodities related to NEE's competitive energy business, NEER employs risk management procedures to conduct its activities related to optimizing the value of its power generation and gas infrastructure assets, providing full energy and capacity requirements services primarily to distribution utilities, and engaging in power and fuel marketing and trading activities to take advantage of expected future favorable price movements and changes in the expected volatility of prices in the energy markets. These risk management activities involve the use of derivative instruments executed within prescribed limits to manage the risk associated with fluctuating commodity prices. Transactions in derivative instruments are executed on recognized exchanges or via the OTC markets, depending on the most favorable credit terms and market execution factors. For NEER's power generation and gas infrastructure assets, derivative instruments are used to hedge all or a portion of the expected output of these assets. These hedges are designed to reduce the effect of adverse changes in the wholesale forward commodity markets associated with NEER's power generation and gas infrastructure assets. With regard to full energy and capacity requirements services, NEER is required to vary the quantity of energy and related services based on the load demands of the customers served. For this type of transaction, derivative instruments are used to hedge the anticipated electricity quantities required to serve these customers and reduce the effect of unfavorable changes in the forward energy markets. Additionally, NEER takes positions in energy markets based on differences between actual forward market levels and management's view of fundamental market conditions, including supply/demand imbalances, changes in traditional flows of energy, changes in short- and long-term weather patterns and anticipated regulatory and legislative outcomes. NEER uses derivative instruments to realize value from these market dislocations, subject to strict risk management limits around market, operational and credit exposure.

Derivative instruments, when required to be marked to market, are recorded on NEE's and FPL's condensed consolidated balance sheets as either an asset or liability measured at fair value. At FPL, substantially all changes in the derivatives' fair value are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. For NEE's non-rate regulated operations, predominantly NEER, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues and the equity method investees' related activity is recognized in equity in earnings (losses) of equity method investees in NEE's condensed consolidated statements of income. Settlement gains and losses are included within the line items in the condensed consolidated statements of income to which they relate. Transactions for which physical delivery is deemed not to have occurred are presented on a net basis in the condensed consolidated statements of income. For commodity derivatives, NEE believes that, where offsetting positions exist at the same location for the same time, the transactions are considered to have been netted and therefore physical delivery has been deemed not to have occurred for financial reporting purposes. Settlements related to derivative

instruments are substantially all recognized in net cash provided by operating activities in NEE's and FPL's condensed consolidated statements of cash flows.

For interest rate and foreign currency derivative instruments, all changes in the derivatives' fair value, as well as the transaction gain or loss on foreign denominated debt, are recognized in interest expense and the equity method investees' related activity is recognized in equity in earnings (losses) of equity method investees in NEE's condensed consolidated statements of income. At March 31, 2024, NEE's AOCI included immaterial amounts related to discontinued interest rate cash flow hedges with expiration dates through March 2035 and foreign currency cash flow hedges with expiration dates through September 2030.

**Fair Value Measurements of Derivative Instruments** – The fair value of assets and liabilities are determined using either unadjusted quoted prices in active markets (Level 1) or other pricing inputs that are observable (Level 2) whenever that information is available and using unobservable inputs (Level 3) to estimate fair value only when relevant observable inputs are not available. NEE and FPL use different valuation techniques to measure the fair value of assets and liabilities, relying primarily on the market approach of using prices and other market information for identical and/or similar assets and liabilities for those assets and liabilities that are measured at fair value on a recurring basis. NEE's and FPL's assessment of the significance of any particular input to the fair value measurement requires judgment and may affect placement within the fair value hierarchy levels. Non-performance risk, including the consideration of a credit valuation adjustment, is also considered in the determination of fair value for all assets and liabilities measured at fair value.

NEE and FPL measure the fair value of commodity contracts using a combination of market and income approaches utilizing prices observed on commodities exchanges and in the non-exchange traded markets, or through the use of industry-standard valuation techniques, such as option modeling or discounted cash flows techniques, incorporating both observable and unobservable valuation inputs. The resulting measurements are the best estimate of fair value as represented by the transfer of the asset or liability through an orderly transaction in the marketplace at the measurement date.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

Exchange-traded derivative assets and liabilities are valued using observable settlement prices from the exchanges and are classified as Level 1 or Level 2, depending on whether positions are in active or inactive markets.

NEE, through its subsidiaries, including FPL, also enters into non-exchange traded commodity derivatives. The majority of the valuation inputs are observable using exchange-quoted prices.

NEE, through NEER, also enters into full requirements contracts, which, in most cases, meet the definition of derivatives and are measured at fair value. These contracts typically have one or more inputs that are not observable and are significant to the valuation of the contract. In addition, certain non-exchange traded derivative options at NEE have one or more significant inputs that are not observable, and are valued using industry-standard option models.

In all cases where NEE and FPL use significant unobservable inputs for the valuation of a commodity contract, consideration is given to the assumptions that market participants would use in valuing the asset or liability. The primary input to the valuation models for commodity contracts is the forward commodity curve for the respective instruments. Other inputs include, but are not limited to, assumptions about market liquidity, volatility, correlation and contract duration as more fully described below in Significant Unobservable Inputs Used in Recurring Fair Value Measurements. In instances where the reference markets are deemed to be inactive or do not have transactions for a similar contract, the derivative assets and liabilities may be valued using significant other observable inputs and potentially significant unobservable inputs. In such instances, the valuation for these contracts is established using techniques including extrapolation from or interpolation between actively traded contracts, or estimated basis adjustments from liquid trading points. NEE and FPL regularly evaluate and validate the inputs used to determine fair value by a number of methods, consisting of various market price verification procedures, including the use of pricing services and broker quotes to support the market price of the various commodities. Where there are assumptions and models used to generate inputs for valuing derivative assets and liabilities, the review and verification of the assumptions and models are undertaken by individuals in an independent control function.

NEE uses interest rate contracts and foreign currency contracts to mitigate and adjust interest rate and foreign currency exchange exposure related primarily to certain outstanding and expected future debt issuances and borrowings when deemed appropriate based on market conditions or when required by financing agreements. NEE estimates the fair value of these derivatives using an income approach based on a discounted cash flows valuation technique utilizing the net amount of estimated future cash inflows and outflows related to the agreements.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

The tables below present NEE's and FPL's gross derivative positions at March 31, 2024 and December 31, 2023, as required by disclosure rules. However, the majority of the underlying contracts are subject to master netting agreements and generally would not be contractually settled on a gross basis. Therefore, the tables below also present the derivative positions on a net basis, which reflect the offsetting of positions of certain transactions within the portfolio, the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral, as well as the location of the net derivative position on the condensed consolidated balance sheets.

(a) Includes the effect of the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral payments and receipts. NEE and FPL also have contract settlement receivable and payable balances that are subject

to the master netting arrangements but are not offset within the condensed consolidated balance sheets and are recorded in customer receivables – net and accounts payable, respectively.

- (b) Reflects the netting of approximately \$148 million in margin cash collateral received from counterparties.
- (c) Reflects the netting of approximately \$307 million in margin cash collateral received from counterparties.
- (d) Reflects the netting of approximately \$815 million in margin cash collateral paid to counterparties.

At March 31, 2024 and December 31, 2023, NEE had approximately \$29 million (none at FPL) and \$78 million (\$3 million at FPL), respectively, in margin cash collateral received from counterparties that was not offset against derivative assets in the above presentation. These amounts are included in current other liabilities on NEE's condensed consolidated balance sheets. Additionally, at March 31, 2024 and December 31, 2023, NEE had approximately \$135 million (none at FPL) and \$73 million (none at FPL), respectively, in margin cash collateral paid to counterparties that was not offset against derivative assets or liabilities in the above presentation. These amounts are included in current other assets on NEE's condensed consolidated balance sheets.

Significant Unobservable Inputs Used in Recurring Fair Value Measurements – The valuation of certain commodity contracts requires the use of significant unobservable inputs. All forward price, implied volatility, implied correlation and interest rate inputs used in the valuation of such contracts are directly based on third-party market data, such as broker quotes and exchange settlements, when that data is available. If third-party market data is not available, then industry standard methodologies are used to develop inputs that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs, including some forward prices, implied volatilities and interest rates used for determining fair value are updated daily to reflect the best available market information. Unobservable inputs which are related to observable inputs, such as illiquid portions of forward price or volatility curves, are updated daily as well, using industry standard techniques such as interpolation and extrapolation, combining observable forward inputs supplemented by historical market and other relevant data.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

Other unobservable inputs, such as implied correlations, block-to-hourly price shaping, customer migration rates from full requirements contracts and some implied volatility curves, are modeled using proprietary models based on historical data and industry standard techniques.

The significant unobservable inputs used in the valuation of NEE's commodity contracts categorized as Level 3 of the fair value hierarchy at March 31, 2024 are as follows:

Transaction Type	Fair Value at		Valuation	Significant		Weighted-
	March 31, 2024		Technique(s)	Unobservable Inputs	Range	average <sup>(a)</sup>
	Assets	Liabilities				
	(millions)					
Forward contracts – power	\$ 436	\$ 433	Discounted cash flow	Forward price (per MWh)	\$(1) — \$228	\$52
Forward contracts – gas	319	100	Discounted cash flow	Forward price (per MMBtu)	\$— — \$12	\$3
Forward contracts – congestion	51	56	Discounted cash flow	Forward price (per MWh)	\$(37) — \$34	\$—
Options – power	23	5	Option models	Implied correlations	39% — 47%	44%
				Implied volatilities	33% — 166%	94%
Options – primarily gas	96	77	Option models	Implied correlations	39% — 47%	44%
				Implied volatilities	14% — 115%	45%
Full requirements and unit contingent contracts	454	192	Discounted cash flow	Forward price (per MWh)	\$(1) — \$366	\$70
				Customer migration rate <sup>(b)</sup>	—% — 67%	2%
Forward contracts – other	219	68				
Total	\$ 1,598	\$ 931				

(a) Unobservable inputs were weighted by volume.

(b) Applies only to full requirements contracts.

The sensitivity of NEE's fair value measurements to increases (decreases) in the significant unobservable inputs is as follows:

Significant Unobservable Input	Position	Impact on Fair Value Measurement
Forward price	Purchase power/ gas	Increase (decrease)
	Sell power/gas	Decrease (increase)
Implied correlations	Purchase option	Decrease (increase)
	Sell option	Increase (decrease)
Implied volatilities	Purchase option	Increase (decrease)
	Sell option	Decrease (increase)
Customer migration rate	Sell power <sup>(a)</sup>	Decrease (increase)

-----  
(a) Assumes the contract is in a gain position.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

The reconciliation of changes in the fair value of derivatives that are based on significant unobservable inputs is as follows:

	Three Months Ended March 31,			
	2024		2023	
	NEE	FPL	NEE	FPL
	(millions)			
Fair value of net derivatives based on significant unobservable inputs at December 31 of prior period	\$ 951	\$ 24	\$ (854)	\$ 9
Realized and unrealized gains (losses):				
Included in operating revenues	33	—	1,208	—
Included in regulatory assets and liabilities	(16)	(16)	(17)	(17)
Purchases	23	—	214	—
Settlements	(299)	(6)	(304)	(3)
Issuances	(29)	—	(74)	—
Transfers in <sup>(a)</sup>	4	—	9	—
Transfers out <sup>(a)</sup>	—	—	274	—
Fair value of net derivatives based on significant unobservable inputs at March 31	\$ 667	\$ 2	\$ 456	\$ (11)
Gains (losses) included in operating revenues attributable to the change in unrealized gains (losses) relating to derivatives held at the reporting date	\$ (79)	\$ —	\$ 797	\$ —

(a) Transfers into Level 3 were a result of decreased observability of market data. Transfers from Level 3 to Level 2 were a result of increased observability of market data.

Income Statement Impact of Derivative Instruments – Gains (losses) related to NEE's derivatives are recorded in NEE's condensed consolidated statements of income as follows:

	Three Months Ended March 31,	
	2024	2023
	(millions)	
Commodity contracts <sup>(a)</sup> – operating revenues (including \$100 unrealized gains and \$1,142 unrealized gains, respectively)	\$ 26	\$ 1,019
Foreign currency contracts – interest expense (including \$16 unrealized losses and \$15 unrealized losses, respectively)	(23)	(18)
Interest rate contracts – interest expense (including \$267 unrealized gains and \$517 unrealized losses, respectively)	578	(484)
Losses reclassified from AOCI to interest expense:		
Interest rate contracts	—	—
Foreign currency contracts	(1)	(1)
Total	\$ 580	\$ 516

(a) For the three months ended March 31, 2024 and 2023, FPL recorded losses of approximately \$20 million and \$25 million, respectively, related to commodity contracts as regulatory assets on its condensed consolidated balance sheets.

**Notional Volumes of Derivative Instruments** – The following table represents net notional volumes associated with derivative instruments that are required to be reported at fair value in NEE's and FPL's condensed consolidated financial statements. The table includes significant volumes of transactions that have minimal exposure to commodity price changes because they are variably priced agreements. These volumes are only an indication of the commodity exposure that is managed through the use of derivatives. They do not represent net physical asset positions or non-derivative positions and the related hedges, nor do they represent NEE's and FPL's net economic exposure, but only the net notional derivative positions that fully or partially hedge the related asset positions. NEE and FPL had derivative commodity contracts for the following net notional volumes:

Commodity Type	March 31, 2024		December 31, 2023	
	NEE	FPL	NEE	FPL
	(millions)			
Power	(159) MWh	—	(167) MWh	—
Natural gas	(1,154) MMBtu	751 MMBtu	(1,452) MMBtu	717 MMBtu
Oil	(38) barrels	—	(42) barrels	—

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

At March 31, 2024 and December 31, 2023, NEE had interest rate contracts with a net notional amount of approximately \$17.5 billion and \$25.6 billion, respectively, and foreign currency contracts with a notional amount of approximately \$1.2 billion and \$0.5 billion, respectively.

Credit-Risk-Related Contingent Features – Certain derivative instruments contain credit-risk-related contingent features including, among other things, the requirement to maintain an investment grade credit rating from specified credit rating agencies and certain financial ratios, as well as credit-related cross-default and material adverse change triggers. At March 31, 2024 and December 31, 2023, the aggregate fair value of NEE's derivative instruments with credit-risk-related contingent features that were in a liability position was approximately \$4.1 billion (\$18 million for FPL) and \$4.7 billion (\$14 million for FPL), respectively.

If the credit-risk-related contingent features underlying these derivative agreements were triggered, certain subsidiaries of NEE, including FPL, could be required to post collateral or settle contracts according to contractual terms which generally allow netting of contracts in offsetting positions. Certain derivative contracts contain multiple types of credit-related triggers. To the extent these contracts contain a credit ratings downgrade trigger, the maximum exposure is included in the following credit ratings collateral posting requirements. If FPL's and NEECH's credit ratings were downgraded to BBB/Baa2 (a three-level downgrade for FPL and a one level downgrade for NEECH from the current lowest applicable rating), applicable NEE subsidiaries would be required to post collateral such that the total posted collateral would be approximately \$440 million (none at FPL) at March 31, 2024 and \$510 million (none at FPL) at December 31, 2023. If FPL's and NEECH's credit ratings were downgraded to below investment grade, applicable NEE subsidiaries would be required to post additional collateral such that the total posted collateral would be approximately \$2.4 billion (\$10 million at FPL) at March 31, 2024 and \$2.4 billion (\$15 million at FPL) at December 31, 2023. Some derivative contracts do not contain credit ratings downgrade triggers, but do contain provisions that require certain financial measures be maintained and/or have credit-related cross-default triggers. In the event these provisions were triggered, applicable NEE subsidiaries could be required to post additional collateral of up to approximately \$1.4 billion (\$30 million at FPL) at March 31, 2024 and \$1.7 billion (\$50 million at FPL) at December 31, 2023.

Collateral related to derivatives, including amounts posted for margin, current exposures and future performance with exchanges and independent system operators, may be posted in the form of cash or credit support in the normal course of business. At March 31, 2024 and December 31, 2023, applicable NEE subsidiaries have posted approximately \$532 million (none at FPL) and \$691 million (none at FPL), respectively, in cash, and \$1,440 million (none at FPL) and \$1,595 million (none at FPL), respectively, in the form of letters of credit and surety bonds, each of which could be applied toward the collateral requirements described above. FPL and NEECH have capacity under their credit facilities generally in excess of the collateral requirements described above that would be available to support, among other things, derivative activities. Under the terms of the credit facilities, maintenance of a specific credit rating is not a condition to drawing on these credit facilities, although there are other conditions to drawing on these credit facilities.

Additionally, some contracts contain certain adequate assurance provisions whereby a counterparty may demand additional collateral based on subjective events and/or conditions. Due to the subjective nature of these provisions, NEE and FPL are unable to determine an exact value for these items and they are not included in any of the quantitative disclosures above.

### **3. Non-Derivative Fair Value Measurements**

Non-derivative fair value measurements consist of NEE's and FPL's cash equivalents and restricted cash equivalents, special use funds and other investments. The fair value of these financial assets is determined by using the valuation techniques and inputs as described in Note 2 – Fair Value Measurements of Derivative Instruments as well as below.

Cash Equivalents and Restricted Cash Equivalents – NEE and FPL hold investments in money market funds. The fair value of these funds is estimated using a market approach based on current observable market prices.

Special Use Funds and Other Investments – NEE and FPL hold primarily debt and equity securities directly, as well as indirectly through commingled funds. Substantially all directly held equity securities are valued at their quoted market prices. For directly held debt securities, multiple prices and price types are obtained from pricing vendors whenever possible, which enables cross-provider validations. A primary price source is identified based on asset type, class or issue of each security. Commingled funds, which are similar to mutual funds, are maintained by banks or investment companies and hold certain investments in accordance with a stated set of objectives. The fair value of commingled funds is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.

Fair Value Measurement Alternative – NEE holds investments in equity securities without readily determinable fair values, which are initially recorded at cost, of approximately \$559 million and \$538 million at March 31, 2024 and December 31, 2023, respectively, and are included in noncurrent other assets on NEE's condensed consolidated balance sheets. Adjustments to carrying values are recorded as a result of observable price changes in transactions for identical or similar investments of the same issuer.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

Recurring Non-Derivative Fair Value Measurements – NEE's and FPL's financial assets and other fair value measurements made on a recurring basis by fair value hierarchy level are as follows:

	March 31, 2024			
	Level 1	Level 2	Level 3	Total
	(millions)			
Assets:				
Cash equivalents and restricted cash equivalents:(a)				
NEE – equity securities	\$ 684	\$ —	\$ —	\$ 684
FPL – equity securities	\$ 11	\$ —	\$ —	\$ 11
Special use funds:(b)				
NEE:				
Equity securities	\$ 2,494	\$ 2,981 (c)	\$ 234	\$ 5,709
U.S. Government and municipal bonds	\$ 690	\$ 45	\$ —	\$ 735
Corporate debt securities	\$ 1	\$ 642	\$ —	\$ 643
Asset-backed securities	\$ —	\$ 825	\$ —	\$ 825
Other debt securities	\$ —	\$ 14	\$ —	\$ 14
FPL:				
Equity securities	\$ 913	\$ 2,685 (c)	\$ 234	\$ 3,832
U.S. Government and municipal bonds	\$ 550	\$ 23	\$ —	\$ 573
Corporate debt securities	\$ —	\$ 468	\$ —	\$ 468
Asset-backed securities	\$ —	\$ 607	\$ —	\$ 607
Other debt securities	\$ —	\$ 6	\$ —	\$ 6
Other investments:(d)				
NEE:				
Equity securities	\$ 52	\$ 1	\$ —	\$ 53
U.S. Government and municipal bonds	\$ 246	\$ 3	\$ —	\$ 249
Corporate debt securities	\$ —	\$ 494	\$ 134	\$ 628
Other debt securities	\$ —	\$ 191	\$ 39	\$ 230
FPL:				
Equity securities	\$ 10	—	\$ —	\$ 10

(a) Includes restricted cash equivalents of approximately \$19 million (\$11 million for FPL) in current other assets on the condensed consolidated balance sheets.

(b) Excludes investments accounted for under the equity method and loans not measured at fair value on a recurring basis. See Fair Value of Financial Instruments Recorded at Other than Fair Value below.

(c) Primarily invested in commingled funds whose underlying securities would be Level 1 if those securities were held directly by NEE or FPL.

(d) Included in noncurrent other assets on NEE's and FPL's condensed consolidated balance sheets.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**

Equity securities	\$ 50	\$ —	\$ —	\$ 50
U.S. Government and municipal bonds	\$ 288	\$ 3	\$ —	\$ 291
Corporate debt securities	\$ —	\$ 408	\$ 115	\$ 523
Other debt securities	\$ —	\$ 196	\$ 15	\$ 211
FPL:				
Equity securities	\$ 9	\$ —	\$ —	\$ 9

(a) Includes restricted cash equivalents of approximately \$34 million (\$11 million for FPL) in current other assets on the condensed consolidated balance sheets.

(b) Excludes investments accounted for under the equity method and loans not measured at fair value on a recurring basis. See Fair Value of Financial Instruments Recorded at Other than Fair Value below.

(c) Primarily invested in commingled funds whose underlying securities would be Level 1 if those securities were held directly by NEE or FPL.

(d) Included in noncurrent other assets on NEE's and FPL's condensed consolidated balance sheets.

Contingent Consideration – NEER had approximately \$125 million and \$126 million of contingent consideration liabilities related to acquisitions included in noncurrent other liabilities on NEE's condensed consolidated balance sheets at March 31, 2024 and December 31, 2023, respectively.

Significant inputs and assumptions used in the fair value measurement of the contingent consideration, some of which are Level 3 and require judgment, include the projected timing and amount of future cash flows, estimated probability of completing future development projects as well as discount rates.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

Fair Value of Financial Instruments Recorded at Other than Fair Value – The carrying amounts of commercial paper and other short-term debt approximate their fair values. The carrying amounts and estimated fair values of other financial instruments recorded at other than fair value are as follows:

	March 31, 2024		December 31, 2023	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
(millions)				
<b>NEE:</b>				
Special use funds <sup>(a)</sup>	\$ 1,247	\$ 1,248	\$ 1,186	\$ 1,187
Other receivables, net of allowances <sup>(b)</sup>	\$ 626	\$ 626	\$ 777	\$ 777
Long-term debt, including current portion	\$ 72,087	\$ 67,997 <sup>(c)</sup>	\$ 68,306	\$ 64,103 <sup>(c)</sup>
<b>FPL:</b>				
Special use funds <sup>(a)</sup>	\$ 884	\$ 885	\$ 856	\$ 856
Long-term debt, including current portion	\$ 24,059	\$ 22,403 <sup>(c)</sup>	\$ 25,274	\$ 23,430 <sup>(c)</sup>

- (a) Primarily represents investments accounted for under the equity method and loans not measured at fair value on a recurring basis (Level 2).
- (b) Approximately \$400 million and \$567 million is included in current other assets and \$226 million and \$210 million is included in noncurrent other assets on NEE's condensed consolidated balance sheets at March 31, 2024 and December 31, 2023, respectively (primarily Level 3).
- (c) At March 31, 2024 and December 31, 2023, substantially all is Level 2 for NEE and FPL.

Special Use Funds and Other Investments Carried at Fair Value – The special use funds noted above and those carried at fair value (see Recurring Non-Derivative Fair Value Measurements above) consist of NEE's nuclear decommissioning fund assets of approximately \$9,172 million (\$6,369 million for FPL) and \$8,697 million (\$6,049 million for FPL) at March 31, 2024 and December 31, 2023, respectively, and FPL's storm fund assets of \$1 million and \$1 million at March 31, 2024 and December 31, 2023, respectively. The investments held in the special use funds and other investments consist of equity and available for sale debt securities which are primarily carried at estimated fair value. The amortized cost of debt securities is approximately \$3,409 million (\$1,710 million for FPL) and \$3,329 million (\$1,693 million for FPL) at March 31, 2024 and December 31, 2023, respectively. Debt securities included in the nuclear decommissioning funds have a weighted-average maturity at March 31, 2024 of approximately eight years at both NEE and FPL. Other investments primarily consist of debt securities with a weighted-average maturity at March 31, 2024 of approximately six years. The cost of securities sold is determined using the specific identification method.

For FPL's special use funds, changes in fair value of debt and equity securities, including any estimated credit losses of debt securities, result in a corresponding adjustment to the related regulatory asset or liability accounts, consistent with regulatory treatment. For NEE's non-rate regulated operations, changes in fair value of debt securities result in a corresponding adjustment to OCI, except for estimated credit losses and unrealized losses on debt securities intended or required to be sold prior to recovery of the amortized cost basis, which are recognized in other – net in NEE's condensed consolidated statements of income. Changes in fair value of equity securities are primarily recorded in

change in unrealized gains (losses) on equity securities held in NEER's nuclear decommissioning funds – net in NEE’s condensed consolidated statements of income.

Unrealized gains recognized on equity securities held at March 31, 2024 and 2023 are as follows:

	NEE		FPL	
	Three Months Ended		Three Months Ended	
	March 31,		March 31,	
	2024	2023	2024	2023
	(millions)			
Unrealized gains	\$ 430	\$ 273	\$ 288	\$ 180

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

Realized gains and losses and proceeds from the sale or maturity of available for sale debt securities are as follows:

	NEE		FPL	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2024	2023	2024	2023
	(millions)			
Realized gains	\$ 11	\$ 8	\$ 10	\$ 7
Realized losses	\$ 11	\$ 38	\$ 8	\$ 30
Proceeds from sale or maturity of securities	\$ 564	\$ 428	\$ 432	\$ 299

The unrealized gains and unrealized losses on available for sale debt securities and the fair value of available for sale debt securities in an unrealized loss position are as follows:

	NEE		FPL	
	December 31,		December 31,	
	March 31, 2024	2023	March 31, 2024	2023
	(millions)			
Unrealized gains	\$ 25	\$ 41	\$ 18	\$ 31
Unrealized losses <sup>(a)</sup>	\$ 144	\$ 134	\$ 77	\$ 71
Fair value	\$ 2,134	\$ 1,862	\$ 968	\$ 872

(a) Unrealized losses on available for sale debt securities in an unrealized loss position for greater than twelve months at March 31, 2024 and December 31, 2023 were not material to NEE or FPL.

Regulations issued by the FERC and the NRC provide general risk management guidelines to protect nuclear decommissioning funds and to allow such funds to earn a reasonable return. The FERC regulations prohibit, among other investments, investments in any securities of NEE or its subsidiaries, affiliates or associates, excluding investments tied to market indices or mutual funds. Similar restrictions applicable to the decommissioning funds for NEER's nuclear plants are included in the NRC operating licenses for those facilities or in NRC regulations applicable to NRC licensees not in cost-of-service environments. With respect to the decommissioning fund for Seabrook, decommissioning fund contributions and withdrawals are also regulated by the New Hampshire Nuclear Decommissioning Financing Committee pursuant to New Hampshire law.

The nuclear decommissioning reserve funds are managed by investment managers who must comply with the guidelines of NEE and FPL and the rules of the applicable regulatory authorities. The funds' assets are invested giving consideration to taxes, liquidity, risk, diversification and other prudent investment objectives.

#### 4. Income Taxes

NEE's effective income tax rate for the three months ended March 31, 2024 and 2023 was approximately 10.5% and 17.8%, respectively. NEE's effective income tax rate is based on the composition of pretax income or loss.

A reconciliation between the effective income tax rates and the applicable statutory rate is as follows:

	NEE		FPL	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2024	2023	2024	2023
Statutory federal income tax rate	21.0 %	21.0 %	21.0 %	21.0 %
Increases (reductions) resulting from:				
State income taxes – net of federal income tax benefit	1.5	3.2	4.3	4.2
Taxes attributable to noncontrolling interests	3.4	3.3	—	—
Renewable energy tax credits	(11.7)	(6.1)	(2.7)	(1.6)
Amortization of deferred regulatory credit	(1.9)	(2.1)	(2.9)	(3.5)
Other – net	(1.8)	(1.5)	(0.5)	(0.4)
Effective income tax rate	10.5 %	17.8 %	19.2 %	19.7 %

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

NEE recognizes PTCs as wind and solar energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes, which may differ significantly from amounts computed, on a quarterly basis, using an overall effective income tax rate anticipated for the full year. NEE uses this method of recognizing PTCs for specific reasons, including that PTCs are an integral part of the expected value of most wind and some solar projects and a fundamental component of such wind and solar projects' results of operations. PTCs, as well as ITCs, can significantly affect NEE's effective income tax rate depending on the amount of pretax income or loss. The amount of PTCs recognized can be significantly affected by wind and solar generation and by the roll off of PTCs after ten years of production absent a repowering of the wind and solar projects.

## **5. Acquisitions**

RNG Acquisition – On March 21, 2023, a wholly owned subsidiary of NextEra Energy Resources acquired a portfolio of renewable energy projects from the owners of Energy Power Partners Fund I, L.P. and North American Sustainable Energy Fund, L.P., as well as the related service provider (RNG acquisition). The portfolio primarily consisted of 31 biogas projects, one of which is an operating renewable natural gas facility and the others of which are primarily operating landfill gas-to-electric facilities. The purchase price included approximately \$1.1 billion in cash consideration and the assumption of approximately \$34 million of debt, excluding post-closing adjustments.

Under the acquisition method, the purchase price was allocated to the assets acquired and liabilities assumed based on their fair value. NEE acquired identifiable assets of approximately \$1.3 billion, primarily relating to property, plant and equipment and intangible assets associated with biogas rights agreements and above-market purchased power agreements, and assumed liabilities of approximately \$0.3 billion and noncontrolling interests of approximately \$0.1 billion. The excess of the purchase price over the fair value of assets acquired and liabilities assumed resulted in approximately \$0.3 billion of goodwill which has been recognized on NEE's condensed consolidated balance sheets, of which approximately \$0.2 billion is expected to be deductible for tax purposes. Goodwill associated with the RNG acquisition is reflected within NEER and, for impairment testing, is included in the clean energy assets reporting unit. The goodwill arising from the transaction represents expected benefits of synergies and expansion opportunities for NEE's clean energy businesses.

## **6. Related Party Transactions**

With a focus on renewable energy projects, NEP owns, or has a partial ownership interest in, a portfolio of contracted renewable energy assets consisting of wind, solar and battery storage projects as well as a contracted natural gas pipeline. NEE owns a noncontrolling interest in NEP, primarily through its limited partner interest in NEP OpCo and accounts for its ownership interest in NEP as an equity method investment. NEER operates essentially all of the energy projects owned by NEP and provides services to NEP under various related party operations and maintenance, administrative and management services agreements (service agreements). NextEra Energy Resources is also party to a CSCS agreement with a subsidiary of NEP. At March 31, 2024 and December 31, 2023, the cash sweep amounts (due to NEP and its subsidiaries) held in accounts belonging to NextEra Energy Resources or its subsidiaries were approximately \$1,443 million and \$1,511 million, respectively, and are included in accounts payable. Fee income related to the CSCS agreement and the service agreements totaled approximately \$3 million and \$44 million for the three months ended March 31, 2024 and 2023, respectively, and is included in operating revenues in NEE's condensed consolidated statements of income. Amounts due

from NEP of approximately \$61 million and \$84 million are included in other receivables and \$138 million and \$114 million are included in noncurrent other assets at March 31, 2024 and December 31, 2023, respectively. NEECH or NextEra Energy Resources guaranteed or provided indemnifications, letters of credit or surety bonds totaling approximately \$2.0 billion at March 31, 2024 primarily related to obligations on behalf of NEP's subsidiaries with maturity dates ranging from 2024 to 2059, including certain project performance obligations and obligations under financing and interconnection agreements. Payment guarantees and related contracts with respect to unconsolidated entities for which NEE or one of its subsidiaries are the guarantor are recorded on NEE's condensed consolidated balance sheets at fair value. At March 31, 2024, approximately \$59 million related to the fair value of the credit support provided under the CSCS agreement is recorded as noncurrent other liabilities on NEE's condensed consolidated balance sheet.

During 2024 and 2023, certain services, primarily engineering, construction, transportation, storage and maintenance services, were provided to subsidiaries of NEE by related parties that NEE accounts for under the equity method of accounting. Charges for these services amounted to approximately \$152 million and \$233 million for the three months ended March 31, 2024 and 2023, respectively.

## **7. Variable Interest Entities (VIEs)**

NEER – At March 31, 2024, NEE consolidates a number of VIEs within the NEER segment. Subsidiaries within the NEER segment are considered the primary beneficiary of these VIEs since they control the most significant activities of these VIEs, including operations and maintenance, and they have the obligation to absorb expected losses of these VIEs.

Eight indirect subsidiaries of NextEra Energy Resources have an ownership interest ranging from approximately 50% to 67% in entities which own and operate solar generation facilities with generating capacity of approximately 765 MW. Each of the subsidiaries is considered a VIE since the non-managing members have no substantive rights over the managing members, and

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

is consolidated by NextEra Energy Resources. These entities sell their electric output to third parties under power sales contracts with expiration dates ranging from 2035 through 2052. These entities have third-party debt which is secured by liens against the assets of the entities. The debt holders have no recourse to the general credit of NextEra Energy Resources for the repayment of debt. The assets and liabilities of these VIEs were approximately \$1,769 million and \$1,064 million, respectively, at March 31, 2024, and \$1,796 million and \$1,085 million, respectively, at December 31, 2023. At March 31, 2024 and December 31, 2023, the assets and liabilities of these VIEs consisted primarily of property, plant and equipment and long-term debt.

NEE consolidates a NEET VIE which owns and operates an approximately 280-mile electric transmission line that went into service during the first quarter of 2022. A NEET subsidiary is the primary beneficiary and controls the most significant activities of the VIE. NEET is entitled to receive 48% of the profits and losses of the entity. The assets and liabilities of the VIE totaled approximately \$696 million and \$343 million, respectively, at March 31, 2024, and \$741 million and \$347 million, respectively, at December 31, 2023. At March 31, 2024 and December 31, 2023, the assets and liabilities of this VIE consisted primarily of property, plant and equipment and long-term debt.

NextEra Energy Resources consolidates a VIE which has a 10% direct ownership interest in wind and solar generation facilities which have the capability of producing approximately 400 MW and 599 MW, respectively. These entities sell their electric output under power sales contracts to third parties with expiration dates ranging from 2025 through 2040. These entities are also considered a VIE because the holders of differential membership interests in these entities do not have substantive rights over the significant activities of these entities. The assets and liabilities of the VIE were approximately \$1,372 million and \$82 million, respectively, at March 31, 2024, and \$1,434 million and \$79 million, respectively, at December 31, 2023. At March 31, 2024 and December 31, 2023, the assets of this VIE consisted primarily of property, plant and equipment.

NextEra Energy Resources consolidates 29 VIEs that primarily relate to certain subsidiaries which have sold differential membership interests in entities which own and operate wind generation, solar generation and battery storage facilities with the generating/storage capacity of approximately 10,884 MW, 3,133 MW and 1,112 MW, respectively, and own wind generation, solar generation and battery storage facilities that, upon completion of construction, which is anticipated in 2024, are expected to have generating/storage capacity of approximately 163 MW, 105 MW and 407 MW, respectively. These entities sell, or will sell, their electric output either under power sales contracts to third parties with expiration dates ranging from 2024 through 2053 or in the spot market. These entities are considered VIEs because the holders of differential membership interests do not have substantive rights over the significant activities of these entities. NextEra Energy Resources has financing obligations with respect to these entities, including third-party debt which is secured by liens against the generation facilities and the other assets of these entities or by pledges of NextEra Energy Resources' ownership interest in these entities. The debt holders have no recourse to the general credit of NEER for the repayment of debt. The assets and liabilities of these VIEs totaled approximately \$22,433 million and \$904 million, respectively, at March 31, 2024. There were 33 of these consolidated VIEs at December 31, 2023 and the assets and liabilities of those VIEs at such date totaled approximately \$24,250 million and \$3,148 million, respectively. At March 31, 2024 and December 31, 2023, the assets and liabilities of these VIEs consisted primarily of property, plant and equipment and accounts payable.

Other – At March 31, 2024 and December 31, 2023, several NEE subsidiaries had investments totaling approximately \$5,262 million (\$4,145 million at FPL) and \$4,962 million (\$3,899 million at FPL), respectively, which are included in special use funds and noncurrent other assets on NEE's condensed consolidated balance sheets and in special use funds on FPL's condensed consolidated balance sheets. These investments represented primarily commingled funds and asset-backed securities. NEE subsidiaries, including FPL, are not the primary beneficiaries and therefore do not consolidate any of these entities because they do not control any of the ongoing activities of these entities, were not involved in the initial design of these entities and do not have a controlling financial interest in these entities.

Certain subsidiaries of NEE have noncontrolling interests in entities accounted for under the equity method, including NEE's noncontrolling interest in NEP OpCo. These entities are limited partnerships or similar entity structures in which the limited partners or non-managing members do not have substantive rights over the significant activities of these entities, and therefore are considered VIEs. NEE is not the primary beneficiary because it does not have a controlling financial interest in these entities, and therefore does not consolidate any of these entities. NEE's investment in these entities totaled approximately \$4,000 million and \$3,913 million at March 31, 2024 and December 31, 2023, respectively. At March 31, 2024, subsidiaries of NEE had guarantees related to certain obligations of one of these entities, as well as commitments to invest an additional approximately \$180 million in several of these entities. See further discussion of such guarantees and commitments in Note 12 – Commitments and – Contracts, respectively.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

## 8. Employee Retirement Benefits

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries and sponsors a contributory postretirement plan for other benefits for retirees of NEE and its subsidiaries meeting certain eligibility requirements.

The components of net periodic cost (income) for the plans are as follows:

	Pension Benefits		Postretirement Benefits	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2024	2023	2024	2023
	(millions)			
Service cost	\$ 18	\$ 16	\$ —	\$ —
Interest cost	33	33	2	3
Expected return on plan assets	(102)	(98)	—	—
Special termination benefit <sup>(a)</sup>	28	—	—	—
Net periodic cost (income) at NEE	<u>\$ (23)</u>	<u>\$ (49)</u>	<u>\$ 2</u>	<u>\$ 3</u>
Net periodic cost (income) allocated to FPL	<u>\$ (9)</u>	<u>\$ (32)</u>	<u>\$ 2</u>	<u>\$ 2</u>

(a) Reflects enhanced early retirement benefit.

## 9. Debt

Significant long-term debt issuances and borrowings during the three months ended March 31, 2024 were as follows:

	Principal Amount	Interest Rate	Maturity Date
	(millions)		
<b>NEECH:</b>			
Debentures – fixed	\$ 3,800	4.90 % – 5.55 %	2026 – 2054
Debentures – variable	\$ 600	Variable <sup>(a)</sup>	2026
Junior subordinated debentures	\$ 1,000	6.70 % <sup>(b)</sup>	2054
Exchangeable senior notes <sup>(c)</sup>	\$ 1,000	3.00 %	2027
Canadian dollar denominated debentures <sup>(d)</sup>	\$ 744	4.85 %	2031
Revolving credit facilities	\$ 700	Variable <sup>(a)</sup>	2025

(a) Variable rate is based on an underlying index plus a specified margin.

(b) Debentures will bear interest at a rate of 6.70% to September 1, 2029 and thereafter will bear interest at a rate equal to the Five-Year Treasury Rate (as specified in the junior subordinated debentures) plus 2.364%, reset every five years.

(c) See additional discussion of the exchangeable senior notes below.

(d) A foreign currency swap has been entered into with respect to this debt issuance. See Note 2.

In March 2024, NEECH issued \$1.0 billion principal amount of its exchangeable senior notes due 2027 (the notes). A holder may exchange all or a portion of its notes at any time prior to the maturity date in accordance with the related indenture. Upon exchange, NEECH will pay cash up to the aggregate principal amount of the notes being exchanged and has the right, at its sole discretion, to pay or deliver cash, shares of NEE common stock or a combination of both, in respect of the remainder, if any, of NEECH's exchange obligation in excess of the aggregate principal amount of the notes being exchanged. At March 31, 2024, the initial exchange rate, which is subject to certain adjustments as set forth in the indenture, is 14.6927 shares of NEE common stock per \$1,000 in principal amount of notes, which is equivalent to an initial exchange price of approximately \$68.06 per share of NEE common stock.

NEECH used \$52 million of the net proceeds from the sale of the notes to enter into capped call transactions. Under the capped call transactions, NEECH purchased capped call options with an initial strike price of \$68.06 and an initial cap price of \$83.34 in each case per share of NEE common stock and subject to adjustment in certain circumstances. The capped call transactions may be settled with cash or, at NEE's election, with shares of NEE common stock. Any capped call settlement value is expected to offset the value to be delivered upon exchange of the notes as a result of share price improvement up to the cap price.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

**10. Equity**

Earnings Per Share – The reconciliation of NEE's basic and diluted earnings per share attributable to NEE is as follows:

	Three Months Ended March 31,	
	2024	2023
	(millions, except per share amounts)	
Numerator – net income attributable to NEE	\$ <b>2,268</b>	\$ 2,086
Denominator:		
Weighted-average number of common shares outstanding – basic	<b>2,051.5</b>	1,999.9
Equity units, stock options, performance share awards and restricted stock <sup>(a)</sup>	<b>3.7</b>	5.2
Weighted-average number of common shares outstanding – assuming dilution	<b>2,055.2</b>	2,005.1
Earnings per share attributable to NEE:		
Basic	\$ <b>1.11</b>	\$ 1.04
Assuming dilution	\$ <b>1.10</b>	\$ 1.04

(a) Calculated using the treasury stock method. Performance share awards are included in diluted weighted-average number of common shares outstanding based upon what would be issued if the end of the reporting period was the end of the term of the award.

Common shares issuable pursuant to equity units, stock options and/or performance share awards, exchangeable notes, as well as restricted stock which were not included in the denominator above due to their antidilutive effect were approximately 43.4 million and 51.1 million for the three months ended March 31, 2024 and 2023, respectively.

Accumulated Other Comprehensive Income (Loss) – The components of AOCI, net of tax, are as follows:

Accumulated Other Comprehensive Income (Loss)

	Net	Defined	Net	Other	
	Unrealized	Benefit	Unrealized	Comprehensive	
	Gains	Pension	Gains	Income Related	
	(Losses) on	and Other	(Losses) on	to Equity

(a) Reclassified to interest expense in NEE's condensed consolidated statements of income. See Note 2 - Income Statement Impact of Derivative Instruments.

(b) Reclassified to gains (losses) on disposal of investments and other property - net in NEE's condensed consolidated statements of income.

## 11. Summary of Significant Accounting and Reporting Policies

Rate Regulation - In March 2024, the FPSC issued a supplemental final order regarding FPL's 2021 rate agreement. The order affirmed the FPSC's prior approval of the 2021 rate agreement and is intended to further document, as requested by the Florida Supreme Court, how the evidence presented led to and supports the FPSC's decision to approve FPL's 2021 rate agreement. In April 2024, Florida Rising, Inc., Environmental Confederation of Southwest Florida, Inc. and League of United Latin American Citizens of Florida submitted a notice of appeal to the Florida Supreme Court regarding the FPSC's supplemental final order. The Florida Supreme Court issued an order granting FPL's motion to expedite the schedule, and briefing is expected to be concluded by July 1, 2024.

In April 2024, the FPSC approved FPL's March 2024 request for a mid-course correction to reduce the 2024 fuel cost recovery factors and refund customers approximately \$662 million over eight months effective May 2024.

Restricted Cash – At March 31, 2024 and December 31, 2023, NEE had approximately \$571 million (\$15 million for FPL) and \$730 million (\$15 million for FPL), respectively, of restricted cash, which is included in current other assets on NEE's and FPL's condensed consolidated balance sheets. Restricted cash is primarily related to debt service payments and margin cash collateral requirements at NEER and bond proceeds held for construction at FPL. In addition, where offsetting positions exist, restricted cash related to margin cash collateral of \$214 million is netted against derivative assets and \$616 million is netted against derivative liabilities at March 31, 2024 and \$194 million is netted against derivative assets and \$815 million is netted against derivative liabilities at December 31, 2023. See Note 2.

Property Plant and Equipment – Property, plant and equipment consists of the following:

	NEE		FPL	
	March 31, 2024	December 31, 2023	March 31, 2024	December 31, 2023
	(millions)			
Electric plant in service and other property	\$ 144,982	\$ 139,049	\$ 83,520	\$ 79,801
Nuclear fuel	1,639	1,564	1,155	1,125
Construction work in progress	16,682	18,652	6,050	8,311
Property, plant and equipment, gross	163,303	159,265	90,725	89,237
Accumulated depreciation and amortization	(34,110)	(33,489)	(18,694)	(18,629)
Property, plant and equipment – net	<u>\$ 129,193</u>	<u>\$ 125,776</u>	<u>\$ 72,031</u>	<u>\$ 70,608</u>

During the three months ended March 31, 2024 and 2023, FPL recorded AFUDC of approximately \$65 million and \$39 million, respectively, including AFUDC – equity of \$53 million and \$30 million, respectively. During the three months ended March 31, 2024 and 2023, NEER capitalized interest on construction projects of approximately \$97 million and \$58 million, respectively.

Structured Payables – At March 31, 2024 and December 31, 2023, NEE's outstanding obligations under its structured payables program were approximately \$0.6 billion and \$4.7 billion, respectively, substantially all of which is included in accounts payable on NEE's condensed consolidated balance sheets.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

Income Taxes – For taxable years beginning after 2022, renewable energy tax credits generated during the taxable year can be transferred to an unrelated purchaser for cash and are accounted for under Accounting Standards Codification 740 – Income Taxes. Proceeds resulting from the sales of renewable energy tax credits, approximately \$198 million during the three months ended March 31, 2024, are reported in the cash paid (received) for income taxes – net within the supplemental disclosures of cash flow information on NEE's condensed consolidated statements of cash flows.

Noncontrolling Interests – At March 31, 2024 and December 31, 2023, approximately \$8,870 million and \$8,857 million, respectively, of noncontrolling interests on NEE's condensed consolidated balance sheets relates to differential membership interests. For the three months ended March 31, 2024 and 2023, NEE recorded earnings of approximately \$348 million and \$339 million, respectively, associated with differential membership interests, which is reflected as net loss attributable to noncontrolling interests on NEE's condensed consolidated statements of income.

## **12. Commitments and Contingencies**

Commitments – NEE and its subsidiaries have made commitments in connection with a portion of their projected capital expenditures. Capital expenditures at FPL include, among other things, the cost for construction of additional facilities and equipment to meet customer demand, as well as capital improvements to and maintenance of existing facilities. At NEER, capital expenditures include, among other things, the cost, including capitalized interest, for development, construction and maintenance of its competitive energy businesses. Also see Note 3 – Contingent Consideration.

At March 31, 2024, estimated capital expenditures, on an accrual basis, for the remainder of 2024 through 2028 were as follows:

	Remainder						
	of 2024	2025	2026	2027	2028	Total	
(millions)							
FPL:							
Generation: <sup>(a)</sup>							
New <sup>(b)</sup>	\$ 1,590	\$ 3,180	\$ 4,190	\$ 3,760	\$ 3,305	\$ 16,025	
Existing	595	730	855	1,220	1,400	4,800	
Transmission and distribution <sup>(c)</sup>	2,610	2,735	2,845	3,910	4,210	16,310	
Nuclear fuel	115	205	300	305	390	1,315	
General and other	495	695	810	615	540	3,155	
Total	<u>\$ 5,405</u>	<u>\$ 7,545</u>	<u>\$ 9,000</u>	<u>\$ 9,810</u>	<u>\$ 9,845</u>	<u>\$ 41,605</u>	
NEER: <sup>(d)</sup>							
Wind <sup>(e)</sup>	\$ 1,925	\$ 925	\$ 380	\$ 65	\$ 55	\$ 3,350	
Solar <sup>(f)</sup>	2,800	2,480	950	840	—	7,070	
Other clean energy <sup>(g)</sup>	1,295	1,080	210	150	60	2,795	
Nuclear, including nuclear fuel	245	360	270	430	315	1,620	
Rate-regulated transmission <sup>(h)</sup>	595	1,295	820	615	325	3,650	
Other	625	415	285	240	200	1,765	
Total	<u>\$ 7,485</u>	<u>\$ 6,555</u>	<u>\$ 2,915</u>	<u>\$ 2,340</u>	<u>\$ 955</u>	<u>\$ 20,250</u>	

- (a) Includes AFUDC of approximately \$95 million, \$120 million, \$180 million, \$175 million and \$165 million for the remainder of 2024 through 2028, respectively.
- (b) Includes land, generation structures, transmission interconnection and integration and licensing.
- (c) Includes AFUDC of approximately \$70 million, \$90 million, \$100 million, \$90 million and \$65 million for the remainder of 2024 through 2028, respectively.
- (d) Represents capital expenditures for which applicable internal approvals and also, if required, regulatory approvals have been received.
- (e) Consists of capital expenditures for new wind projects and repowering of existing wind projects totaling approximately 2,589 MW, and related transmission.
- (f) Includes capital expenditures for new solar projects (including solar plus battery storage projects) totaling approximately 8,017 MW and related transmission.
- (g) Includes capital expenditures primarily for battery storage projects and renewable fuels projects.
- (h) Includes AFUDC of approximately \$15 million, \$45 million, \$105 million and \$60 million for the remainder of 2024 through 2027, respectively.

The above estimates are subject to continuing review and adjustment and actual capital expenditures may vary significantly from these estimates.

In addition to guarantees noted in Note 6 with regards to NEP, NEECH has guaranteed or provided indemnifications or letters of credit related to third parties, including certain obligations of investments in joint ventures accounted for under the equity method, totaling approximately \$480 million at March 31, 2024. These obligations primarily related to guaranteeing the residual value of certain financing leases. Payment guarantees and related contracts with respect to unconsolidated entities for which NEE or one of its subsidiaries are the guarantor are recorded at fair value and are included in

noncurrent other liabilities on NEE's condensed consolidated balance sheets. Management believes that the exposure associated with these guarantees is not material.

Contracts – In addition to the commitments made in connection with the estimated capital expenditures included in the table in

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

Commitments above, FPL has firm commitments under long-term contracts primarily for the transportation of natural gas with expiration dates through 2042.

At March 31, 2024, NEER has entered into contracts with expiration dates through 2033 primarily for the purchase of wind turbines, wind towers and solar modules and related construction and development activities, as well as for the supply of uranium, and the conversion, enrichment and fabrication of nuclear fuel. Approximately \$4.9 billion of related commitments are included in the estimated capital expenditures table in Commitments above. In addition, NEER has contracts primarily for the transportation and storage of natural gas with expiration dates through 2044.

The required capacity and/or minimum payments under contracts, including those discussed above, at March 31, 2024 were estimated as follows:

	Remainder of					
	2024	2025	2026	2027	2028	Thereafter
	(millions)					
FPL <sup>(a)</sup>	\$ 840	\$ 1,110	\$ 1,110	\$ 1,005	\$ 955	\$ 7,880
NEER <sup>(b)(c)(d)</sup>	\$ 4,220	\$ 1,685	\$ 260	\$ 245	\$ 115	\$ 1,970

- 
- (a) Includes approximately \$305 million, \$405 million, \$400 million, \$400 million, \$400 million and \$5,160 million for the remainder of 2024 through 2028 and thereafter, respectively, of firm commitments related to the natural gas transportation agreements with Sabal Trail and Florida Southeast Connection. The charges associated with these agreements are recoverable through the fuel clause and totaled approximately \$102 million and \$102 million for the three months ended March 31, 2024 and 2023, respectively, of which \$24 million and \$25 million, respectively, were eliminated in consolidation at NEE.
- (b) Includes a 20-year natural gas transportation agreement (approximately \$70 million per year) with Mountain Valley Pipeline, a joint venture in which NEER has a 32.8% equity investment, that is constructing a natural gas pipeline. The transportation agreement commitments are subject to the completion of construction which is expected in mid-2024.
- (c) Includes approximately \$220 million of commitments to invest in technology and other investments through 2031. See Note 7 - Other.
- (d) Includes approximately \$490 million, \$370 million and \$190 million for the remainder of 2024 through 2026, respectively, of joint obligations of NEECH and NEER.

Insurance - Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains \$500 million of private liability insurance per site, which is the maximum obtainable, except at Duane Arnold which obtained an exemption from the NRC and maintains a \$100 million private liability insurance limit. Each site, except Duane Arnold, participates in a secondary financial protection system, which provides up to \$15.8 billion of liability insurance coverage per incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments of up to \$1,161 million (\$664 million for FPL), plus any applicable taxes, per incident at any nuclear reactor in the U.S., payable at a rate not to exceed \$173 million (\$99 million for FPL) per incident per year. NextEra Energy Resources and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook and St. Lucie Unit No. 2, which approximates \$20 million and \$25 million, plus any applicable taxes, per incident, respectively.

NEE participates in a nuclear insurance mutual company that provides \$2.75 billion of limited insurance coverage per occurrence per site for property damage, decontamination and premature decommissioning risks at its nuclear plants and a sublimit of \$1.5 billion for non-nuclear perils, except for Duane Arnold which has a limit of \$50 million for property damage, decontamination risks and non-nuclear perils. NEE participates in co-insurance of 10% of the first \$400 million of losses per site per occurrence, except at Duane Arnold. The proceeds from such insurance, however, must first be used for reactor stabilization and site decontamination before they can be used for plant repair. NEE also participates in an insurance program that provides limited coverage for replacement power costs if a nuclear plant is out of service for an extended period of time because of an accident. In the event of an accident at one of NEE's or another participating insured's nuclear plants, NEE could be assessed up to \$167 million (\$104 million for FPL), plus any applicable taxes, in retrospective premiums in a policy year. NextEra Energy Resources and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates \$3 million, \$2 million and \$4 million, plus any applicable taxes, respectively.

Due to the high cost and limited coverage available from third-party insurers, NEE does not have property insurance coverage for a substantial portion of either its transmission and distribution property or natural gas pipeline assets. If FPL's storm restoration costs exceed the storm reserve, such storm restoration costs may be recovered, subject to prudence review by the FPSC, through surcharges approved by the FPSC or through securitization provisions pursuant to Florida law.

In the event of a loss, the amount of insurance available might not be adequate to cover property damage and other expenses incurred. Uninsured losses and other expenses, to the extent not recovered from customers in the case of FPL, would be borne by NEE and FPL and could have a material adverse effect on NEE's and FPL's financial condition, results of operations and liquidity.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(unaudited)**

Legal Proceedings – FPL is the defendant in a purported class action lawsuit filed in February 2018 that seeks from FPL unspecified damages for alleged breach of contract and gross negligence based on service interruptions that occurred as a result of Hurricane Irma in 2017. There is currently no trial date set. The Miami-Dade County Circuit Court certified the case as a class action and FPL's appeal of that decision was denied by Florida's Third District Court of Appeal (3<sup>rd</sup> DCA) in March 2023. The certified class encompasses all persons and business owners who reside in and are otherwise citizens of the state of Florida that contracted with FPL for electrical services, were charged storm charges, experienced a power outage after Hurricane Irma and suffered consequential damages because of FPL's alleged breach of contract or gross negligence. FPL filed a motion on March 31, 2023, for rehearing with the 3<sup>rd</sup> DCA claiming that the opinion upholding the class certification contains several errors that should be reheard by the full 3<sup>rd</sup> DCA. The motion is pending. Additionally, in July 2023, FPL filed a motion to dismiss the lawsuit on the basis that, among other things, it believes the FPSC has exclusive jurisdiction over any issues arising from a utility's preparation for and response to emergencies or disasters. Oral argument regarding FPL's motion for rehearing is scheduled for April 24, 2024. FPL is vigorously defending against the claims in this proceeding.

NEE, FPL, and certain current and former executives, are the named defendants in a purported shareholder securities class action lawsuit filed in the U.S. District Court for the Southern District of Florida in June 2023 and amended in December 2023 that seeks from the defendants unspecified damages allegedly resulting from alleged false or misleading statements regarding NEE's alleged campaign finance and other political activities. The alleged class of plaintiffs are all persons or entities who purchased or otherwise acquired NEE securities between December 2, 2021 and January 30, 2023. NEE is vigorously defending against the claims in this proceeding.

NEE, along with certain current and former executives and directors are the named defendants in purported shareholder derivative actions filed in the 15th Judicial Circuit in Palm Beach County, Florida in July 2023 and March 2024, and in the U.S. District Court for the Southern District of Florida in October 2023 and November 2023 (which were consolidated in January 2024) seeking unspecified damages allegedly resulting from, among other things, breaches of fiduciary duties and, in the consolidated cases, violations of the federal securities laws, all purporting to relate to alleged campaign finance law violations and associated matters. Defendants are vigorously defending against the claims in these proceedings. In January 2024, NEE and the plaintiffs in the derivative actions filed in 2023 agreed to a specified stay in these cases. NEE also has received demand letters and books and records requests from counsel representing other purported shareholders and containing similar allegations. These demands seek, among other things, a Board of Directors investigation of, and/or documentation regarding, these allegations. NEE and certain of the shareholders demanding an investigation have agreed to a specified stay of all material activities related to the demand.

In September 2023, a participant in the NEE Employee Retirement Savings Plan (Plan), purportedly on behalf of the Plan and all persons who were participants in or beneficiaries of the Plan, at any time between September 25, 2016 and September 25, 2023 (Plan participants), filed a putative ERISA class action lawsuit in the U.S. District Court for the Southern District of Florida against NEE. The complaint alleges that NEE violated its fiduciary duties under the Plan by permitting a third-party administrative recordkeeper to charge allegedly excessive fees for the services provided and allegedly by allowing a large volume of plan assets to be invested in NEE common stock. The plaintiff seeks declaratory, equitable and monetary relief on behalf of the Plan and Plan participants. NEE and the plaintiff have

agreed to a specified stay of the action to permit the plaintiff to exhaust the administrative remedies available to him under the Plan.

### **13. Segment Information**

The tables below present information for NEE's two reportable segments, FPL, a rate-regulated utility business, and NEER, which is comprised of competitive energy and rate-regulated transmission businesses. Corporate and Other represents other business activities, includes eliminating entries, and may include the net effect of rounding.

**NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY**

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

### OVERVIEW

NEE's operating performance is driven primarily by the operations of its two principal businesses, FPL, which serves approximately 5.9 million customer accounts in Florida and is one of the largest electric utilities in the U.S., and NEER, which together with affiliated entities is the world's largest generator of renewable energy from the wind and sun based on 2023 MWh produced on a net generation basis, as well as a world leader in battery storage. The table below presents net income (loss) attributable to NEE and earnings (loss) per share attributable to NEE, assuming dilution, by reportable segment, FPL and NEER. Corporate and Other is primarily comprised of the operating results of other business activities, as well as other income and expense items, including interest expense, and eliminating entries, and may include the net effect of rounding. See Note 13 for additional segment information. The following discussions should be read in conjunction with the Notes contained herein and Management's Discussion and Analysis of Financial Condition and Results of Operations appearing in the 2023 Form 10-K. The results of operations for an interim period generally will not give a true indication of results for the year. In the following discussions, all comparisons are with the corresponding items in the prior year period.

	Net Income (Loss) Attributable to NEE		Earnings (Loss) Per Share Attributable to NEE, Assuming Dilution	
			Three Months Ended March 31,	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2024	2023	2024	2023
	(millions)			
FPL	\$ 1,172	\$ 1,070	\$ 0.57	\$ 0.53
NEER <sup>(a)</sup>	966	1,440	0.47	0.72
Corporate and Other	130	(424)	0.06	(0.21)
NEE	<u>\$ 2,268</u>	<u>\$ 2,086</u>	<u>\$ 1.10</u>	<u>\$ 1.04</u>

(a) NEER's results reflect an allocation of interest expense from NEECH to NextEra Energy Resources' subsidiaries based on a deemed capital structure of 70% debt and differential membership interests sold by NextEra Energy Resources' subsidiaries.

### Adjusted Earnings

NEE prepares its financial statements under GAAP. However, management uses earnings adjusted for certain items (adjusted earnings), a non-GAAP financial measure, internally for financial planning, analysis of performance, reporting of results to the Board of Directors and as an input in determining performance-based compensation under NEE's employee incentive compensation plans. NEE also uses adjusted earnings when communicating its financial results and earnings outlook to analysts and investors. NEE's management believes that adjusted earnings provide a more meaningful representation of NEE's fundamental earnings power. Although these amounts are properly reflected in the determination of net income under GAAP, management believes that the amount and/or nature of

such items make period to period comparisons of operations difficult and potentially confusing. Adjusted earnings do not represent a substitute for net income, as prepared under GAAP.

The following table provides details of the after-tax adjustments to net income considered in computing NEE's adjusted earnings discussed above.

	Three Months Ended March 31,	
	2024	2023
	(millions)	
Net gains associated with non-qualifying hedge activity <sup>(a)</sup>	\$ 331	\$ 382
Differential membership interests-related - NEER	\$ (5)	\$ (17)
NEP investment gains, net - NEER	\$ (23)	\$ 3
Change in unrealized gains (losses) on equity securities held in NEER's nuclear decommissioning funds and OTTI, net - NEER	\$ 92	\$ 67
Impairment charges related to investment in Mountain Valley Pipeline - NEER	\$ —	\$ (27)

- 
- (a) For the three months ended March 31, 2024 and 2023, approximately \$74 million and \$682 million of gains, respectively, are included in NEER's net income; the balance is included in Corporate and Other. The change in non-qualifying hedge activity is primarily attributable to changes in forward power and natural gas prices, interest rates and foreign currency exchange rates, as well as the reversal of previously recognized unrealized mark-to-market gains or losses as the underlying transactions were realized.

NEE segregates into two categories unrealized mark-to-market gains and losses and timing impacts related to derivative transactions. The first category, referred to as non-qualifying hedges, represents certain energy derivative, interest rate derivative and foreign currency transactions entered into as economic hedges, which do not meet the requirements for hedge accounting, or for which hedge accounting treatment is not elected or has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the condensed consolidated statements of income, resulting in earnings volatility because the economic offset to certain of the positions are generally not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the impact of the non-qualifying hedges as a meaningful measure of current period performance. The second category, referred to as trading activities, which is included in adjusted earnings, represents the net unrealized effect of actively traded positions entered into to take advantage of expected market price movements and all other commodity hedging activities. At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 2.

## **RESULTS OF OPERATIONS**

### **Summary**

Net income attributable to NEE increased by \$182 million for the three months ended March 31, 2024 reflecting higher results at FPL and Corporate and Other, partly offset by lower results at NEER.

FPL's increase in net income for the three months ended March 31, 2024 was primarily driven by continued investments in plant in service and other property.

NEER's results decreased for the three months ended March 31, 2024 primarily reflecting less favorable non-qualifying hedge activity compared to 2023, partly offset by higher earnings from new investments.

Corporate and Other's results increased for the three months ended March 31, 2024 primarily due to favorable non-qualifying hedge activity compared to 2023.

NEE's effective income tax rates for the three months ended March 31, 2024 and 2023 were approximately 11% and 18%, respectively. See Note 4 for a discussion of NEE's and FPL's effective income tax rates.

### **FPL: Results of Operations**

Investments in plant in service and other property grew FPL's average rate base by approximately \$6.8 billion for the three months ended March 31, 2024, when compared to the same period in the prior year, reflecting, among other things, solar generation additions and ongoing transmission and distribution additions.

The use of reserve amortization is permitted by FPL's 2021 rate agreement. In order to earn a targeted regulatory ROE, subject to limitations associated with the 2021 rate agreement, reserve amortization is

calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues, net of O&M, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items must be adjusted, in part, by reserve amortization to earn the targeted regulatory ROE. In certain periods, reserve amortization is reversed so as not to exceed the targeted regulatory ROE. The drivers of FPL's net income not reflected in the reserve amortization calculation typically include wholesale and transmission service revenues and expenses, cost recovery clause revenues and expenses, AFUDC - equity and revenue and costs not recoverable from retail customers. During the three months ended March 31, 2024 and 2023, FPL recorded reserve amortization of approximately \$572 million and \$373 million, respectively. See Depreciation and Amortization Expense below. During both 2024 and 2023, FPL earned an approximately 11.80% regulatory ROE on its retail rate base, based on a trailing thirteen-month average retail rate base as of March 31, 2024 and March 31, 2023.

FPL implemented an interim storm restoration charge in April 2023 for eligible storm restoration costs of approximately \$1.3 billion, primarily related to surcharges for Hurricanes Ian and Nicole which impacted FPL's service area in 2022.

In March 2024, the FPSC issued a supplemental final order regarding FPL's 2021 rate agreement. In April 2024, a notice of appeal of the supplemental final order was filed. See Note 11 - Rate Regulation.

#### Operating Revenues

During the three months ended March 31, 2024, operating revenues decreased \$85 million primarily reflecting a decrease in fuel revenues of approximately \$160 million, partly offset by an increase in storm cost recovery revenues of \$110 million primarily associated with Hurricanes Ian and Nicole, as discussed above. The decrease in fuel revenues primarily related to lower fuel and energy prices. Additionally, during the three months ended March 31, 2024, retail base revenues decreased approximately \$7 million, primarily related to a decrease of approximately 3.2% in the average usage per retail customer driven by unfavorable weather when compared to the prior year period, partly offset by an increase of 1.7% in the average number of customer accounts.

#### Fuel, Purchased Power and Interchange Expense

Fuel, purchased power and interchange expense decreased \$180 million for the three months ended March 31, 2024 primarily reflecting lower fuel and energy prices.

#### Depreciation and Amortization Expense

Depreciation and amortization expense decreased \$32 million during the three months ended March 31, 2024. The decrease for the three months ended March 31, 2024 primarily reflects the impact of reserve amortization, partly offset by the amortization of deferred storm cost expenses primarily associated with Hurricanes Ian and Nicole, as discussed above. During the three months ended March 31, 2024 and 2023, FPL recorded reserve amortization of approximately \$572 million and \$373 million, respectively. Reserve amortization, or reversal of such amortization, reflects adjustments to accrued asset removal costs provided under the 2021 rate agreement in order to achieve the targeted regulatory ROE. Reserve amortization is recorded as either an increase or decrease to accrued asset removal costs which is reflected in noncurrent regulatory assets on the condensed consolidated balance sheets. At March 31, 2024, approximately \$651 million of reserve amortization remains available under the 2021 rate agreement.

### **NEER: Results of Operations**

NEER's results decreased \$474 million for the three months ended March 31, 2024. The primary drivers, on an after-tax basis, of the changes are in the following table.

	Increase (Decrease) From Prior Year Period
	<b>Three Months Ended March 31, 2024</b>
	(millions)
New investments <sup>(a)</sup>	<b>\$ 299</b>
Existing clean energy <sup>(a)</sup>	<b>(50)</b>
Gas infrastructure <sup>(a)</sup>	<b>(12)</b>
Customer supply <sup>(b)</sup>	<b>74</b>
NEET <sup>(a)</sup>	<b>(2)</b>
Other, including interest expense, corporate general and administrative expenses and other investment income	<b>(201)</b>
Change in non-qualifying hedge activity <sup>(c)</sup>	<b>(608)</b>
Change in unrealized gains/losses on equity securities held in nuclear decommissioning funds and OTTI, net <sup>(c)</sup>	<b>25</b>
NEP investment gains, net <sup>(c)</sup>	<b>(26)</b>
Impairment charges related to investment in Mountain Valley Pipeline <sup>(c)</sup>	<b>27</b>
Change in net income less net loss attributable to noncontrolling interests	<b>\$ (474)</b>

- 
- (a) Reflects after-tax project contributions, including the net effect of deferred income taxes and other benefits associated with renewable energy tax credits for wind, solar and storage projects, as applicable, but excludes allocation of interest expense and corporate general and administrative expenses except for an allocated credit support charge related to guarantees issued to conduct business activities. Results from projects, pipelines and rate-regulated transmission facilities and transmission lines are included in new investments during the first twelve months of operation or ownership. Project results, including repowered wind projects, are included in existing clean energy, pipeline results are included in gas infrastructure and rate-regulated transmission facilities and transmission lines are included in NEET beginning with the thirteenth month of operation or ownership.
- (b) Excludes allocation of interest expense and corporate general and administrative expenses except for an allocated credit support charge related to guarantees issued to conduct business activities.
- (c) See Overview - Adjusted Earnings for additional information.

### New Investments

Results from new investments for the three months ended March 31, 2024 increased primarily due to higher earnings related to new wind and solar generation and battery storage facilities that entered service during or after the three months ended March 31, 2023.

### Other Factors

Supplemental to the primary drivers of the changes in NEER's results discussed above, the discussion below describes changes in certain line items set forth in NEE's condensed consolidated statements of income as they relate to NEER.

#### Operating Revenues

Operating revenues for the three months ended March 31, 2024 decreased \$928 million primarily due to:

- the impact of non-qualifying commodity hedges due primarily to changes in energy prices (approximately \$51 million of gains for the three months ended March 31, 2024 compared to \$1,095 million of gains for the comparable period in 2023), and
- other net decreases in revenues of \$125 million,

partly offset by,

- revenues from new investments of \$124 million, and
- increases in revenues of \$117 million from the customer supply and gas infrastructure businesses.

#### Operating Expenses – net

Operating expenses – net for the three months ended March 31, 2024 increased \$231 million primarily due to increases of \$112 million in depreciation and amortization expenses, \$81 million in O&M expenses and \$19 million in fuel, purchased power and interchange expenses. The increases were primarily associated with growth across the NEER businesses.

#### Interest Expense

NEER's interest expense for the three months ended March 31, 2024 decreased \$176 million primarily reflecting approximately \$263 million of favorable impacts related to changes in the fair value of interest rate derivative instruments, partly offset by higher average interest rates and higher average debt balances.

#### Income Taxes

PTCs from wind and solar projects and ITCs from solar, battery storage and certain wind projects are included in NEER's earnings. PTCs are recognized as wind and solar energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes. See Note 4.

#### RNG Acquisition

On March 21, 2023, a wholly owned subsidiary of NextEra Energy Resources acquired a portfolio of renewable energy projects as well as the related service provider. See Note 5 – RNG Acquisition.

### **Corporate and Other: Results of Operations**

Corporate and Other is primarily comprised of the operating results of other business activities, as well as corporate interest income and expenses. Corporate and Other allocates a portion of NEECH's corporate interest expense to NextEra Energy Resources. Interest expense is allocated based on a deemed capital structure of 70% debt and differential membership interests sold by NextEra Energy Resources' subsidiaries.

Corporate and Other's results increased \$554 million during the three months ended March 31, 2024 primarily due to favorable after-tax impacts of approximately \$557 million, as compared to the prior year period, related to non-qualifying hedge activity as a result of changes in the fair value of interest rate derivative instruments.

### **LIQUIDITY AND CAPITAL RESOURCES**

NEE and its subsidiaries require funds to support and grow their businesses. These funds are used for, among other things, working capital, capital expenditures (see Note 12 – Commitments), investments

in or acquisitions of assets and businesses (see Note 5), payment of maturing debt and related derivative obligations (see Note 9 and Note 2) and, from time to time, redemption or repurchase of outstanding debt or equity securities. It is anticipated that these requirements will be satisfied through a combination of cash flows from operations, short- and long-term borrowings, the issuance of short- and long-term debt (see Note 9) and, from time to time, equity securities, proceeds from differential membership investors, the sale of renewable energy tax credits (see Note 11 – Income Taxes) and sales of assets to NEP or third parties, consistent with NEE’s and FPL’s objective of maintaining, on a long-term basis, a capital structure that will support a strong investment grade credit rating. NEE, FPL and NEECH rely on access to credit and capital markets as significant sources of liquidity for capital requirements and other operations that are not satisfied by operating cash flows. The inability of NEE, FPL and NEECH to maintain their current credit ratings could affect their ability to raise short- and long-term capital, their cost of capital and the execution of their respective financing strategies, and could require the posting of additional collateral under certain agreements.

## Cash Flows

NEE's sources and uses of cash for the three months ended March 31, 2024 and 2023 were as follows:

	Three Months Ended	
	March 31,	
	2024	2023
	(millions)	
Sources of cash:		
Cash flows from operating activities	\$ 3,077	\$ 1,673
Issuances of long-term debt, including premiums and discounts	7,811	6,655
Sale of independent power and other investments of NEER	565	305
Issuances of common stock/equity units – net	6	2,502
Net increase in commercial paper and other short-term debt	2,945	1,635
Total sources of cash	14,404	12,770
Uses of cash:		
Capital expenditures, independent power and other investments and nuclear fuel purchases	(9,711)	(7,245)
Retirements of long-term debt	(3,994)	(2,601)
Payments to related parties under the CSCS agreement – net	(68)	(277)
Dividends on common stock	(1,058)	(930)
Other uses – net	(779)	(971)
Total uses of cash	(15,610)	(12,024)
Effects of currency translation on cash, cash equivalents and restricted cash	(1)	2
Net increase (decrease) in cash, cash equivalents and restricted cash	\$ (1,207)	\$ 748

NEE's primary capital requirements are for expanding and enhancing FPL's electric system and generation facilities to continue to provide reliable service to meet customer electricity demands and for funding NEER's investments in independent power and other projects. See Note 12 – Commitments for estimated capital expenditures for the remainder of 2024 through 2028.

The following table provides a summary of capital investments for the three months ended March 31, 2024 and 2023.

	Three Months Ended March 31,	
	2024	2023
	(millions)	
FPL:		
Generation:		
New	\$ 584	\$ 257
Existing	293	403
Transmission and distribution	1,157	1,287
Nuclear fuel	108	33
General and other	96	124
Other, primarily change in accrued property additions and the exclusion of AFUDC – equity	107	170
Total	2,345	2,274
NEER:		
Wind	2,423	1,423
Solar (includes solar plus battery storage projects)	2,688	1,407
Other clean energy	1,208	1,230
Nuclear (includes nuclear fuel)	55	43
Natural gas pipelines	285	43
Other gas infrastructure	306	649
Rate-regulated transmission	181	55
Other	129	115
Total	7,275	4,965
Corporate and Other	91	6
Total capital expenditures, independent power and other investments and nuclear fuel purchases	\$ 9,711	\$ 7,245

## Liquidity

At March 31, 2024, NEE's total net available liquidity was approximately \$10.8 billion. The table below provides the components of FPL's and NEECH's net available liquidity at March 31, 2024.

				Maturity Date	
	FPL	NEECH	Total	FPL	NEECH
	(millions)				
Syndicated revolving credit facilities <sup>(a)</sup>	\$ 3,420	\$10,667	\$14,087	2025 – 2029	2025 – 2029
Issued letters of credit	(3)	(425)	(428)		
	<u>3,417</u>	<u>10,242</u>	<u>13,659</u>		
Bilateral revolving credit facilities <sup>(b)</sup>	1,080	1,900	2,980	2024 – 2027	2024 – 2025

Amounts due to related parties under the CSCS agreement (see Note 6)	—	1,443	1,443		
Net available liquidity	\$ 3,969	\$ 6,781	\$10,750		

- (a) Provide for the funding of loans up to the amount of the credit facility and the issuance of letters of credit up to \$3,200 million (\$450 million for FPL and \$2,750 million for NEECH). The entire amount of the credit facilities is available for general corporate purposes and to provide additional liquidity in the event of a loss to the companies' or their subsidiaries' operating facilities (including, in the case of FPL, a transmission and distribution property loss). FPL's syndicated revolving credit facilities are also available to support the purchase of \$1,319 million of pollution control, solid waste disposal and industrial development revenue bonds in the event they are tendered by individual bondholders and not remarketed prior to maturity, as well as the repayment of approximately \$1,812 million of floating rate notes in the event an individual noteholder requires repayment at specified dates prior to maturity. As of March 31, 2024, approximately \$3,664 million of NEECH's syndicated revolving credit facilities expire over the next 12 months.
- (b) Only available for the funding of loans. As of March 31, 2024, approximately \$550 million of FPL's and \$1,250 million of NEECH's bilateral revolving credit facilities expire over the next 12 months.
- (c) Only available for the issuance of letters of credit. As of March 31, 2024, approximately \$980 million of the letter of credit facilities expire over the next 12 months.

## Capital Support

#### Guarantees, Letters of Credit, Surety Bonds and Indemnifications (Guarantee Arrangements)

Certain subsidiaries of NEE issue guarantees and obtain letters of credit and surety bonds, as well as provide indemnities, to facilitate commercial transactions with third parties and financings. Substantially all of the guarantee arrangements are on behalf of NEE's consolidated subsidiaries, as discussed in more detail below. See Note 6 regarding guarantees of obligations on behalf of NEP subsidiaries. NEE is not required to recognize liabilities associated with guarantee arrangements issued on behalf of its consolidated subsidiaries unless it becomes probable that they will be required to perform. At March 31, 2024, NEE believes that there is no material exposure related to these guarantee arrangements.

NEE subsidiaries issue guarantees related to equity contribution agreements and engineering, procurement and construction agreements, associated with the development, construction and financing of certain power generation facilities (see Note 11 – Structured Payables) and a natural gas pipeline project under construction, as well as a related natural gas transportation agreement. Commitments associated with these activities are included in the contracts table in Note 12.

In addition, at March 31, 2024, NEE subsidiaries had approximately \$5.7 billion in guarantees related to obligations under purchased power and acquisition agreements, nuclear-related activities, payment obligations related to PTCs, support for NEER's retail electricity provider activities, as well as other types of contractual obligations (see Note 12 – Commitments).

In some instances, subsidiaries of NEE elect to issue guarantees instead of posting other forms of collateral required under certain financing arrangements, as well as for other project-level cash management activities. At March 31, 2024, these guarantees totaled approximately \$1.2 billion and support, among other things, cash management activities, including those related to debt service and operations and maintenance service agreements, as well as other specific project financing requirements.

Subsidiaries of NEE also issue guarantees to support customer supply and proprietary power and gas trading activities, including the buying and selling of wholesale energy commodities. At March 31, 2024, the estimated mark-to-market exposure (the total

amount that these subsidiaries of NEE could be required to fund based on energy commodity market prices at March 31, 2024) plus contract settlement net payables, net of collateral posted for obligations under these guarantees, totaled approximately \$1.6 billion.

At March 31, 2024, subsidiaries of NEE also had approximately \$5.2 billion of standby letters of credit and approximately \$1.7 billion of surety bonds to support certain of the commercial activities discussed above. FPL's and NEECH's credit facilities are available to support substantially all of the standby letters of credit.

In addition, as part of contract negotiations in the normal course of business, certain subsidiaries of NEE have agreed and in the future may agree to make payments to compensate or indemnify other parties, including those associated with asset divestitures, for possible unfavorable financial consequences resulting from specified events. The specified events may include, but are not limited to, an adverse judgment in a lawsuit, or the imposition of additional taxes due to a change in tax law or interpretations of the tax law. NEE is unable to estimate the maximum potential amount of future payments by its subsidiaries under some of these contracts because events that would obligate them to make payments have not occurred or, if any such event has occurred, they have not been notified of its occurrence.

NEECH, a 100% owned subsidiary of NEE, provides funding for, and holds ownership interests in, NEE's operating subsidiaries other than FPL. NEE has fully and unconditionally guaranteed certain payment obligations of NEECH, including most of its debt and all of its debentures registered pursuant to the Securities Act of 1933 and commercial paper issuances, as well as most of its payment guarantees and indemnifications, and NEECH has guaranteed certain debt and other obligations of subsidiaries within the NEER segment. Certain guarantee arrangements described above contain requirements for NEECH and FPL to maintain a specified credit rating.

NEE fully and unconditionally guarantees NEECH debentures pursuant to a guarantee agreement, dated as of June 1, 1999 (1999 guarantee) and NEECH junior subordinated debentures pursuant to an indenture, dated as of September 1, 2006 (2006 guarantee). The 1999 guarantee is an unsecured obligation of NEE and ranks equally and ratably with all other unsecured and unsubordinated indebtedness of NEE. The 2006 guarantee is unsecured and subordinate and junior in right of payment to NEE senior indebtedness (as defined therein). No payment on those junior subordinated debentures may be made under the 2006 guarantee until all NEE senior indebtedness has been paid in full in certain circumstances. NEE's and NEECH's ability to meet their financial obligations are primarily dependent on their subsidiaries' net income, cash flows and their ability to pay upstream dividends or to repay funds to NEE and NEECH. The dividend-paying ability of some of the subsidiaries is limited by contractual restrictions which are contained in outstanding financing agreements.

Summarized financial information of NEE and NEECH is as follows:

	Three Months Ended March 31, 2024			Year Ended December 31, 2023		
	Issuer/ Guarantor Combined <sup>(a)</sup>	NEECH Consolidated <sup>(b)</sup>	NEE Consolidated <sup>(b)</sup>	Issuer/ Guarantor Combined <sup>(a)</sup>	NEECH Consolidated <sup>(b)</sup>	NEE Consolidated <sup>(b)</sup>

(a) Excludes intercompany transactions, and investments in, and equity in earnings of, subsidiaries.

(b) Information has been prepared on the same basis of accounting as NEE's condensed consolidated financial statements.

## Shelf Registration

In March 2024, NEE, NEECH and FPL filed a shelf registration statement with the SEC for an unspecified amount of securities, which became effective upon filing. The amount of securities issuable by the companies is established from time to time by their respective boards of directors. Securities that may be issued under the registration statement include, depending on the registrant, senior debt securities, subordinated debt securities, junior subordinated debentures, first mortgage bonds, common stock, preferred stock, depositary shares, stock purchase contracts, stock purchase units, warrants and guarantees related to certain of those securities.

## ENERGY MARKETING AND TRADING AND MARKET RISK SENSITIVITY

NEE and FPL are exposed to risks associated with adverse changes in commodity prices, interest rates and equity prices. Financial instruments and positions affecting the financial statements of NEE and FPL described below are held primarily for purposes other than trading. Market risk is measured as the potential loss in fair value resulting from hypothetical reasonably possible changes in commodity prices, interest rates or equity prices over the next year. Management has established risk management policies to monitor and manage such market risks, as well as credit risks.

### Commodity Price Risk

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the physical and financial risks inherent in the purchase and sale of fuel and electricity. In addition, NEE, through NEER, uses derivatives to optimize the value of its power generation and gas infrastructure assets and engages in power and fuel marketing and trading activities to take advantage of expected future favorable price movements. See Note 2.

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three months ended March 31, 2024 were as follows:

	Hedges on Owned Assets			
		Non- Qualifying	FPL Cost Recovery Clauses	NEE Total
	Trading			
	(millions)			
Three Months Ended March 31, 2024				
Fair value of contracts outstanding at December 31, 2023	\$ 1,337	\$ (1,477)	\$ 12	\$ (128)
Reclassification to realized at settlement of contracts	(44)	73	(1)	28
Value of contracts acquired	—	(3)	—	(3)
Net option premium purchases (issuances)	(4)	1	—	(3)
Changes in fair value excluding reclassification to realized	96	(71)	(20)	5
Fair value of contracts outstanding at March 31, 2024	1,385	(1,477)	(9)	(101)
Net margin cash collateral paid (received)				146
Total mark-to-market energy contract net assets (liabilities) at March 31, 2024	\$ 1,385	\$ (1,477)	\$ (9)	\$ 45

NEE's total mark-to-market energy contract net assets (liabilities) at March 31, 2024 shown above are included on the condensed consolidated balance sheets as follows:

	<b>March 31, 2024</b>
	<b>(millions)</b>
Current derivative assets	<b>\$ 1,284</b>
Noncurrent derivative assets	<b>1,465</b>
Current derivative liabilities	<b>(689)</b>
Noncurrent derivative liabilities	<b>(2,015)</b>
NEE's total mark-to-market energy contract net assets	<b>\$ 45</b>

The sources of fair value estimates and maturity of energy contract derivative instruments at March 31, 2024 were as follows:

	Maturity						
	2024	2025	2026	2027	2028	Thereafter	Total
	(millions)						
Trading:							
Quoted prices in active markets for identical assets	\$ (579)	\$ (255)	\$ 7	\$ (1)	\$ 44	\$ 61	\$ (723)

Significant unobservable inputs	47	(43)	(42)	(35)	(1)	50	(24)
Total	(81)	(421)	(361)	(266)	(128)	(220)	(1,477)
Owned Assets – FPL Cost Recovery Clauses:							
Quoted prices in active markets for identical assets	—	—	—	—	—	—	—
Significant other observable inputs	(7)	(2)	(1)	(1)	—	—	(11)
Significant unobservable inputs	(5)	8	(2)	1	—	—	2
Total	(12)	6	(3)	—	—	—	(9)
Total sources of fair value	\$ 163	\$ (163)	\$ (114)	\$ (109)	\$ (17)	\$ 139	\$ (101)

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three months ended March 31, 2023 were as follows:

	Hedges on Owned Assets			
		Non- Qualifying	FPL Cost Recovery Clauses	NEE Total
	Trading			
	(millions)			
<b>Three Months Ended March 31, 2023</b>				
Fair value of contracts outstanding at December 31, 2022	\$ 1,177	\$ (3,921)	\$ 16	\$ (2,728)
Reclassification to realized at settlement of contracts	(95)	198	(1)	102
Value of contracts acquired	—	20	—	20
Net option premium purchases (issuances)	117	6	—	123
Changes in fair value excluding reclassification to realized	32	992	(25)	999
Fair value of contracts outstanding at March 31, 2023	1,231	(2,705)	(10)	(1,484)
Net margin cash collateral paid (received)				1,343
Total mark-to-market energy contract net assets (liabilities) at March 31, 2023	\$ 1,231	\$ (2,705)	\$ (10)	\$ (141)

With respect to commodities, NEE's Exposure Management Committee (EMC), which is comprised of certain members of senior management, and NEE's chief executive officer are responsible for the overall approval of market risk management policies and the delegation of approval and authorization levels. The EMC and NEE's chief executive officer receive periodic updates on market positions and related exposures, credit exposures and overall risk management activities.

NEE uses a value-at-risk (VaR) model to measure commodity price market risk in its trading and mark-to-market portfolios. The VaR is the estimated loss of market value based on a one-day holding period at a 95% confidence level using historical simulation methodology. The VaR figures are as follows:

	Trading <sup>(a)</sup>			Non-Qualifying Hedges and Hedges in FPL Cost Recovery Clauses <sup>(b)</sup>			Total		
	FPL	NEER	NEE	FPL	NEER	NEE	FPL	NEER	NEE
	(millions)								
December 31, 2023	\$ —	\$ 4	\$ 4	\$ 2	\$ 114	\$ 116	\$ 2	\$ 113	\$ 111
March 31, 2024	\$ —	\$ 5	\$ 5	\$ 2	\$ 111	\$ 113	\$ 2	\$ 112	\$ 113
Average for the three months ended March 31, 2024	\$ —	\$ 4	\$ 4	\$ 2	\$ 122	\$ 122	\$ 2	\$ 120	\$ 121

- (a) The VaR figures for the trading portfolio include positions that are marked to market. Taking into consideration offsetting unmarked non-derivative positions, such as physical inventory, the trading VaR figures were approximately \$0 million and \$1 million at March 31, 2024 and December 31, 2023, respectively.
- (b) Non-qualifying hedges are employed to reduce the market risk exposure to physical assets or contracts which are not marked to market. The VaR figures for the non-qualifying hedges and hedges in FPL cost recovery clauses category do not represent the economic exposure to commodity price movements.

## Interest Rate Risk

NEE's and FPL's financial results are exposed to risk resulting from changes in interest rates as a result of their respective outstanding and expected future issuances of debt, investments in special use funds and other investments. NEE and FPL manage their respective interest rate exposure by monitoring current interest rates, entering into interest rate contracts and using a combination of fixed rate and variable rate debt. Interest rate contracts are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

The following are estimates of the fair value of NEE's and FPL's financial instruments that are exposed to interest rate risk:

	March 31, 2024		December 31, 2023	
	Carrying Amount	Estimated Fair Value <sup>(a)</sup>	Carrying Amount	Estimated Fair Value <sup>(a)</sup>
(millions)				
NEE:				
Special use funds	\$ 2,217	\$ 2,217	\$ 2,222	\$ 2,222
Other investments, primarily debt securities	\$ 1,733	\$ 1,733	\$ 1,802	\$ 1,802
Long-term debt, including current portion	\$ 72,087	\$ 67,997	\$ 68,306	\$ 64,103
Interest rate contracts – net unrealized gains	\$ 17	\$ 17	\$ (249)	\$ (249)
FPL:				
Special use funds	\$ 1,654	\$ 1,654	\$ 1,658	\$ 1,658
Long-term debt, including current portion	\$ 24,059	\$ 22,403	\$ 25,274	\$ 23,430

(a) See Notes 2 and 3.

The special use funds of NEE and FPL consist of restricted funds set aside to cover the cost of storm damage for FPL and for the decommissioning of NEE's and FPL's nuclear power plants. A portion of these funds is invested in fixed income debt securities primarily carried at estimated fair value. At FPL, changes in fair value, including any credit losses, result in a corresponding adjustment to the related regulatory asset or liability accounts based on current regulatory treatment. The changes in fair value for NEE's non-rate regulated operations result in a corresponding adjustment to OCI, except for credit losses and unrealized losses on available for sale securities intended or required to be sold prior to recovery of the amortized cost basis, which are reported in current period earnings. Because the funds set aside by FPL for storm damage could be needed at any time, the related investments are generally more liquid and, therefore, are less sensitive to changes in interest rates. The nuclear decommissioning funds, in contrast, are generally invested in longer-term securities.

At March 31, 2024, NEE had interest rate contracts with a net notional amount of approximately \$17.5 billion to manage exposure to the variability of cash flows primarily associated with expected future and outstanding debt issuances at NEECH and NEER. See Note 2.

Based upon a hypothetical 10% decrease in interest rates, the fair value of NEE's net liabilities would increase by approximately \$2,782 million (\$1,057 million for FPL) at March 31, 2024.

## **Equity Price Risk**

NEE and FPL are exposed to risk resulting from changes in prices for equity securities. For example, NEE's nuclear decommissioning reserve funds include marketable equity securities carried at their market value of approximately \$5,709 million and \$5,290 million (\$3,832 million and \$3,536 million for FPL) at March 31, 2024 and December 31, 2023, respectively. NEE's and FPL's investment strategy for equity securities in their nuclear decommissioning reserve funds emphasizes marketable securities which are broadly diversified. At March 31, 2024, a hypothetical 10% decrease in the prices quoted on stock exchanges would result in an approximately \$534 million (\$349 million for FPL) reduction in fair value. For FPL, a corresponding adjustment would be made to the related regulatory asset or liability accounts based on current regulatory treatment, and for NEE's non-rate regulated operations, a corresponding amount would be recorded in change in unrealized gains (losses) on equity securities held in NEE's nuclear decommissioning funds – net in NEE's condensed consolidated statements of income. See Note 3.

## **Credit Risk**

NEE and its subsidiaries, including FPL, are also exposed to credit risk through their energy marketing and trading operations. Credit risk is the risk that a financial loss will be incurred if a counterparty to a transaction does not fulfill its financial obligation. NEE manages counterparty credit risk for its subsidiaries with energy marketing and trading operations through established policies, including counterparty credit limits, and in some cases credit enhancements, such as cash prepayments, letters of credit, cash and other collateral and guarantees.

Credit risk is also managed through the use of master netting agreements. NEE's credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. For all derivative and contractual transactions, NEE's energy marketing and trading operations, which include FPL's energy marketing and trading division, are exposed to losses in the event of nonperformance by counterparties to these transactions. Some relevant considerations when assessing NEE's energy marketing and trading operations' credit risk exposure include the following:

- Operations are primarily concentrated in the energy industry.
- Trade receivables and other financial instruments are predominately with energy, utility and financial services related companies, as well as municipalities, cooperatives and other trading companies in the U.S.
- Overall credit risk is managed through established credit policies and is overseen by the EMC.
- Prospective and existing customers are reviewed for creditworthiness based upon established standards, with customers not meeting minimum standards providing various credit enhancements or secured payment terms, such as letters of credit or the posting of margin cash collateral.
- Master netting agreements are used to offset cash and noncash gains and losses arising from derivative instruments with the same counterparty. NEE's policy is to have master netting agreements in place with significant counterparties.

Based on NEE's policies and risk exposures related to credit, NEE and FPL do not anticipate a material adverse effect on their financial statements as a result of counterparty nonperformance. At March 31, 2024, NEE's credit risk exposure associated with its energy marketing and trading operations, taking into account collateral and contractual netting rights, totaled approximately \$3.0 billion (\$76 million for FPL), of which approximately 90% (99% for FPL) was with companies that have investment grade credit ratings. See Note 2.

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

See Management's Discussion – Energy Marketing and Trading and Market Risk Sensitivity.

### **Item 4. Controls and Procedures**

#### **(a) Evaluation of Disclosure Controls and Procedures**

As of March 31, 2024, each of NEE and FPL had performed an evaluation, under the supervision and with the participation of its management, including NEE's and FPL's chief executive officer and chief financial officer, of the effectiveness of the design and operation of each company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and the chief financial officer of each of NEE and FPL concluded that the company's disclosure controls and procedures were effective as of March 31, 2024.

#### **(b) Changes in Internal Control Over Financial Reporting**

NEE and FPL are continuously seeking to improve the efficiency and effectiveness of their operations and of their internal controls. This results in refinements to processes throughout NEE and FPL. However, there has been no change in NEE's or FPL's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that

occurred during NEE's and FPL's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEE's or FPL's internal control over financial reporting.

## PART II - OTHER INFORMATION

### Item 1. Legal Proceedings

See Note 12 – Legal Proceedings.

With regard to environmental proceedings to which a governmental authority is a party, NEE's and FPL's policy is to disclose any such proceeding if it is reasonably expected to result in monetary sanctions of greater than or equal to \$1 million.

### Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in the 2023 Form 10-K. The factors discussed in Part I, Item 1A. Risk Factors in the 2023 Form 10-K, as well as other information set forth in this report, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects should be carefully considered. The risks described in the 2023 Form 10-K are not the only risks facing NEE and FPL. Additional risks and uncertainties not currently known to NEE or FPL, or that are currently deemed to be immaterial, also may materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects.

### Item 2. Unregistered Sales of Equity Securities, Use of Proceeds, and Issuer Purchases of Equity Securities

(a) Information regarding purchases made by NEE of its common stock during the three months ended March 31, 2024 is as follows:

Period	Total Number of Shares Purchased <sup>(a)</sup>	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program <sup>(b)</sup>
1/1/24 - 1/31/24	—	\$ —	—	180,000,000
2/1/24 - 2/29/24	219,899	\$ 57.27	—	180,000,000
3/1/24 - 3/31/24	—	\$ —	—	180,000,000
Total	<u>219,899</u>	<u>\$ 57.27</u>	<u>—</u>	

(a) Includes shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. 2021 Long Term Incentive Plan and the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan.

(b) In May 2017, NEE's Board of Directors authorized repurchases of up to 45 million shares of common stock (180 million shares after giving effect to the four-for-one stock split of NEE common stock effective October 26, 2020) over an unspecified period.

### Item 5. Other Information

(c) Rule 10b5-1 trading arrangements adopted during the three months ended March 31, 2024 were as follows:

- On February 5, 2024, Armando Pimentel, Jr., President and Chief Executive Officer of FPL, adopted a Rule 10b5-1 trading arrangement that is intended to satisfy the affirmative defense of Rule 10b5-1(c) for the sale of 99,412 shares of NEE's common stock until January 31, 2025.
- On March 1, 2024, Charles E. Sieving, Executive Vice President, Chief Legal, Environmental and Federal Regulatory Affairs Officer of NEE, adopted a Rule 10b5-1 trading arrangement that is intended to satisfy the affirmative defense of Rule 10b5-1(c) for the sale of 154,411 shares of NEE's common stock until December 31, 2024.

**Item 6. Exhibits**

Exhibit Number	Description	NEE	FPL
*4(a)	<a href="#">Officer's Certificate of NextEra Energy Capital Holdings, Inc., dated January 31, 2024, creating the 4.95% Debentures, Series due January 29, 2026 (filed as Exhibit 4(oo) to Form 10-K for the year ended December 31, 2023, File No. 1-8841)</a>	x
