Results of inquiry

As a result of better utilization of preferred suppliers and detailed evaluation of product-level spend in 2023 the Company decreased the number of suppliers we identified as possibly using conflict minerals manufactured or contracted to be manufactured for the Company. This focused approach resulted in be communication and improved supplier response rate. We received information regarding conflict mineral chain from 596 relevant suppliers. Approximately 57% of the suppliers reported that they did not use continuous provided to the Company. Approximately 34% of the responding suppliers furnished related to the Company originating from the Democratic Republic of Congo ("DRC") or an adjoining country (column Region"). Approximately 9% of the responding suppliers furnished relevant materials to the Company the either outside of the DRC Region or from recycled or scrap sources. As a result of sanctions in Russia, compared to 2022. However, as a result of sourcing from our preferred suppliers, a detailed evaluation of spend information and an increased number of product level reports from the suppliers, the Company decrease the use of high-risk suppliers from 157 to 96 year-over-year. A table listing all originating conflict Mineral is set forth as Paragraph 6 of the Report
